THURSDAY, July 6, 1911.

Unity of Action.

The public at large are having three object lessons on Conference, Council and Unity of Action. The lessons have been inculcated by the Methodist Conference the Teachers' Convention and Labor Day. On Monday the Methodist Conference expressed approval of a basis of union with some other churches, the desire for unity being prompted by an assurance of greater effectiveness in the Mission Field of the World. On Tuesday a great body of teachers gathered together in St. Bonaventure's College Hall to open a convention, where they might take counsel with one another to fit themselves better for the up-bringing of the young in the schools of the country. School methods, examination systems, curriculums, the standing of teachers are being discussed as means towards that end.

Yesterday a public holiday was held, styled Labor Day, as a Festival of Unionism. The value of unity of action in the Labor World is thus set out in the Workman.

"Now are the days of organized labor movements all over the world. In St. John's the workmen have taken advantage of the movement, and nearly all the trades and handicrafts have Unions. There can be no room for doubt as to the good that those organizations have done in improving the condition of the laboring men and their families. Less than twenty years ago men had to work for thirty cents a day; at the present time, owing to Labor Unions, the wages have advanced 100 per cent. The cost of living has gone up, and the workmen cannot now live on smaller pay. The improvement in the workmen's condition will go on. It only needs level-headed men to direct affairs and act on reasonable principles."

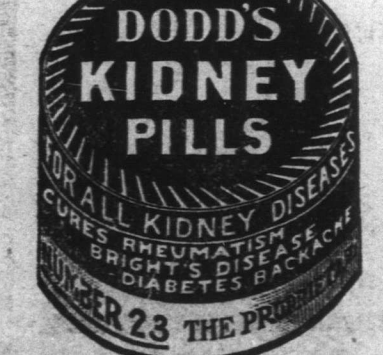

Portia's Fishery News.

By the Portia we learn that reports in Bonne Bay from the Straits show that little if any fish is being caught there at present. There are 20 Bonne Bay schooners fishing down there. From Cape Ray down to Burn's Point, there is no news of fish being caught. The early headquarters for these fish, from Little Placentia down to Cape Broyle, excepting St. John's and Trepassay Bay, they are doing remarkably well with cod on hook and trawls. All the bankers are on the Banks with a caplin baiting and there is no news of them.

Marine Notes.

The Clementine, Capt. Tucker, sailed this morning for Barbados taking a load of codfish and herring for A. Goodridge & Sons.

The Grace, Capt. Fitzgerald, arrived from Cadiz yesterday afternoon 25 days on the voyage. Capt. F. reports a summer passage.

The Stephano Here.

A MAGNIFICENT SHIP.

The new Red Cross liner Stephano, Capt. Clarke, arrived here this morning, and coming down here easily made 14 1/2 knots and can do 15. She left New York on July 1st, at 11:30 a.m. and landed some passengers in Bonaville Bay, below New York, which caused some delay. She arrived at Halifax at 4 a.m. Monday and left again at 3 p.m. Tuesday, and had fine weather all the way. She brought a full cargo and 147 passengers, saloon and second cabin, mostly round trippers. The one word "magnificent" must in part suffice in describing this beautiful ship. She is 326 feet long, 46.5 feet beam and 28 feet deep. Her gross tonnage is 2,449 tons, net 2,141. She has triple expansion engines and her indicated horse power were 3,000. She can accommodate 192 saloon and 58 second class passengers. She has telephones to every stateroom, is fitted with patent fog alarms, submarine bells, spacious promenade decks, patent davits to get the boats out quickly and her dining room may be used in a most sumptuous manner. Prof. Orlando's orchestra will be permanently on board the ship and on the voyage performed daily.

Men Who Were Shot.

Philip Parsons, 19, and Fred Sams, 21, of Codroy, were brought in by train to-day and taken to the Hospital. They are the two men who were fired upon by old Mr. Sams of Codroy, last Saturday. Parsons is lame but able to hop about; the other man had to be in bed all the way along and to be lifted to the ambulance on a stretcher; he is in a state of panic. Elaborate precautions are being taken by the authorities to suppress any further revolt.

Revolt in Lisbon.

Special Evening Telegram. LONDON, To-day. Dispatches to a London News Agency from Lisbon say that a great fight has taken place between the populace and seamen quartered in the barracks in the city. The seamen incited by Monarchist agitators attempted to raise an armed revolt. Revolvers and knives were used with deadly effect. The Government called out all available troops. After severe fighting they managed to quell the revolt and restore order. The city is in a state of panic. Elaborate precautions are being taken by the authorities to suppress any further revolt.

Strange Actio.

Special Evening Telegram. DUBLIN, To-day. The Nationalist City Councillors sent a telegram to the King, asking him not to receive the Lord Mayor of Dublin, when the latter attempts to present an address. The councillors also ordered the insignia of office to be placed in the hands of the City Treasurer.

The Big C. B. Excursion

The people of Collier's and Conception Harbor are now organizing a garden party which will take place at the latter town during the month of August. Excursions from the city have been projected for the occasion by those who are making the preparations. People will be able to go there on very low rates both by train and steamer. This is the first time that the people of this parish have undertaken an event of this kind. The scenery at this part of the Bay is very beautiful and no doubt many will take advantage of the occasion to go there. The people are leaving no stone unturned to make the event a success. The date will be given in this paper later.

N.E.A. Message to King

This morning the Newfoundland Teachers' Association sent a message to His Excellency the Administrator for transmission to His Majesty the King. It runs as follows: "The Newfoundland Teachers' Association in Convention hereby extend heartfelt congratulations on your coronation and sincerest pledges of loyalty and love to your Gracious Majesty."

A message was received from the Premier in London expressing regret for absence and assurances of sympathy and support. To this a suitable reply through their President was sent.

May Die of Burns.

By the Portia we learn that the fire at Mr. John Farrell's house, Marytown, completely destroyed it with all its contents. Mr. Farrell was away and at 11 o'clock on the night of the accident, Mrs. Farrell without undressing went to her room adjoining that where her 3 daughters slept and without undressing threw herself on the bed and fell first asleep. Before doing so she put the lighted lamp on a stand near the wall, it fired the paper and she awoke to find the house and her own clothing in flames. She rushed out and down the stairs and succeeded in quenching the fire burning up her apparel but not before all the hair on her head was burned off, and her face and arms were terribly scorched. Her children awoke after their mother had left the house, and the eldest daughter believing she was still in her room went in to search for her. Not finding her she ran out and joined her other sisters who had made their way down stairs. They were perfectly nude their night dresses having been burned off them, and two were badly burned about the face, hands and abdomen, but these will live. The eldest girl is so badly injured that Dr. Smith who attended all three fears she will not recover.

THE WHALE FISHERY.—By the Portia we learn that the Cabot has 22 whales, and the Lynx and Puma, operating at Rose au Rue, have 23 fish between them. The Hawk has 12 at Cape Broyle. The whaler Hump arrived here to-day to go on dock for a clean up. She has 22 fish.

KEEP MINARD'S LINIMENT IN THE HOUSE.

Here and There.

Ask for Stafford's Liniment and take no other.—July 6.11
