WEDNESDAY MORNING, MAY 24, 1882

. We observe the 24th of May with considerable enthusiasm in this country—much more so than in England, where Victoria is he head of affairs and more than a name. While Canadians hold the queen in high admiration for her womanly, queenly qualcelebration of to-day must be traced to other causes than mere loyalty. We like holidays no matter in whose honor. We also like our
olimate, especially the midder part of it,
and the sentiment of to-day would in the
last analysis most likely resolve itself into
the old May day idea, a welcoming of warm,
sanny weather. The 24th of May clearly
marks the welcome change in our climate,
and the beginning of the summer business.

Even when the queen passes away we will
continue to celebrate a holiday about this
time of the year. Certain it is, when the
present Prince of Wales becomes the king,
and, his natal day in bleak November comes
regand, there will be no such rejoicings as
we hope will characterize to day.

the days of William Lyon Mackenzie until now. Somehow or other, the vote of counties, as such, is more susceptible of change than that of townships, in many cases. Without going very far back we have seen the votes of all the ridings of York, and Peel, and Ontario, changed from reform to tory. The time was when a tory's chances of being elected in any of these counties

Now, it may not be going very far wrong to argue that if gerrymandering, or "John-A-mandering," or almost anything else could awake these voters on old time issue, to a knowledge of the fact that these old issues are past and gone, and that we have now to deal with new issues altogether-it might not be wholly a bad thing for the country. More even than this may be said. This sticking to old issues and ignoring of new ones is mostly on the part of reformers. It was this disposition, on their part, which blinded them to the importance of the N. P., as it continues to blind some of them to the importance of the Chinese question, the labor question, the railway question, and other live issues and really burning questions of to-day. It is, therefore, reformers who stand most in need of being shaken up with regard to these matters.
Wherever Sir John has "hived" them together by hundreds, for the purpose of defeating their votes, they will surely begin to bethink themselves afresh as to what they are always voting for. They need "new light" on the subject very much, and Sir John's "hiving," scheme will bring it to the highest delicacy and quality. Cabinets and have most valuable improvements. 246

tenants at more per annum than the Dominion gets for the land in fee simple? The question does not appear superflous, by any means, when we look at what is going on. But what have they been doing in the States these many years? It is mentioned that congress has granted to seven corporations for the construction of railroads no less than 80,000 square miles of valuable land, a territory as large as the area of New England, New York, Pennsylvania, New Jersey and Maryland together, Of this amount there remain in round numbers over 82,500,000 acres, not yet earned, but claimed by the seven corporations and withheld from settlement. Are we to infer that landlords and landlordism are being established in the great republic, as well as in the Dominiou? Or is there some mistake about this, and is the whole business destined to take another turn, from causes incident to the air of territorial democracy which prevails in America. On both sides which prevails in America, on both sides

PAT CATTLE FOR ENGLAND.

It seems like uttering moral heresy to say that any good can come of gerrymandering constituencies in the interest of a party. Yet one way there is, in which ultimate good may come of present evil. There are in Ontario a considerable number of townships which have remained tory and reform respectively, from the town during the last ten years?

He replied more eloquently than in words, by blushing profusely, and asked if I was a stranger here. He evidently thought that no old resident ought to be misled by so conspicuous a sign. The only time we make up to the fact of being alive, wealthy and prosperous, is on reading some speech delivered by one of our belted knights at Ottawa, and copied into one of the four dayley papers here, from some Ontario paper, setting forth in glowing eloquence "the wealth, industry, contentment and loyalty, to be found among our friends down by the sea."

THE PROVINCIAL PRESS.

When I say copied from an Ontario paper do not imagine that our own journals are leading in editorial ability, that would be far from the truth, for I doubt if any town on this continent of equal population, possesses as much of it as St. John. The trouble is we are to provi much of it as St. John. The trouble is we are too poor in population to support so many dailies, and have them show any enterprise, and as a natural consequence have to be satisfied with the latest telegrams the largest ever attempted in Germany. A Real Count Working on the Railroad. (From the Albany Argus.)
There is no doubt that there is a real

count among the Italians now at work on this division of the West Shore railroad, near Tribes Hill, N. Y. He came with the gang that last arrived here, and, it is said, paid their fares from Italy to this country. The Italians wished to give him a separate apartment in their shanty, but he refused. He works with the rest. It is said that a love affair and a duel compelled him to leave his native country.

H. B., of Peterboro', insured his life 13 years ago for \$1,000, (the profits to be added to the policy) in a company still doing an active business in Canada, and whose name is found in our chart for the guidance of insurers entitled "TEN YEARS' RECORD." He has paid, in premiums, during the 13 years, \$328 28, and for his policy and the bonus additions thereto, he can now obtain from the company a paid-up policy—that is, a policy with no more premiums to pay upon it—of only.

\$250 00.

Difference in favour of dealing with an economical company, \$432 00 Which is More than 170 per cent.

Many people, who do not take the trouble to investigate, believe that all companies are about alike; and because all charge about the same premium, they absurdly imagine it is as well to insure with one as another, or with the office or the agent nearest their own door. There could be no greater mistake, as the above figures, from a thirteen years' experience, so clearly show. So long as intelligent business men allow themselves to be drawn into expensively managed companies, so long will there be a poor investment, instead of a good one, to most of the insured.
