

Tested Concrete Construction

For warehouses, loft buildings, factories, and other structures where the requirements to be met are strength, simplicity, flat ceilings, fire resistance, etc., use

CORR-PLATE FLOORS

—A flat-slab construction that has been *tested thoroughly* by years of use and by loading tests on completed structures. Corr-Plate Floors are economical of material; they are accurately designed; they have a uniform factor of safety throughout; they can be erected quickly and at low cost.

Catalog and full particulars in response to request on business letterhead.
