

*Hadena albifusa*—5th June to August; common at rest, flowers and sugar.

——— *claviplena*—9th July; rare at sugar.

——— *xylinoides*—23rd May to June; common at rest and at sugar; a second brood in August, smaller in size.

*Dianthoccia meditata*—11th August; not rare at sugar and at rest.

*Mamestra arctica*—22nd June to August; swarming at rest, and at sugar and lime blooms; also at light; bred from warty larvæ found under stones in May.

——— *decastator*—24th June to September. By far the most common moth here; a perfect nuisance at sugar.

*Apamea jaspis*—30th May to July; common at rest and at sugar.

——— *finitima*—10th June; common at rest; rarely at sugar.

——— *mactata*—31st August to September; common at rest and sugar.

——— *modica*—7th July to September; very common at rest and sugar.

——— *reniformis*—31st July to September; not uncommon at sugar.

*Cleena herbimacula*—23rd June to October; seemingly a succession of broods; very common at sugar, light and rest.

——— *chalcedonia*—25th June; rare at sugar.

*Dipterygia pinastri*—14th June; not common at sugar and at rest.

*Xylophasia apamiformis*—16th June; frequent at sugar and at rest.

——— *sputator*—4th July to September; common at sugar and bred.

——— *dubitans*—12th July; rare; one specimen in spider's web.

——— *lignicolor*—27th June to August; common at sugar and lime blooms.

——— *verbascoides*—9th July; rare; one specimen at sugar.

——— *sectilis*—12th June to August; not uncommon at sugar and rest.

——— *cariosa*—6th July; rare; one specimen at rest.

*Cloantha ramosula*—18th May; rest hybernated; 1st September, fresh specimen at rest; rare.

——— *vomerina*—8th May; rare at Sallow Palms (*Salix caprea*).

*Phlogophora periculosa*—6th August; rare at sugar.

——— *iris*—9th June; rare at sugar.

*Euplexia lucipara*—2nd June to August; not common; at rest and sugar.

*Nephelodes violans*—1st September; common at light and sugar, but always in bad condition.

*Luceria loculata*—27th June; not uncommon at sugar.

*Hydracia lorca*—16th June to July; common at light, flowers and sugar.

——— *nictitans*—21st July to August; common at sugar; neither so variable nor so beautiful as European specimens.
