Progress of the War. THE events of the past week have given a serious turn to the hostilities between Spain and the United States. According to the information furnished us, there has been real and serious warfare in the vicinity of Santiago. There has been "stern strife and carnage drear," and the loss of human life has been great. This day week, General Shafter, in command of the American forces, sent word to Washington that his forces oc One report indicates that hours, but at considerable loss. the Leadership; but so strong vivid and dazzling that the whole fir The general is also credited with were the protests against him by mament was completely illuminated. the statement that he would at- some members of the party, as Peal after peal of thunder shock the tack without reinforcements.

Later on Saturday came the information that the American losses in killed and wounded amounted to at least one thousand. The Americans discovered that the city fortifications were very strong. In addition to this the Spanish ships in the harbor had drawn in close to the city and trained their guns on the invading army with deadly effect. It is army with deadly effect. Consequently he was obliged to retire to a safe distance and await the arrival of additional troops. He sent the following despatch to the Navy Department at Washington: "We have the town well invested on the north and east, but with a very thin line. Upon approaching it we find it of such a character and the defence so strong that this was a "Protestant country," and consequently Catholics shouldnot dare to look for office. It remained for the representatives of the present Liberal Government to thus place themselves on record; it remained for the Grit Morning Organ, with or without the advice of Sir Louis Davies, to make this insulting statement. Sir Wilfrid Laurier has lost an excellent opportunity of presenting to the world a correct view of British preferential trade. Germany has refused Canada "most favored nation" treatment because Canada makes a rebate in the duty on goods from the Mother Country. Sir Wilfrid's reply to Germany should have been that the preferential tariff in favor of Great Britain is entirely a domestic matter, that the Canadian tariff treats Germany exactly the same as it treats every other foreign nation, and therefore that Ger many has no valid ground for com-plaint. Instead of making that reply and insisting on favored nation treatment, Sir Wilfrid accepted Germany's attack as though it was deserved. It would seem that even yet, Sir Wilfrid and his colleagues do not appreciate the solid ground upon which preferential trade within the Empire is based. If he had done so he certainly could not have made the weak and erroneous reply to Germany's unwarranted discrimination which he is reported to have done.—Hal fax Herald.
