climbing into my hair.

having votes."

"TELL ME ABOUT THE IRISH QUESTION,"

SAYS VISITOR FROM THE PLANET MARS---

I was leaning against a telegraph pole, idly cutting up some tobacco, when foreign-looking gentleman approached with the evident intention of speaking

to me. -I got three matches out of my vest pocket in readiness for his request. But he shook his head politely. "I need no matches, I thank you,—but as you

seem to have some time on your hands, I come to you for information. You see," he added in explanation, "I have just arrived from the Planet Mars-"

I made a magnificent leap to the lowest spike on the telegraph pole, and

from thence climbed rapidly to the top. The Man from Mars seated himself

on the other side of the crossbar without going through the formality of climb-

of course, I was dreaming—though I did not know it at the time.) I hastened to assure him that any information I had was at his disposal, and he said, want to know all about the Irish Question." I gasped. Should I start at the

The Man relieved my embarrassment. "Tell me why the Conservative papers in Canada are so aggressively hostile to Home Rule," he suggested. "I

have a vague idea that the Home Rule Bill is designed to give to Ireland what

Canada and all of her provinces already possess—autonomy."

Certainly," I said with a sigh of relief, "but the Opposition is on religious

rounds—the majority of the people in Ireland are Roman Catholics—and—"

"Yes," said the Man impatiently, "I know what they say. But if all the Roman Catholics are Home Rulers, and all the Protestants—"

A NIGGER SOMEWHERE.

the Bill was well received by all parties at first. Tell me this: Sir Edward

"You have just arrived from the Planet Mars-" I repeated, my eyebrows

stood upright, so did my hair; his remark startled me,

"Why, certainly," he said, smiling.

AWFUL NIGHTMARE OF LONDON CITIZEN

Landsdowne Avenue, Galt One of the Beauty Spots

THERE ARE NO SHORT CUTS TO PERFECTION FOR THE SINGER

work written for the voice is the great fundamental is why they are great. of all art, but apart from this there are several

must possess before he can ever hope to interpret a song in such a way that it will reach the emotions and in-

Granted that the singer is possessed of a sense of the beautiful, an appreciaion of the great and a well developed intellect, he must then acquire a vocal sechnique capable of giving expression to every shade of emotion which he recognizes in the work he intends to present. Without this, all interpretative efforts are futile.

No Short Cuts. In this speed age singers expect to ar-

rive at perfection by short cuts. They are med to disappointment. Every art has its drudgery. Every form of expression ealls for a technique that must be acquired by long and diligent study, none more so than music, and while the abor attached to the study of the vocal-Ist's art is not so wearisome as that of the instrumentalist, a greater degree of perfection is necessary. The voice is an infinitely more perfectly adjusted instrument than any contrivance made by hands and is capable of a far greater range of emotional expression. Therefore, in order to do justice to the possibilities of the human voice, a technique brought to the highest state of perfection is absolutely necessary. Technique and Temperament.

Technique is the handmaid of temperament. Temperament is the appreciation of those spiritual qualities, revealed by the composer, which find an echo in the soul of the singer, love, hatred, truth, deceit, tenderness, harshness, contentment, yearning, hope, despair, humor, fervor, with all their innumerable degrees and shades. The artist, therefore, who possesses the capacity for all these different emotions is truly wonderful. He is able to recognize at once, the spirit which prompted the writing of the composition, and in turn is able to deliver its message to his audience. The few truly great singers are of this kind. They have

The of true expression. few great expressionists who pass along The giving out of the earth now and again are the ones one's self is the who have a message for everybody. That

The assertion is often foolishly made that because an actor may be successful in interpreting some particular phase of requisites life drawn by the dramatist, he must which one singer have lived the part. No greater fallacy than this can be imagined. Because a man plays the villain well is no reason why he should be set down as a villain telligence of his hearers. In other words great and good, it was not make him and if a man adorns the part of a hero, the first thing necessary is the ability any less a scoundrel. It is the capacity

for the different emotions which is at the foundation of interpretative art, and the reason that a great actor may play both a good and a wicked part with equal success is not that he is either good or bad or both himself, but that he has the capacity for experiencing in his own soul the emotional qualities of the character which he at the time may be represent-

So it is with all reproductive artists and none more so than with singers. The capacity to feel, and the ability to do, are the two basic factors underlying all forms of expression, and on the degree in which these two faculties are present depends absolutely the greatness of

Athletics.

Galt has for many years shone as an athletic town, with football, lacrosse, baseball, hockey and, tennis votarles galore. The parks, of which there are eight, controlled by commissioners, make admirable playgrounds, Victoria Park, a gift of E. Langdon Wilks, is said to be one of the finest natural parks in the whole Dominion. Rowing, canoeing and golfing are other popular sports.

ENGINEERING WITH DAN CUPID

A sort of "marital malaria" seems to have seized upon the young engineers at work upon the great dam at Keokuk, Ia. Apparently they have captured all the marriageable women of the place, which shows that a knowledge of engineering is not a drawback to constructive enterprise in the domains of Cupid. A subscriber calls our attention to the following clipping from a popular weekly bear-

"In Keokuk, Ia., an enterprising firm of capitalists built a dam across the Mississippi River and set the peerless Daddy of American waters to work running the trolleys, lighting the streets and turning the washing machines in a hundred cities and towns. It was a tremendous job of work which involved the wiping out of farms and villages and railroads, the rearrangement of a hundred square miles of scenery.

"For one thing it brought great numers of young engineers to Keokuk. They had worked all over the world on water lowers, usually in spots well concealed civilization and well insulated from feminine charm. Then they came to the Keokuk job, where fifteen minutes from the roaring rapids were the homes of Iowa's finest families, full of young women ready and willing to admire the wild, free life of the engineer. The result was over a hundred weddings in wo years, and when the dam was completed and the young engineers moved on, they took with them the young women of Keokuk en masse.' In the interest of scientific accuracy we

have investigated the above story and are informed that the exact number of weddings celebrated in Keokuk traceable to the dam is 68, up to the present time. Evidently engineers are proficient enough in this branch of engineering work to need no instruction from technical jour We sincerely trust that in this important aspect of dam construction there may be no failures and no suits for dam

DAUGHTER OF CHINESE MINISTER WEARS HER NATIVE CLOTHES

Miss Lang Shah is proud of the fact that she obtained a part of her education in an American school. She is the eldest daughter of the new Chinese minister at Washington. She speaks English fluently and is thoroughly conversant with occidental customs, yet she wears native

clothes by choice.

HOW TO READ EFFICIENTLY?

During my first year in efficiency work along mechanical lines I collected every catalog, magazine and reference references to all my catalogs, magazines and scientific books, also to all own but had seen or knew contained information that I wanted, writes an efficiency expert in the current Amerian Machinist.

Before the end of the first year I found that reference to anything which did not possess was useless as I had no time to go to the library. On account of these troubles I hanged my scheme and the following method is now working satisfactorily:

1. A set of index cards contains references to all of my books in detail, this telling me just what book conains the information I want. 2. All magazine references are elim-inated from the index cards and the information is clipped from the magazine or catalog. If two articles conflict on opposite sides of the page, or if

the information is a very small part of the article, or if the article suggests something to me, then I make brief notes instead of clipping. 3. I take the clippings and notes on any one subject, compare them with one another, and with any previous ones on the same subject. The reliability must be considered and also a watch kept for contradictions and repetitions. After these points have been considered, the information is

made as clear and concise as possible

and typewritten for filing in a loose

leaf notebook with previous informa-My system has the following advantage which I have not seen in any other one system; it keeps up the quality and keeps down the quantity.

I look over all the new books, compare them with my present data on the index cards, in the file and note books before being. This eliminates useless repeition. I keep lists of the books I have examined. On one side are the books I want and on the other ones I do not want. These are in alphabetical order. I reduce all the valable data in the magazines to a handbook form with personal comments and suggestions. All repetion and contradiction are eliminated. In this shape is is ready for quick work.

feat of the miners. That's why you while the much heralded work at the chartered in 1792. WOMAN COMMISSIONER

of the earth 542,949,446 cubic yards. Think of it! When the engineers of the Panama Canal, in 1903, began their work, they made a careful survey and found that approximately 195,323,000 cubic yards of excavation was necessary. This was regarded as a stupendous undertaking and was commonly spoken of as the largest excavation job the world has ever seen. Laborers were imported to the Canal Zone, and column after col-

most expert engineers the world has ever seen. But the 195,323,000 cubic yards, the original estimate, were not all that the Panama Canal laborers were to dig after they had started. On account of the slides in Culebra cut; another hundred million cubic yards were to be added to their work. This made 295 .-323,000 cubic yards, which were dug in eleven years.

umn was written showing how marvel-

ously these laborers were "making the

dirt fly" under the direction of the

Under conditions far more difficult, the coal miners of West Virginia did that I could find. The catalogs were an amount of excavating in the same eleven years that made the digging ineleven years that made the digging inlogical order, and the index contained cident to the Panama Canal look like child's play. The work of these West Virginia miners has never been heraldmagazines or books which I did not ed to the world. The general public has paid little attention.

But the fact remains that the men who work underground in the mines of West Virginia have done a vastly bigger job in the digging line than the men who work in the open on the Panama Canal!

Kidneys Cured and Vitality Regained

Prominent Ontario Merchant Says He Is Enjoying "The Best Health I Ever Had" Thanks To "Fruit-a-tives."

B. A. KELLY, Esq.

HAGERSVILLE, ONT., Aug. 26th, 1918. "About two years ago, I found my health in a very bad state. My Kidneys ere not doing their work, and I was all run down in condition. I felt the need of some good remedy, and having seen "Fruit-a-tives" advertised, I decided to try them. Their effect I found more than satisfactory. Their action was mild and the result all that could be expected.

My kidneys resumed their normal action after I had taken upwards of a description boxes and I regained my old time vitality. Today I am as well as ever, the best health I ever had, and I unhesitatingly give you this letter and my photo for publication if you wish."

"The greatest kidney remedy in the world," is what thousands of people say about "Fruit-a-tives." And it is true. "Fruit-a-tives heals the kidneys, strengthens the kidneys, cures the kidneys, as nothing else will. All over Canada today, hundreds of people who were sick and suffering, are curing themselves of kidney and bladder troubles, Rheumatism and Lumbago by taking 'Fruit-atives," the famous medicine made from fruit juices.

"Fruit-a-tives is sold by dealers everywhere at 50c a box, 6 for \$2.50, trial size, 25c.—or will be sent on receipt of price by Fruit-a-tives Limited, Ottawa.

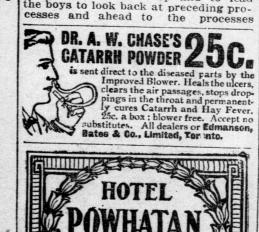

WHY FOREMEN ARE SCARE.

We often hear how difficult it is to find foremen of high quality for yarious shops. Apprenticeship is the remedy, but not until foremanship is unstood, not until the foreman is paid at least as much as an active pieceworker in the shop will this condition be remedied. Foreman-ship does not attract the best shop nen today, comments a writer in the American Machinist.

Someone asks what apprenticeship should be. The apprentice problem is very simple. For the shop it should be the old-time apprenticeship brought down to date, changed, and meet present conditions.

First is the training of the hand, eye and judgment in the shop by men who have no other duties. The course should be short, active and thorough to render the boys good, quick, accurate and intelligent workmen, and good Second is mental training coincident with the manual development. This means night schools or day schools conducted by men who understand the shops and who can show the boys how

to educate themselves. These schools are to unfold the reasons for every-thing done in the shop and to lead the boys to look back at preceding processes and ahead to the processes

havirous quarters may be secured, where charm and congenial atmosphere prevail, and where excellence of service is paramount, the Hotel Powhatan offers just such inducements. Rooms with detached bath may be obtained at \$1.50, \$2.00 and up. Rooms with private bath, \$2.50, \$3.00 and up. them to understand the materials, proesses and forces with which they are dealing and to conduct their work without waste of energy, of time, or

Third and most important is the personal responsibility over the boys centering in one man, the apprentice supervisor, whose duty is to know and understand them. He must know the boys intimately, thoroughly understanding their capabilities and their personalities. He must know them better than parents usually know their boys and be able to guide them in all the affairs of young manhood.
