Galvanized Water Tanks

Like everything else in tinwork Galvanized Water Tanks have to be made right or they are soon rendered useless. Our Tinsmith Department makes a specialty of Water Tanks. Only the best Queen's Head brand of galvanized iron used and very heavy iron hoops. The bottoms are double seamed.

Our Tanks are Soldered Inside and Out

Some firms make their tanks soldered only on the outside and these soon prove unsatisfactory. The water gets in on the inside and the tank soon rusts. All our Water Tanks are soldered inside and out and are made in all sizes from ten to one hundred barrels. Lowest Prices on Tinwork, Galvanized Roofing, Cornice Work and Eave-troughings.

Time to Paper

It's wonderful how fresh and bright a room becomes when newly papered. Wonderful too what a difference there is in papers. People are saying many new nice things about our large stocks of new Wall Papers. Buying very freely also.
