

COCKSHUTT

A Cockshutt Drill Makes a Bumper Harvest

GET a Cockshutt Drill. You will benefit for many years. You will give your seed and your land a fair show.

You can sow in rows six inches apart. Ordinary seeders sow seven inches apart. Get as much crop from six acres of land as you now get from seven acres.

You get more than that, though. A lot of seeders sag at the centre. The deep seeded rows lag behind the rest. They are choked and stunted. Hot June weather catches them, while still tender spikes. The same rows would be tall and vigorous, if planted with a non-sagging Cockshutt Seeder. This means money at Harvest time.

You get three to five extra bushels, just by using a Cockshutt drill. Remember this is profit. These extra bushels are found money for every acre you seed with a Cockshutt.

Plan right now for a new seeder—write us a letter asking for details. Remember, this means \$50 to \$100 of extra profit for you for years to come. Proper seeding—the kind done by this drill—means a maximum yield at harvest.

Here is Why this Drill Is Your "Best Buy"

THE Cockshutt Drill is made with a strong I-beam frame that keeps all discs at the same height. It is carried on wide-tired wheels, revolving on short axles with renewable bushings. The draft is always light. The discs are self-cleaning. They drop trash automatically. The boots cannot clog with mud. The discs are self-oiling. The feed won't smash, break or bruise the kernels—is always accurate.

YOUR CROP NEEDS A "SQUARE DEAL"

The Cockshutt Feed gives you perfect control of the seeder. The feed is always just right for your land. The "I"-beam keeps your drills up, without sagging.

This means that you sow just enough seed at just the right depth for a quick start. You get prompt, early, even growth—half the battle for a big harvest.

KEEP YOUR TEAM GOING

The Cockshutt Disc "draws away" from the trouble-proof grain boot. As trash rises on a disc, it simply falls off, instead of wedging.

This keeps your drills running steadily. You have no stops. You sow without an hour's delay from the day you start seeding till you are done. This means big money saved in wages, and full advantage of spring growth.

GUARD AGAINST DROUGHT

The close-set rows seeded only six inches apart are protection against drought. Your crop shades your land so well in June and July that drought trouble is minimized.

The Cockshutt Drill brings you the full benefit of summer rains, simply by giving a compact crop that uses every drop of rain for growth.

GET FIVE EXTRA BUSHELS PER ACRE

With the Cockshutt your crop gets an even, early start. It grows compactly. It takes full advantage of summer rain. It ripens evenly. It gives the same crop on six acres that you now get from seven acres.

You get five extra bushels per acre per year using a Cockshutt Drill. You don't pay a cent extra for seeding—in fact, you pay less wages, and do the seeding quicker.

OUR DRILL PAYS!

Send Us a Postal! Write us a card. Say: "I want more information on your drills." This does not obligate you to buy. It will get you facts about the Cockshutt—show you how perfectly designed it is. This is one of the lightest draft drills on the market. That alone ought to give it the preference. But when you consider its effectiveness—the harvest it brings you, the crop it protects, the early spring growth it insures, the Cockshutt Seeder is THE DRILL. Write that card to us to-day, please. Now is the time to investigate.
