NOTICE TO THRESHERS.

WE would advise farmers and others not to purchase until they have seen White's Improved Portable Farm Engine, made at the Forest City Machine Works, London, Ont.

These engines are licensed by all the leading Insurance Companies.

Will burn long wood, are the most powerful, and are handled with the least trouble.

I cannot fill more orders for Agricultural Engines at present. I have orders for more than I can supply. My engine is giving the best of satisfaction everywhere. The farmers say it is lighter, stronger, and does more work with less fuel than any engine in the Townships where it is used.

Will be prepared to fill all orders for next year.

Canadian Patent, Feb. 14, 1880.

United States Patent, June 11, 1880

WE WARRANT THIS MACHINE TO SOW PLASTER PERFECTLY.

By moving a lever, which can be done in an instant, the change is made for any kind of Grain, Grass Seed or Fertilizer. It is provided with an index, that it may be accurately adjusted to sow any quantity per acre. Any boy that can drive a horse can work the machine.

We, the undersigned, having bought and used the above machine, cheerfully say, after a fair trial in all kinds of sowing, that, considering the durability and simplicity, it is unequalled by any Broadcast Seeder made, and would heartily recommend the machine to the farmers.
