### PRESIDENT H. FLYNN

#### ANSWERS CHALLENGERS

(Continued from page 1)

Mr. Flynn was not at all heitave  
about statements he made. He offered  
to back them up with bets of \$200  
to \$50. There were no takers.

Premier Borden was again men-  
tioned. He had come to Halifax and  
then skurried south, afraid to meet  
his own people, said Mr. Flynn. He  
also referred to Borden's interest in  
the Winnipeg Cold Storage Co., which  
had to throw away tons of food which  
had rotted.

At the close of his address Mr.  
Flynn invited anyone who had any  
questions to ask to come onto the  
platform. The meeting gave a patient  
hearing to one G. W. V. A. man who  
bore the scars of 39 wounds when he  
added his word of criticism of the  
government for not treating the sol-  
diers and their dependents properly  
but when another man came on the  
stage and wanted to attack Flynn's  
own record, the meeting would have  
none of it and roared him down.

Someone on the stage started the  
National Anthem and the meeting  
dispersed, the consensus of opinion  
being that Flynn was on the right  
track and had made out a good case,  
while those who had tried to embarr-  
ass him had merely embarrassed their  
own interests.

### Notice to Contractors

Pursuant to the requirements of the  
Canada Highways Act, sealed tenders  
marked "Tenders for work in the  
Township of Niagara" will be re-  
ceived by the undersigned until twelve  
o'clock noon on Wednesday, April 7th  
1920, for the earth-work and other  
necessary work on the Provincial  
Highway in the Township of Niagara.  
Plans, specifications, and forms of  
tender may be seen on and after Wed-  
nesday, March 17th 1920, at the office  
of the Resident Engineer, Beamsville,  
Ont., and at the office of the City  
Engineer, St. Catharines; and at the  
office of the undersigned.

A marked cheque for \$500.00 pay-  
able to the Minister of Public Works  
and Highways for Ontario must ac-  
company each tender.

A Guaranty Company's bond for  
10% of the amount of the tender will  
be required when the contract is sig-  
ned.

The lowest or any tender not neces-  
sarily accepted.

W. A. McLEAN,  
Deputy-Minister of Highways,  
Department of Public Highways,  
Toronto, 12th March, 1920.  
Mar. 16th.

### DRAINAGE IS IMPORTANT

#### Some Benefits of a Well Devised Drainage Plan.

Guesswork Is the Poorest Method to  
Adopt—Get the Land Levels and  
Then Arrange for Tiling—How  
to Protect Drainage Outlets.

(Contributed by Ontario Department of  
Agriculture, Toronto.)

WHEN a man is about to  
erect a building, be it ever  
so small, the first thing  
he does is to make a plan.

That plan may be on paper or it may  
exist only in the mind of the builder,  
yet it is a plan. Without a plan to  
follow, a builder cannot do good  
work. The same is true of the drain-  
age. The man who places a "string,"  
or "line" of tile in a watercourse,  
which traverses his fields, should not  
do so without asking himself such  
questions as: "Am I putting this tile  
in the lowest part?" "Will I be able  
to get a satisfactory outlet?" How  
many acres will this tile drain, and  
is it large enough to drain it satis-  
factorily? Have I sufficient grade to  
drain the holes in the roof, fifty?"

But what if these questions  
he is like a builder without a  
plan; he is working in the dark; his  
work cannot be efficient. All these  
questions the drainage plan answers,  
and more.

No matter how small the means  
for immediate construction of drains,  
or how few the drains which one  
is about to install, he should not do  
so without having first laid out a  
plan of which these drains will be  
a part. On rolling land such a plan  
is not hard to decide upon, because  
the differences in elevation are very  
pronounced, and any one who is  
familiar with such lands is able to  
intelligently plan a system of drains  
for the land. But where the area is  
large and the topography irregular,  
or very flat, guesswork is out of  
the question. It is then that we must  
resort to the tape and the levelling  
instrument for reliable information.

A drainage plan shows first of all  
the differences in height or elevation  
between all parts of the farm over  
which the survey extended. This al-  
lows the owner of the land to decide  
upon the size of tile needed in any  
given drain. It is only when the plan-  
ner has a picture of the whole pro-  
ject before him that he can draft an  
efficient yet economical plan of drains  
for any piece of land.

Future Benefits.—The benefits of  
a plan do not end with the comple-  
tion of the drainage system. Only  
those of the plan who tried long and  
hard to find a drain, the location of  
which was nowhere recorded, know  
the value of guidance such as is of-  
fered by a plan. When a tile-drained  
farm is offered for sale the existence  
of a plan of drains adds greatly to  
the value of the farm. The plan is  
of equal value to both the seller and  
buyer. With proper care well-con-  
structed tile drains will give good  
service for several generations;  
therefore for the convenience of our  
children and grandchildren it is ne-  
cessary to have a plan of our under-  
ground drainage work.

There is another way in which a  
drainage plan is very helpful to a  
farm owner; it is a splendid guide  
toward ascertaining the acreage of  
any field or part of the farm. Fences  
are located on the plan, and the  
whole plan drawn to scale, so that  
with the aid of a rule it is possible  
to measure the area of any part of  
the land surveyed. This is of great  
assistance in planning a season's  
crops as well as in calculating yields  
per acre.

The drainage pays; but, before you  
start even a small system by all  
means secure a plan—G. Heimpel,  
O. A. College, Guelph.

Protecting Drainage Outlets.  
Tile, particularly clay tile, should  
not run out to the mouth of the  
drain. If a piece of old gas pipe,  
eight or ten feet long, can be secured,  
this should be placed in the drain in  
place of the tile. The gas pipe, being  
this a piece of corrugated steel, or  
even a plank trough is much better  
than running the tile right to the end,  
where they will be broken, washed in-  
to the outlet, or otherwise destroyed,  
allowing the earth to roll in and stop  
the flow of water.

Under any condition the bank is  
liable to wear away, and this wear-  
ing in the field may tramp it down,  
and block the tile, so in the second  
place of the tile, it is well to build  
through which the outlet discharges  
its water and the bank will be kept  
in a state of preservation. This may  
be made of concrete, stone or plank,  
and should be a permanent structure.

In some cases where the flow is heavy  
and the water would have tendency  
to undermine the wall, it is well to  
build an apron on which the force of  
the falling water is broken.

There is still another precaution  
which should be given due considera-  
tion. Frequently small animals,  
muskrats, coons, ground hogs and  
others, seek refuge in the tile. Here  
they are entrapped, and form a dam  
to the flowing water. To overcome  
such, the outlet should have bars  
across the end. These may be quite  
small, and close together so that  
nothing can get through. A screen  
may be fitted over the end, but un-  
less the mesh is quite large the water  
is retarded in its flow. Sometimes the  
first tile is threaded with wire. This  
forms a good protection.

When all these devices are given  
attention, the outlet should remain  
in a state of efficiency for years, and  
the system, if properly installed,  
should give satisfaction.—F. L. Peg-  
guson, O. A. College, Guelph.

The Montreal Tenants Protective  
Association plans to build apartment  
house on a co-operative basis.

### Nature's Mirror

#### When a woman is well and healthy—there's a sparkle in her eyes, a rose tint in her cheeks, and she has rich red blood. After taking nature's tonic which Dr. Pierce called "Favorite Prescription," there's elasticity in every movement and a spring in her step. Love comes to every woman who has bounding health—but when she is pallid, dull eyed, languid, she has no magnetism nor does she appeal to any man.

### SAVED A LIFE

Elmira, Ont.—"I have a very kind feel-  
ing for Dr. Pierce's Favorite Prescription  
for it once saved my mother's life. When  
going through middle age her health failed  
very fast; she suffered with pain in her head  
and backache, in fact, she had pains and  
aches all through her body. She lost weight,  
was very nervous, would become dizzy and  
at times faint and fall wherever she chanced  
to be. This necessitated our watching her  
all the time, we dared not leave her alone.  
She was as miserable as one could be and  
live. Dr. Pierce's Favorite Prescription  
was recommended to her. She took six  
bottles and was completely restored to  
good health."—MRS. B. E. UPTHE-  
GROVE, Box 223.

### Growth Shows Desire To Extend Army Work

Commissioner W. J. Richards, chief  
of the Salvation Army in Eastern  
Canada, has completed his fifth year  
in that capacity. During that time  
the Army has seen one of its great-  
est periods of usefulness. This period  
takes in the "war years." The great  
war had been under way since Aug  
and new problems presented them-  
selves to the organization when he  
assumed command. These problems

### Shows Solid Growth.

In all the various departments the  
same rate of growth has been re-  
corded. This shows that as often as  
humanly possible every opportunity  
has been seized for the advancement  
of every branch of the organization.  
Inasmuch as every act of service  
means the welfare of somebody, the  
position which the Salvation Army  
occupies today indicates tremendous

## DOCTOR WARD, The Specialist

SPECIALIST IN THE TREATMENT OF NERVOUS CONDITIONS, NERVE EXHAUSTION,  
BACKACHE, LUMBAGO, RHEUMATISM, STOMACH AND LIVER TROUBLES, ACNE, SKIN DIS-  
EASES, CATARRH, ASTHMA, RECTAL TROUBLES, PILES, FISTULA AND BLOOD CONDITIONS.  
The knowledge gained from many years' experience in treating diseases just like yours is of much benefit  
to you and assures the ailing man of prompt relief. When a man knows that he is again feeling well—that  
he is rid of his ailment—he feels that a heavy load has been lifted from his shoulders. I give every patient  
the benefit of the knowledge acquired through the long experience of a graduated, licensed and registered  
specialist, in order to bring about the most satisfactory results in the shortest possible time.

**NERVE EXHAUSTION**  
A CONDITION AFFECTING MANY MEN—THE GREAT AMERICAN DISEASE—IT IS BROUGHT ON BY OUR MANNER OF LIVING—OUR WORRY AND HURRY—AMERICANS EXHAUST MORE NERVOUS ENERGY THAN ANY OTHER RACE OF PEOPLE.

There are a great many men who need treatment for their  
nervous system. These men do not know what is the reason they  
don't feel right—why they can't work like they used to—why they  
tire so easily and why they are irritable, nervous, despondent,  
weak, pale and lack ambition. These conditions require the ex-  
pert knowledge and treatment of a specialist who has had many  
years' experience in just such ailments. A specialist learns by  
experience to know just the right treatment at the right time so  
that the patient can be dismissed at the earliest possible time. Man  
affected with nervous exhaustion have no endurance—no ambition  
—everything they attempt is an effort. Life to them appears as a  
long, gloomy future. Their appetite is poor and variable—they be-  
come irritable, cross and discouraged. They have pains and aches  
in various parts of the body and there is often indigestion and  
pains in the stomach. Sleepless, wakeful and restless nights fol-  
low.

**RHEUMATIC AILMENTS**  
SCIATICA AND OTHER FORMS OF RHEUMATISM, LUMBA-  
GO, PAINS IN BACK, SWELLING, ACHING, PAINFUL  
CONDITIONS IN ANY PART OF THE BODY—INFLAMED  
AND SWOLLEN JOINTS OF LEGS AND ARMS—MANY  
OTHER SYMPTOMS.

Hundreds of men are suffering with some form of Rheumat-  
ism. Many of these men go from day to day suffering untold agonies  
thinking they cannot be cured. They have tried liniments, rub-  
bing, massage, salts and other treatments without experiencing  
any relief, and they are now going through life thinking they  
are martyrs to that burden called Rheumatism. If these men could  
only know how easy it is to get rid of many rheumatic conditions  
I know they would not suffer another single day. Then all suf-  
ferers of rheumatism would be strong and healthy if they could  
get rid of the condition. Rheumatic patients are nearly all strong  
and robust before being attacked by this ailment, and therefore  
it is so hard for the man to understand why he should suffer the  
agonies of such a condition. When a man gets rid of such a con-  
dition he feels that a heavy burden has been lifted from his life, and  
he starts right out to make up for lost time both in money and  
pleasure. When a man comes to my office suffering with the  
above condition he is given a most careful examination, and he is  
given treatment that he feels is giving him great benefit.
