Cartridges, .380 APH (9 m/m Browning Short) rimless automatic standard metal cased or soft pointed, the same cartridge as is used in other American Automatic Pistols of this caliber.

233 BROADWAY, NEW YORK

British Coal Miners Strike Entered Upon.

Thousands of Operatives Idle--Industries Will Receive Setback--Deaths Enuein Belfast Rioting--Italian Anarchist Plot Discovered--Churchill Predicts Dire Consequences.

THE STRIKE ON.

LONDON, Oct. 17. Keep your heads and save coal, is the tenor of the comment over the week-end here on the coal strike. "No strike has ever been entered upon with less passion on either side. Obviously, the sincere efforts of the miners' leaders and of the Government to find a peaceable way out have misled the public mind that thinking that no strike was likely, but they have also kept the public mind serenely assured of their mutual good will. This good will may not last under pressure of the strike, but it is a great help that the strike is not being entered into an atmosphere of unreasonable anger." Indications point to efforts being sought towards mediation by third parties, but against this there is no disposition by either of the two principals, the miners and the Government, to re-open negotiations.

RESULT OF STRIKE.

LONDON, Oct. 17. The miners in Derbyshire and Nottinghamshire, ceased work at the end of their shifts to-day. Military leave was stopped in Portsmouth district. Some Iron and Steel works have already closed and twenty thousand men are idle. In Sheffield it is estimated eight thousand workers are idle at the end of the week. Ocean liners have been instructed to obtain coal abroad as much as possible, but advices from Liverpool say the hold up in shipping will be serious.

NEWFOUNDLAND SCHOONER IN DANGEROUS POSITION.

NORTH SYDNEY, Oct. 17. The schooner Catherine B., owned in Newfoundland and bound from Newfoundland to North Sydney, was driven ashore before midnight last night at McCullin's shore, near Sydney Mines. Three of the crew reached land safely after their boat capsized. Two others are still aboard, but in no danger. The schooner is gradually being driven on a sandy shore by a heavy gale and may be a total loss.

Two others are still aboard, but in no danger. The schooner is gradually being driven on a sandy shore by a heavy gale and may be a total loss.

ANOTHER BOLSHEVİK DIVISION SMASHED.

WARSAW, Oct. 17. The smashing of the sixth Bolshevik division by the Poles is reported officially. The Polish forces are extending their lines toward the boundary set by the armistice.

RIOTING IN BELFAST.

BELFAST, Oct. 17. Two deaths occurred to-day as a result of rioting in Marrowbone district of North Belfast Saturday night. The victims are Matthew MacMaster and William Mitchell, who succumbed to gunshot wounds. One man was killed outright during the rioting and several others were seriously injured.

HUNGER STRIKER DIES.

CORK, Oct. 17. The first death among the hunger strikers in Cork Jail occurred to-night. Fitzgerald died at ten o'clock, having fasted sixty-eight days. The condition of Fitzgerald and Murphy had become so grave to-day that with the consent of the other hunger strikers, prison doctors were permitted to give Fitzgerald medical treatment.

WILL ADOPT UNIFORM PASS-PORTS.

PARIS, Oct. 17. Delegates to the passport conference here unanimously agreed Saturday to recommend to the nations of the world two types of uniform passports, one type good for a single trip, and the other for regular use. It was pointed out by officials of the League of Nations, under the auspices of which the conference is being held, that inasmuch as the delegates at a

tendance were the passport and railway officials of their respective countries, the result of the conference probably would be adopted within the next few months. Uniform passports would replace the present passports of various countries and would be in two languages, the language of the country issuing the passport and in the French language.

ANARCHIST PLOT DISCOVERED.

MILAN, Oct. 17. A great anarchist plot has been discovered here, according to the newspaper Perseveranza. The arrest of the editorial staff of the Anarchist newspaper Umaita Nuova, effected Friday, is declared to have been its first move against the plot, which will be followed by other important arrests, including possibly that of Anarchist Enrico Malatesta, the paper's director.

CHURCHILL ON IRISH DANGER.

DUNDEE, Scotland, Oct. 17. Danger of embroilment with the United States if the North and South of Ireland were left to fight out their own differences, was predicted by Winston Churchill, Secretary for War, in his speech here last night in which he referred at length to the Irish situation. Churchill after asserting that such a course would lead to civil war "on such an organized scale that it would be disastrous and more terrible than could be imagined," declared that it would mean that in England sympathy would develop in favor of Ulster. Influential persons in the United States, he said sympathized with the South of Ireland and while volunteers would leave England for the North of Ireland, reinforcements would come from the United States for the South. That, added the War Secretary, would create such tension that Great Britain would be faced with the greatest danger it could be confronted with, namely a quarrel with the United States. "Two or three years more of what we are going through," he added "appears better to me than that we should leave Ireland to herself and thus open the flood gates of organized war and later embroil us with the United States."

ANOTHER NEWSPAPER SUCCEUMS.

WINNIPEG, Oct. 17. The Winnipeg Telegram on Saturday made the following announcement in its afternoon issue:—"With this issue the identity of the Winnipeg Telegram as such disappears. Its city and country subscribers will from this date receive the Winnipeg Tribune, which, under an agreement completed last Thursday, takes over the plant and equipment of the Telegram and its circulation lists as well. It is no secret that the war brought to newspaper publishing business in Canada some very serious problems. More recently the abnormal increase in the price of newsprint and indeed of nearly all material which enter into the production of newspapers has emphasized the wisdom of co-operation and has led to a number of other notable mergers and amalgamations."

BELGIAN HERO DIES.

BRUSSELS, Oct. 17. General Leman, defender of Liege against the German advance early in the war, died at Liege to-day from pneumonia. General Leman was Governor of Liege at the outbreak of the war. It was his gallant defense of the city from the German attack just as the drive through Belgium was in full swing, that held up the advance of the German troops for several days, a delay upon which the Imperial Staff had not counted and which told materially against the Germans in the campaign which ultimately resulted in their check at the Marne.

PASSES 66TH DAY.

LONDON, Oct. 17. Terence MacSwiney, Lord Mayor of Cork, passed the sixty-sixth day of his hunger strike in Brixton prison fairly well, says to-night's bulletin on the Lord Mayor's condition issued by the Irish Self-Determination League. His physical condition is one of ever increasing weakness, but his mind is clearer, keener and more active than ever.

The Colour of the Ocean.

WHY THE NORTH SEA IS GREEN AND THE RED SEA RED.

All profound and clear seas are more or less of a deep-blue colour; while, according to seamen, a green-colour indicates soundings. The bright blue of the Mediterranean, so often referred to by poets, is found all over the deep pure ocean, not only in the tropical and temperate zones, but also in the region of eternal frost. Scoresby speaks with enthusiasm of the splendid blue of the Greenland seas; and all along the great ice-barrier which, under 77 degrees lat., obstructed the progress of Sir James Ross towards the South Pole, that illustrious navigator found the waters of as deep a blue as in the classical Mediterranean. The North Sea is green, partly from its water not being so clear, and partly from its sandy bottom mixing with the essentially blue tint of the water. In the Bay of Loango the sea has the colour of blood, and Captain Tuckey discovered that this results from the reflection of the red ground soil.

'Another Milky Way.

But the essential colour of the sea undergoes much more frequent changes over large spaces from enormous masses of minute algae and countless hosts of small sea-worms floating or swimming on its surface. Remarkable as it may appear, in the neighbourhood of Callao the Pacific has an olive-green colour, owing to a greenish matter which is also found at the bottom of the sea, in a depth of eight hundred feet. In its natural state it has no smell; but when cast on the fire it emits the odour of burnt animal substances.

Near Cape Palmas, on the coast of

Guinea, Captain Tuckey's ship seemed to sail through milk, a phenomenon which was owing to an immense number of little white animals swimming on the surface, and concealing the natural tint of the water.

The Crystalline Caribbean.

The peculiar colouring of the Red Sea, from which it has derived its name, is due to the presence of a microscopic alga, floating on the surface of the sea, and even less remarkable for its beautiful red colour than for its prodigious fecundity. . . . The olive-green water which covers a considerable part of the Greenland Seas. . . . varies in position with the currents, often forming isolated stripes, and sometimes spreading over two or three degrees of latitude.

The crystalline clearness of the Caribbean Sea excited the admiration of Columbus, who, in the pursuit of his great discoveries, ever retained an open eye for the beauties of Nature. "In passing over these splendidly adorned grounds," says he, "where marine life shows itself in an endless variety of forms, the boat, suspended over the purest crystal, seems to float in the air. On the clear sandy bottom appear thousands of sea-stars, sea-urchins, molluscs, and fishes of a brilliancy of colour unknown in our temperate seas. Fiery red, intense blue, lively green, and golden yellow perpetually vary. The spectator floats over groves of sea-plants, corals, and sponges that afford no less delight to the eye, and are no less gently agitated by the heaving waters, than the most beautiful garden on earth when a gentle breeze passes through the waving boughs."—From an article in "Chambers's Journal."

No Kiss-Shortage That Night.

They had been walking out for some months, but as yet he had not screwed up his courage to the point of openly avowing his intentions. One dark night, however, as they strolled along, he gave a wild gasp, and muttered hoarsely: "Mary, Ah'm goin' to kiss ye at every stile twixt 'ere au' 'ome!" Mary was on the point of ascending a stile as he spoke, but she promptly jumped down again with blushing face. "Come on, then?" she said coyly. She turned her steps in a fresh direction, and the young man laid a trembling, restraining hand on her arm. "Wot are 'ee goin' that way for?" he asked. "'Tis a much longer way 'ome." "Aye, I know," said Mary, in determined tones, "but there be a sight more stiles!"

"He Who Laughs Last—"

The proprietors of two rival livery-stables, situated alongside each other in a busy street, have been having a lively advertising duel lately. The other week one of them stuck up on his office window a long strip of paper bearing the words: "Our horses need no whip to make them go."

This bit of sarcasm naturally caused some amusement at the expense of the rival proprietor, but in less than an hour he neatly turned the tables by pasting the following retort on his own window: "True. The wind blows them along!"

KEEP YOUR FEET DRY— Use "DRI-FOOT" OIL, the great Shoe Waterproof, only 15 and 25 cents a can, at PARKER & MONROE'S, LTD.—oct16,61

MEN WANTED NOW

at

Millertown and Badger

By

A.N.D. COMPANY, Ltd

For their Logging Operations.

Winter Wages Commencing November 1st, 1920

MILLERTOWN,
Good Lumbermen, - - \$3.80 Per Day
BADGER,
Good Lumbermen, - \$3.60 Per Day

Summer Rates of Wage as previously advertised remain in force until end of October.

Good Board will be supplied at the Company's Camps at \$28.00 per month.

This is the best winter wage ever offered in this country for this class of work.

Increased earnings mean increased prosperity.

Why seek employment elsewhere when such big earnings can be made in your own country.

We can guarantee good men a fall and winter's work at the above remunerative wages.

Under our sub-contracting system keen men can earn considerably higher wages cutting pulpwood by the cord. Plenty of opportunity for good men to make big earnings on this basis.

We shall endeavor to give one and all the utmost satisfaction.

Don't hesitate! Go to Badger or Millertown for your winter's employment. Take the first train.

A.N.D. CO., Ltd.
