

TESTIMONIALS.

"We may almost dispense with giving an opinion of this work; for it has already reached "a new edition," and may, in consequence, be considered as having fairly won the approbation of the public. We therefore only add, that it has ours also, and that it contains much valuable information respecting the Canadas and the United States of America, in a plain, popular, and interesting form."—*Morning Advertiser*.

"This little book is the production of a practical man. In 1824, Mr. Pickering sailed from England to America, with a view to settle there, and in pursuance of that determination traversed the United States, and the British province of Canada. Thus, he has filled his book with observations "on the manners, soil, climate, and husbandry of the Americans." To those about to venture as settlers, we have no doubt the work will be found of the most essential service; whilst to the general reader it will prove highly interesting, from the simple and clear-headed style in which it is written. Mr. Pickering describes a cultivated spot,—a lake—the wilderness—a flock of wild turkeys—a log hut, &c. with a freshness and animation that will, at times, remind the reader of Mr. Cobbett."—*Ballot*.

"It is highly essential that emigrants should be informed upon those points which more particularly deserve their attention. The author of this little volume has furnished what may be called the Emigrant's Manual. He has concentrated, within a very limited compass, a great mass of useful information, gathered in the course of a personal tour through Canada and the United States. His observations on the manners, soil, climate, and husbandry of these countries, are particularly apposite. He has also appended a series of useful tables, giving estimates of outfit, charges of voyage, and travelling expenses. On the whole, persons who desire to emigrate, from whatever cause, cannot do better than make Mr. Pickering's work their *vade mecum*. They will find it highly useful—if not indispensable. The author's observations are full of good sense—and he appears to be a *practical* man."—*Edinburgh Evening Post*.

"This work should be read by every man who entertains an idea of emigrating."—*Courier*.

"Without exception one of the best books on emigration; it affords a striking illustration of the superiority of natural good sense and real knowledge over the ordinary resources of author-craft. Mr. Pickering has written a book because he has something to tell; not spun out a long narrative merely to make a book."—*Tatler*, April 24.

"A very interesting and well-written narrative has just been published, written by Mr. Joseph Pickering, which abounds in valuable information, it is entitled '*Inquiries of an Emigrant, being the narrative of an English Farmer, from the year 1824 to 1830, during which he traversed the United States and Canada, with a view to settle as an Emigrant.*' This book should be in the hands of all who think of emigrating, and it will be found very interesting, even to those who do not. Mr. Pickering's opinion of the superior advantages of Canada over the United States, and of the description of persons who may emigrate with the greatest advantage, is summed up in the following extract."—*Leeds Mercury*.
