## American Harrow Co.,

DETROIT, MICH.,

WINDSOR, ONT.,

MANUFACTURE

NEW AMERICAN AND GALE HARROWS,

SEEDERS AND BEAN HARVESTERS,

KING SULKY PLOWS.

### NEW AMERICAN CORN CULTIVATOR.

Send  
for  
Circulars  
and  
Prices.

**Patent Reversible Points and Thistle Teeth.**

**Patent Arch Lever.**

The wheels and axles are so arranged that the width of the machine can be adjusted to cultivate corn, beans, cotton, or any crop planted in rows any width apart. With the use of our Extension Axles, two rows of beans or other narrow row crops can be finished at once.

At a small expense we can furnish a set of points with the New American, made expressly for *Killing Thistles*. Each point laps over the point next to it so that the surface of the ground is completely cut over and no weeds or thistles left.

The NEW AMERICAN is the only Sectional Wheel Cultivator operated with one Lever.

The Sections can be locked down or allowed to float.

The only machine having our patent reversible points on the teeth.

It has the finest appearance and is the most complete sectional machine on the market.

We are anxious to have every farmer examine carefully the NEW AMERICAN HARROW, SEEDER, CORN CULTIVATOR and BEAN HARVESTER, and compare them with others. Above all, we desire to show their practical working in the field, being confident that the superior merits which we claim will be recognized.
