England, Germany and the United States in the World's Markets.

ed States in the World's Markets.

Of the \$18,000,000,000 (£3,000,000,000) worth of commerce done by all nations, England's share is 18.3 per cent., Germany's 10.8 per cent., and \$9.7 per cent. falls to the United States. Germany has built up her foreign commerce at England's exuense, and the United States, which is just entering the field, is building up a great foreign trade at the expense of both. In Australia, in Africa, in South America, and in China the commercian representatives of each nation are fencing for vantage ground upon which to build safe markets for home industries. Formerly English buyers bought manufactured goods in Germany at ridiculously cheap prices. These goods were forwarded to great merchant houses in London to be resold in foreign markets. To-day these same goods, for the most part, are shipped from the district of manufacture direct to the buyer in foreign countries. The middleman's profits now go to enrich the German manufacturer and laborer. The following causes have contributed to Germany's success in competition with England:

1. German manufactured goods are cheaper, and, in some cases, better.

2. German merchants adapt themselves entirely 40 the wants of their customers. Industrial commissions have been sent out to South America, Mexico, China, Japan, South Africa, etc., to study and report upon the conditions of the people in these courters.

ditions of the February tries.

3. The German travelling men have a better technical knowledge of their branches, and are familiar with more languages than agents of other countries. They are active, resourceful, and sifted with tact, three essential country.—U. S. Consular Report.

Letters patent have been issued incorporating Jas. T. Gordon, and W. H. Fares, of Winnipeg, Robt. Ironsides, Robt. Bickerdike, M. L. A., and Duncan A. Campbell, of Montreal, under the name of The Dominion Transfer and Lighterage Company, for the transaction of a general business in live stock, dressed meats, grain, lumber and merchandise of every nature and kind and to carry on the business of common carriers.
