ARMY WILL BRING IN 25,000 PEOPLE

Commissioner Coombs Says Next Year Will See a Record Emigration Aided by Army

Commissioner Coombs, of the Salvation Army, who is at the head of the immigration section of the Army's work in Canada, arrived in the city last night, and will address a public meeting tonight in the First Presbyterian church.

The commissioner is accompanied by his wife and by Brigadier Howell, of Toronto, as his secretary. The latter was sent to Canada by the Army's immigration department, of which the commissioner has been chief for the past three years.

At that time he was sent to Canada by General Booth to organize his work, as he had 24 years ago helped lay the foundation of the Army in Canada.

Interviewed by a Bulletin representative this morning the commissioner stated that he was now looking over the ground to which the Army will send thousands of immigrants next year.

In the three years we have been at work on immigration to Canada we have brought over 40,000 people. During 1906, however, we propose to bring over 25,000 people. That is a record year, and we are planning to handle the tide of settlers in a new way.

We have chartered ten boats sailing from England and Scotland, and have made reservations on every steamer coming out next summer.

The first of our chartered boats will arrive in Halifax early in March, we expect, and the whole shipment of 1,000 persons will be entrained on a special train and brought straight through to British Columbia.

Later on, as the season is more favorable, we shall land the people in Ontario and the other provinces. From the time of sailing at the old country port until they reach their destination, we never lose sight of them.

"They will be accompanied by the special representatives from Canada, selected men and women, who have been sent to England to carry on what we call the 'kitchen propaganda'.

These women and men, who have been sent to England to carry on what we call the 'kitchen propaganda'.

There will be a large number of fine domestic goods, and we are bringing out. They have been specially selected by experienced women.

They are conscientious and energetic delegates, too, can overcome the timidity of the women folk, who are afraid to venture across the water.

Even if they can better their own and their family's position here.

"We had the idea of 'pumping in' the word 'emigrant' before Kipling came and advocated this system of emigration, a successful Canada, in bringing these thousands of people out next summer we hope to turn 'em eyes of the west to this country. On our special trains, both ways across the continent, we will have an officer to send back daily bulletins to the old country to keep interest there alive.

"What class of people are you bringing out?" "Naturally Canada is anxious on an intelligent, respectable class of people, who prefer the chances of a new world to those of their own country, and its consequent sufferings in the motherland. They are mostly poor, but poverty is no crime.

"We are not bringing men or women of the criminal class. This you will understand when I tell you that out of the 40,000 already brought here not more than five have given us any trouble. And we keep watch on all of them.

"Our immigration work is but a portion of the Army's Canadian work. We find distress and various social evils develop here as the country grows and we give close attention to these problems. Our department for aiding ex-prisoners is an active one.

"Still the main feature of our Canadian work is the bringing out of British emigrants. It is people that make a country, and we intend bringing as many as we can here—a good class.

"The fact that I am today in Edmonton, the former home of the Hon. Frank Oliver, reminds me of how much we owe to his encouragement in our work. He is a practical man, and the practical side of our work for humanity appeals to him. We are not living in the clouds, but down on the earth, right among struggling humanity.

"Mr. Oliver appreciates this and our anxiety always to bring out the right class of people to help populate Canada has won his approval. He on his part has won the admiration of our general and executive.

"It is the people, as I said before, who make a country, who lend a value to real estate; who build up great nations tonight, but his identification has not been established yet.

WINDY GRAIN MARKETS.

Winnipeg, November 20.—Primary receipts were 389 against 322,000 last year. In Winnipeg the market showed great strength with the increased demand for low grades and something that looked little like a corner.

HAS NO CONTRACTS FOR ASIATIC IMPORTATION

G.T.P. Denies Arrangements to Bring any Shares of the B.C. Tye Company, Enquiry at Vancouver.

Vancouver, B.C., November 20.—At the immigration inquiry, McNichol, the local purchasing agent for the G.T.P., with a telegram from General Manager Morse, denied that company had entered into any contracts or arrangements of any kind for the importation of Asiatics, and that D. H. Hayes had no connection with the G.T.P., nor had the G.T.P. officials any shares in the B.C. Tye Company, of which D. H. Hayes is secretary.

The commissioner and counsel accepted the statement and withdrew the subpoena for Hayes and Harbor Engineer Bacon, both at Prince Rupert.

Three other witnesses told of twelve hundred Japanese landing on July 25th from the British tramp steamer Kumeric, which, as now appears, was chartered in Honolulu by Japanese boarding keepers, who advanced the necessary \$25,000 as each Jap descended the gang plank and deposited his passports in a bag held by Norikawa's secretary.

This was stopped by the local medical health officer, Munro, and R. G. Macpherson, M.P., after 200 had descended. Dr. Munro testified that the money each showed was not their own, but the interest of the G.T.P. Honolulu, stated that they collected at Honolulu and were returning it through the consular office, each having the necessary \$25.

City Solicitor Cowan asked: "Then as Dominion officer you were hoodwinked?" Munro: "Yes."

The city solicitor sought to show that the consular agent of the emigration concerns. But this was checked by Commissioner King, who thought the consul's action consistent with his countrymen, and he did not think it desirable to permit questions insinuating that the consul knew the money did not belong to the emigrants, particularly in the consul's absence.

JAPS LEARN OUR WAYS. Then Return Home and in Keen Competition Out Occidental Traders.

Geneva, Switzerland, Nov. 21.—The Swiss Minister to Japan, D. R. Ritter, in a long report to his government concerning the commercial affairs in Japan in which he says Englishmen and Americans are being routed by the Japanese in the far east, especially from Japan. Dr. Ritter is undertaking to give an illustration of the manner in which the Japanese operate, and says the Japanese government sent a man named Oga to Switzerland and America to learn about the woolen trade conducted in those countries.

The man worked as an ordinary employee in various branches of the business in both countries, and he mastered the details of the manufacture and distribution he returned to Tokio. Then he started to remove the furniture of a large condensed milk factory near Tokio, cut prices sharply, and practically drove out of the country all foreign goods that competed with his.

Americans Interview Laurier. Ottawa, Nov. 21.—A large and influential delegation comprising senators and assemblymen of the State of New York and the State of Vermont, along with other influential American and Canadian residents interested in fishing as sport, arrived in the city yesterday afternoon to wait upon the Minister and officers of the Department of Marine and Fisheries, in regard to the fishing regulations in Missisquoi bay. They had an interview with the Deputy Minister of Marine and Fisheries this afternoon, and will meet the minister 40-morrow.

What they ask is to prevent the catching of fish by nets in Missisquoi bay during the spawning season. The bay is a special preserve of the Department, and a number of very fine summer residences are located there. The fish are rapidly disappearing, and residents feel this all the more because the injury is done through a dozen licenses granted by the Province of Quebec.

Bold Robbery in Macleod. Macleod, Alta., Nov. 21.—A bold attempt was made to burglarize the Hudson's Bay store here at an early hour last night. The watchman, upon entering the store, discovered a man in the act of loading a rifle he had just stolen. When discovered he bolted down the cellar stairs, dropping the gun and ammunition on the way. Before he could be headed off he effected his escape by means of a chute through which goods are received. The police were notified but up to the present time, no arrests have been made, but the officers are working on strong clues. It has since been discovered that the thief secured several articles of cutlery and about \$25 cash.

Explosion in G.T.P. Camp. Kona, Ont., Nov. 21.—Word reached here late last night of a terrific explosion in the G.T.P. construction camp No. 6, about five o'clock, in which seven men were killed and four injured. The explosion occurred at Phillips camp, about 20 miles from Kona, but from the news in hand it is not known whether it was a blasting mishap or a magazine explosion. Deacons W. J. and J. R. Gunn, of Kona, and Dr. Chappman, the corner, left immediately after the word was received here, that the details of the details will not be known until they return.

Four Killed by Explosion. Spokane, Nov. 20.—Four foreigners were killed and three injured by an explosion at a construction camp on the Portland and Seattle road, 72 miles south of Cheney, yesterday, while thawing dynamite for blasting. The four of them ran to take the rest of the dynamite out of the way when it exploded.

Canadian White Co. Finish Grading. Nokomis, Sask., Nov. 20.—The Canadian White Company finished their grading contract on the G. T. P. between the Touchwood Hills and Saskatoon today.

Big Brick Block Destroyed at Mid-night Thrued. Brandon, November 20.—A disastrous fire occurred at about 11.30 this evening, the loss of which is placed at over \$20,000. The scene of this conflagration was in Campbell & Campbell's big brick block. This firm carries on an extensive business in wholesale and retail furniture, and their place of business is a large four-story brick block on Ross street, between the fire is a mystery. It was first noticed at the fourth floor by Police Sergeant Currie, who immediately rang in the alarm. The brigade responded quickly, but had to use the aerial ladder to get at the blaze with the hose. The water poured on to the flames quickly leaked through the floor, and the costly stock below and practically ruining it. A large crowd of citizens gathered quickly at the scene of the fire, and worked hard to remove the furniture to the street. The damage done is mostly by water. The fire did not gain much headway after the arrival of the brigade. The stock was valued at \$75,000, and on this about \$30,000 was carried in insurance, leaving probably a loss of \$20,000.

NOTABLE ENGINEERING FEAT. Big Railway Station at Antwerp Is Moved and Made Higher. Antwerp, Nov. 20.—An extraordinary engineering feat has been accomplished here. An entire railway station has been moved, and the building was on a block thirty-three meters by twenty-two and weighing 3,000 tons. It was set back thirty-three meters and raised a meter and a half.

The building was underpinned and then rolled back, as was done in the work with a theatre in America. The work occupied five months. There was a good deal of scepticism locally as to eventual success, but Weiss, the engineer, lived in the station with his family the whole time, and now he is a hero at the successful completion.

Selkirk Shooting An Accident? Winnipeg, Man., Nov. 20.—The Provincial police here are inclined to regard the Selkirk shooting case in which a Galician named Max Bishilke, was killed, as an accident, and to credit the story of the brother, Paul, who did the shooting, that the gun accidentally discharged as he was taking it down from the wall. This is the opinion of Constable Ross who opened an inquiry yesterday, when it was clearly brought by the witnesses, including the wife and brother of the deceased that there had been no quarrel and that the man had not been drinking before the tragedy occurred. It is supposed Paul fed to the bunk after the shooting because his mind was temporarily unbalanced by the fatality.

Explosion in G.T.P. Camp. Kona, Ont., Nov. 21.—Word reached here late last night of a terrific explosion in the G.T.P. construction camp No. 6, about five o'clock, in which seven men were killed and four injured. The explosion occurred at Phillips camp, about 20 miles from Kona, but from the news in hand it is not known whether it was a blasting mishap or a magazine explosion. Deacons W. J. and J. R. Gunn, of Kona, and Dr. Chappman, the corner, left immediately after the word was received here, that the details of the details will not be known until they return.
