MUNICIPALITIES IN BATTLE FOR RIGHTS

(Continued From Page 1.)

Mr. McDougall said, in reply to Dr. Reid, that \$29,000,000 had been invested in the power plant at Niagara and the transmission line from Niagara to Toronto. The money came from the buying public of Great Britain, France, United States and Canada.

"Do you ask us to jeopardize that immense sum of money?" asked Mr. Boyd.

"We must still consider their interests," said Mr. Boyd.

Mr. G. H. Kilmer replied that the company was financed on the credit of the Toronto Railway Company. He claimed that all the poles the company used in Toronto were trespass poles because the contract was only for street lighting and this expired seven or eight years ago.

"Parliamentary Kilmer," has struggled for 20 years to protect municipalities against retailers of electric power in municipalities without their consent."

R. J. Fleming's Answer.

R. J. Fleming said, in answer to Mr. Carvell, that they would be willing to refer their case to the judgment of an independent tribunal for valuation.

Frank S. Cahill asked if the company claimed the right to enter the city of Ottawa. To this Mr. Fleming replied that they were so absolutely sick of unfair competition there was no danger of their coming to Ottawa. If an offer was made on a silver spoon they would not take it. Besides, it was a question if a dollar would be subscribed. All they wanted was to protect their shareholders. They did not want to become an Ontario company. Bad as things were now, they would be a thousand times worse then. The committee adjourned until May 14 to hear James Beck of New York.

Represents Toronto.

The city of Toronto was represented at the hearing by G. R. Geary, who represented at least 107 municipalities in every province of the Dominion and Prince Edward Island.

"The Dominion railway act," said Mr. Geary, "provided that no power company should use the highways of any municipality without the consent of that municipality. This provision, the company contended, it had a right to disobey, because its franchise so authorized it. What the municipality wanted was that this company, who had Dominion-wide powers, be clearly brought under the operation of the general railway act."

Harper, customs broker, 39 West Wellington street, corner Bay, Adelaide 4682

Canteen Engineers.

A reception, banquet and theatre party was given last night by the canteen of No. 2 Engineer Depot, Stanley Barracks. There were 150 present at the banquet, which was held at the Walker House, Hotel.

Capt. W. Boyd made a very efficient toast-master and a toast to the depot was responded to by Lieut.-Col. S. P. Figgis. This was followed by a toast to the sapper by Sapper J. McPherson.

The reception committee were: Sergt.-Major W. A. Lister, Major A. W. Hanson and Corp. B. W. Martin.

After the banquet those present proceeded to Loew's Theatre for a complete and pleasant evening's entertainment.

"TEST OF HONOR."

Mary Pickford's latest Artcraft picture, "Captain Kidd, Jr.," being shown at the Allen Theatre this week, is an adaptation of the play of the same name by Rida Johnson Young, which scored an enormous success upon the stage three years ago. It is literally packed with all the elements that go to make up ideal

Canada Appoints a Food Director.

Dr. J. W. Robertson to Set on Supreme Economic Council of Allies.

Ottawa, May 9.—The appointment of Dr. J. W. Robertson as Canadian director of food supply, a position that has been created at the request of the supreme economic council of the allied governments, was announced tonight in a statement given out by Hon. T. A. Crerar, minister of agriculture.

Dr. Robertson's duties will relate only to the sale of Canadian agricultural products in Europe. The statement, in part, is as follows:

"The food situation in Europe has been engaging the close attention of the supreme economic council which was created by the allies some time ago, to supervise the economic and particularly the food conditions in respect to relations with neutral and enemy countries. This council will have largely to do with the distribution of food supplies until conditions in Europe get back to a normal and stable basis."

In Position of Equality.

"Dr. Robertson has been asked, and has agreed, to accept this position, by which he becomes a member of the food section of the supreme economic council, and in the absence of Sir George Foster, may take his place as a member of the supreme economic council itself. This places Dr. Robertson in a position of equality with the other representatives of the allied countries in the food section of the economic council."

CANADA NOT TO BAR IMMIGRANTS FROM SOUTHEAST EUROPE

In Federal House, H. Cronyn Withdraws Contentious Amendment to Bill.

ANOTHER CHANGE

Government Adds Clause to Prevent Bringing Concealed Weapons Into Dominion.

Ottawa, May 9.—Hon. J. A. Calder's immigration bill was reported from committee in the commons tonight. Mr. Hume Cronyn's addition, which would have shut out immigrants from the southeastern portion of Europe for a period of five years, after some further discussion was withdrawn, the minister explaining that the officials of the immigration department had reported that the plan would be difficult to work out.

Some new additions proposed by the minister were adopted in committee before the bill was reported. One prevents the bringing into Canada of concealed weapons, and the other makes provision for officials representing direct to the minister, when an immigrant advocates the overthrow of constituted government by force.

During the earlier part of the sitting good headway was made in committee with the new bankruptcy act, but several of the more contentious clauses were left over for consideration at a later date. After headway had been made on a couple of minor government bills the house adjourned.

Shipping Program

Discussion of the government's shipping program was resumed this afternoon when the house went into committee on supply on the estimates of the department of marine and fisheries.

Referring to the government's contract for steel plates with the Dominion Steel Company, Mr. McKenzie, leader of the opposition, said that he hoped nothing would interfere with the advanced program of shipbuilding and the furnishing of the plates.

Hon. C. C. Ballantyne, minister of marine and fisheries, repeated his statement of last night that arrangements had been made with the company for modification of the price or cancellation of the contract. If the company were willing to give a more favorable price, the government was ready to carry on with the proposition. But if the company was not willing to modify the price, then it might be in the best interest of the country to cancel the contract. As yet the company had not imported any machinery. All that the company had done was to partially erect a building.

Mr. McKenzie, discussing a question of promoting shipbuilding in Canada, said he was "not a very high protectionist, but I can't help knowing that protection has done good for many industries in this country."

Later, Mr. McKenzie said: "While not a high protectionist, I am prepared to deal with facts and circumstances. This was greeted with applause, not only from his own side, but from very many of the government side, including the acting prime minister."

Hon. C. C. Ballantyne said that the government proposed to have ships on the Great Lakes so that its chain of transportation would be complete. When the United States shipbuilding program was complete, that country, he said, would have the enormous tonnage of 10,000,000 tons. If the United States thought it was wise to create such a large merchant marine, should Canada sit down and fold her arms? He thought that Canada would be able to compete with Great Britain and all other parts of the civilized world in shipbuilding.

Supports Ship Policy.

Col. W. F. Cockshutt supported the shipbuilding policy of the government. Canada, he said, had in the past been a maritime nation, and he failed to see why it should not again assume that place.

After some further discussion the item—one of \$30,000,000 for the government shipbuilding program—was passed. The house then went into committee on the bankruptcy bill beginning with clause 43, which was under discussion when last the act was considered. Good progress was made, but on the suggestion of Mr. W. J. Jacobs a number of contentious clauses were allowed to stand.

On the recommendation of Hon. T. A. Crerar, minister of agriculture, new regulations regarding operations in stock yards have been authorized by order-in-council. They cover construction and equipment, operation and maintenance of stock yards, and their purpose is to provide improved conditions in connection with the handling of stock.

New Stock Yard Rules.

The regulations governing construction and equipment provide that every stockyard must be so equipped as to afford adequate accommodation for the transaction of business with safety. No substantial alteration or addition shall be made to any stockyard until the approval of the minister has been obtained. Ample provision for the proper handling and feeding of live stock must be made including a supply of running water. Operation and maintenance regulations provide that live stock must be handled in such a way as to prevent injury or bruising. The proprietor shall see that no live stock suffers from want of food or water, while in his charge. In case of live stock, to be fed, for maintenance only, the proprietor shall supply the amount of feed prescribed by the live stock commissioner. Charges for feed and supplies for each calendar month, shall be determined by adding the wholesale market price for the preceding month a percentage plus a fixed charge for handling. The proprietor shall file with the minister, not later than the tenth day of each month, a statement of the average wholesale market price of feed and supplies during the preceding calendar month, and a
