Rapid Growth

Pigs grow faster than other farm animals because of great digestive capacity. Yet herein lies a danger as well as an advantage. It is easy because a pig consumes much food to spoil digestion by overfeeding. When you fatten pigs it is well to give Dr. Hess Stock Food in the ration twice a day. Better yet, it is well to begin the use of

DR HESS STOCK FOOD

as soon as pigs are weaned and continue to the time of marketing. In this way hogs are kept healthy and make rapid growth. Dr. Hess Stock Food corrects digestive troubles, gives appetite for roughage, makes cows give more milk and keeps farm teams in condition. Formulated by Dr. Hess (M.D., D.V.S.) and endorsed by stockmen and medical writers. Sold on a written guarantee. Costs but a penny a day for horse, cow or steer.

100 lbs. \$7.00. 25 lb. pail \$2.00. Smaller quantities at a slight advance. Duty paid.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our government recognizes Dr. Hess Stock Food as a medicinal compound and this paper is back of the guarantee. If your dealer cannot supply you, we will.

DR. HESS & CLARK, ASHLAND, OHIO, U. S. A. Also Manufacturers of Dr. Hess Poultry Pan-acea and Instant Loose Killer.

Comfort In Working Boots

A man cannot work when his shoes pinch—when a seam rubs against his toes until it makes a corn—when a wrinkle chafes his foot constantly. With the end in view of getting away from these defects so common in many working boots we have produced the Amherst. This boot is Blucher made, of soft grain leather, on the roomy, comfortable last shown above, with even seams. Entirely made of solid leather, it guarantees durability, stability and long service—at \$3.00 a more economical working boot cannot be made. We deliver them to you pre-paid for \$3.00 Send to-day.

GALBRAITH'S ANNOUNCEMENT.

The fall announcement of Alex. Galbraith & Son, the familiarly known horse importers and breeders of Brandon, Manitoba and Janesville, is being circulated. The firm have a most reputation through having handled not only prize-winning show horses but by having placed in the country some of the best sires of the Clydesdale, Shire, Suffolk and Hackney breeds. Their present stock on hand at their different stables contains no less than five champions and reserve champions, in as many breeds, a most exceptional collection. Experience has added to the skill with which the Galbraith's select their horses, the firm having exhibited and won first prize at the first stallion show ever held in the city of Glasgow, seventy-one years ago. Their first importation to America was made twenty-six years ago and included the champion and successful stock horse Glencoe who served for twenty-three years as a sire in the Central States. A new importation is promised for this month when visitors to inspect them will be cordially welcomed.

SEED FAIRS.

In connection with our comments on the editorial page, in the issue of October 9th, about seed fairs, Mr. Eddy, who has charge of the seed branch in Manitoba, says: "The object of the seed fair is to create greater interest in this most important subject, and every effort will be put forth by the Seed Branch to encourage more Agricultural Societies to inaugurate a Seed Fair during the coming winter.

"In previous years the Seed Branch has undertaken to print prize lists and posters for any Society holding a Seed Fair, and also supply competent judges and speakers who place the awards and conduct practical discussions on seed selection, eradication of weeds, and other kindred subjects of general interest. At least as much will be done this year, and it is probable that even greater inducement will be offered. Up to the present no account has been taken of the germinating qualities of grain in awarding the prizes, but as this is a very important matter, provision will be made this year whereby the germinating qualities can be taken into consideration in making the awards. This is especially important in a year like the present when a considerable portion of the grain is frosted, as it is in some sections, as it is impossible to tell the extent to which grain is injured for seed purposes, except by the germination test. This provision will probably be left optional, and if any Agricultural Society wishes to have the per cent. germination taken into consideration in making the awards, it will be necessary to secure from prospective exhibitors representative samples of the grain they intend showing, at least two weeks before the date of the fair, so that there will be time to send in the samples to have them tested and get the returns. Societies that wish to do this will be supplied with envelopes in which to send the grain, which will carry through the mail free of charge.

"From this it will be seen that all the expense in connection with the Seed Fair is borne by the Seed Branch, with the exception of paying the prizes and providing a place for the meeting. The prize lists vary considerably according to the financial standing of the Societies, but on the average they range from \$50 to \$100. This seems like a very small amount of money with which to conduct a fair, but a very creditable prize list can be prepared from \$75, so that no Society should be frightened from undertaking to conduct a fair because of the expense. Much larger amounts are often spent on features at our summer fairs that have but little to recommend them, and as it is one of the first principles of economy that money should be spent to the best possible advantage, it is highly desirable that a Seed Fair be provided for."

MAPLE CREEK A WHEAT EXPORTER.

The first car of wheat ever sent out of the Maple Creek district was shipped on Friday of last week. The quality of the grain was good, expert judges who

ROOFS That Stay Roofed The strongest wind that ever blew can't rip away a roof covered with self-locking "OSHAWA" GALVANIZED STEEL SHINGLES Rain can't get through it in 25 years (guaranteed in writing for that long—good for a century, really)—fire can't bother such a roof—proof against all the elements—the cheapest GOOD roof there is. SYNOPSIS OF CANADIAN NORTH-WEST HOMESTEAD REGULATIONS

ANY even numbered section of Dominion Lands in Manitoba, Saskatchewan and Alberta, excepting 8 and 26, not reserved, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres, more or less.

Entry must be made personally at the local land office for the district in which the land is situated.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

- (1) At least six months' residence upon and cultivation of the land in each year for three years.
(2) If the father (or mother if the father is deceased) of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.
(3) If the settler has his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent. W. W. CORY, Deputy of the Minister of the Interior.

N. B.—Unauthorized publication of this advertisement will not be paid for.

examined it graded it at one Northern or better. Gradually the wheat farmer is encroaching on the domains of the rancher. It has always been believed that Maple Creek district would remain a rancher's country. Two years ago such an event as a wheat shipment from this point was considered impossible.

For the man who is determined to make the best out of a year in which the weather has not been the most kind there is a big snap in the offer made by H. M. Bing of Glenella, who for several good reasons must dispose of his herd of purebred and high grade cattle. From eighteen to twenty dollars a head for young grade stock ought to be sufficient inducement to any one who has straw and frozen grain to feed. This is a case of stock growing into money and more stock.
