"These discourses are marked by vigour and learning. They are keen, forcible and eloquent in their style of treatment. It is evident that the author has read widely, and that he has made these subjects his earnest and painstaking study. He is fully prepared to hold his ground against any antagonist."—*Literary World*

"A valuable series of addresses, in which scientific objections to the truths and teachings of Christianity are scientifically dealt with. Dr. Sexton meets his opponents on their own ground, and proves himself singularly fitted for the task he has undertaken."—*Rock*.

"These books are masterpieces of Apologetics, deal with modern doubt in most of its forms, and deserve to rank among the classics on that subject. They are written in strong, terse, and often eloquent English."—*Methodist Recorder*.
