A float of salt grass, containing about 20 tons, belonging to Isaac Schofield and others, went adrift a few days ago, and lodged on the west of Long Island. Messrs. Card and Davison discovered it upon the mud flats and are now engaged in gathering it and expect to rave about 10 tons. They are saving it in the interest of the owners.

Caldwell & Murray give upthe credit system on Nov. 1st. and in future will run their business on the safe and sound principle of pay as you go. They will no doubt be able to do better for their customers than ever, as they will have no losser to make up.

BARN BURNED.—On Saturday last at about 10 o'clock, a. m., the barn of Mr. Charles Strong, of New Minas, was discovered to be on fire. Mr. Strong was some distance away digging potatoes, and before help could be pro. cured the fire had so far advanced that it could not be extinguished. The barn contained a quantity of hay and grain, 12 barrels of apples and a horse, all of which were burned. We are informedthere was no insurance and that Mr. Strong's loss will be considerable.

Mr. John W. Harris, of the American House, handed in the following nmunication, which we publish for the benefit of our readers:

110 Cannon Street. London, E. C., October 1st, 1884. Dear Sir, Since the commence of the Apple Season here, the imports into London, have been entirely from the Continent, a good deal of it of poor quality-; the fruit has been ward freely, owing to the scareity of English apples, but prices, in consequence of quantity and quality

heve been moderate. We expect these shipments will soon exhaust themselves, and the result be a confirmation of our opinion, that af-ter the early fruit was finished, our

market would require good apples from your side, but especially of good quality.

The only American apples sold here lately was a parcel of about 150 barrels, chiefly Baldwins; green and unripe, though otherwise good and well packed, which realized from 13 s @ 15 s per barrel.

In shipping to London, our advice is keep to fruit of good quality, and avoid sending to this market low grades.

#### CORRESPONDENCE.

To the Editor of the Acadian.

Certain persons for some years past, after getting their cattle branded for the Grand Pre Dyke, have been in the habit of driving them directly to Long Island in droves. I suppose for the purpose of finding good feed and pure water. If they had in view the finding of pure water they were sadly mistaken, as the Long Island creek is full of stagnant water and scummed over with a loathsome looking and poisonous substance. A number of the cattle so driven here are so unruly that it is useless to try to fence against them, and some of the farmers have been to great loss, as they frequently find in the mornings some 20 head of cattle in their enclosures. When will this covetous practice stop, and will they next year take charge of our little Island and drive us to the mountain. A.

Long Island, Oct. 14th 1884.

INTERESTING TO FRUIT

To the Editor of the Acadian. This is one of the best plum countries on the American continent. It is very singular that there are no plum orchards in the valley, when they can be grown so easily and they bear so young; very often four quarts the second year of planting. Instead of a few hundred trees, there ought to be thousands planted next year. The highest prices

obtained this year in Boston was \$5.50 per bush, for the small damson plums, The best varieties of plums to plant in Nova Scotia are the Nectorine Weaver, Mooney, Bradshaw, Forest Rose, and Kelsey's Japan. In proof of which I give the names of parties who have raised all but the last two. On trees set in the fail of 1880, from trees purchased of J. F. Rupert, Robert J. Spur, Round Hill, gathered from four trees of the Weaver plum, this year, 3 bush. J. P. Chipman and Geo. Vaugh, Kentville, John Davison and Mr. Cook, Bridgewater, raised from 1 to 2 bush. of plums on each tree. John Daniel, Windsor, had \$ bush from one Weaver Plum tree. This tree was a sight to behold, literally breaking down with its early, luscious, large and superior fruit; there was not room to put on one more plum. These varieties are not wholly free from that dreadful scourge-Black knot-but are less subject to it than any other trees that are sold. By careful and clean cul tivation, and plenty of ashes or saltand by careful watching to cut off and destroy any limbs that may be affected the disease may be cured. The Moore Arctic plum, that agents are selling 0 to \$2.50 per tree, does not stand the test, as it is so subject to the black knot-in fact is the most subject to it of any plum tree sold. I give a few of the names of many persons who

> Barss, Wolfville ; Hon. F. W. Borden, Canning. That plums pay I refer to John Tobin, Port Williams, who from a few trees sold 50 bushels plums for \$100.00 at his own door. 200 trees are planted on an acre, and as they bear in two or three years must be more profitable than an acre of apple trees and the first

have been deceived by the agents of

finds a ready sale. L. W. Kimball, Kentville.

-Lord Tennyson is writing a long dramatic poem about Thomas Becket.

-The population of Toronto is now 104,276.

Concerning what are known as 'standing advertisements' in newspapers which some merchants say are useless, it has been remarked, and truly, that they command confidence. The man who for years resides in a community and lives a reputable life, even though he be of moderate ability, will grow in the confidence and esteem of his fellows. On the same principal a newspaper advertisement becomes familiar to the eyes of the reader. It may not be carefully read every day, still it makes the business of a man familiar, and its continued presence in the columns of a paper inspires confidence in the ability of the avertiser.—Monetary Times.
