

It Makes Pure Blood

We are often asked, Why does Hood's Sarsaparilla effect such wonderful cures of cases that seemed beyond the reach of medicine? An examination of our well-known formula, from which Hood's Sarsaparilla is and always has been carefully and scientifically prepared, confirms the fact that it contains those well-known and valuable medicinal ingredients, which, when intelligently combined and properly administered, are sure to bring about good results.

It is the properly balanced proportion, combination and process in combining those ingredients known to have specific action upon the blood, stomach, liver, kidneys and bowels, which make Hood's Sarsaparilla peculiar to itself and enable it to produce results unequalled by any similar medicine.

These ingredients are: for the blood, Sarsaparilla, Sillina, Yellow Dock; for the liver, Mandrake, Dandelion; for the kidneys, Uva Ursi, Juniper Berries, Pipsissewa; for the stomach, Gentian, Wild Cherry Bark, Bitter Orange Peel; for the bowels, Senna, Mandrake, Dandelion.

"I used Hood's Sarsaparilla as a blood purifier and the results were entirely satisfactory. Several of my friends use or have taken Hood's Sarsaparilla and all speak highly of it." Mrs. RACER, BROADWAY, 11 Murray St., Montreal, Que.

STEEL COMPANY PRESIDENT SAYS TRIP WAS SUCCESS

J. H. Plummer Left London For Canada To-day--He Says He Did what He went Over to Do

LONDON, March 28.—J. H. Plummer left London this morning and will return to Canada via New York. When seen just before leaving, he said: "I have achieved what I came over for. I needed a rest, in the first place, and then I have had consultations in connection with the privy council appeal which will likely be heard the first week in July.

"I have also had negotiations respecting shipping interests on the lakes. As regards the latter, I am coming back to England shortly to continue discussion.

"You ask me whether I am going back to enter upon negotiations with the Coal company, which so many kind friends seem to desire.

"I reply at once that I am returning only because my business here is finished. WE HAVE NO INTENTION OF APPROACHING THE COAL COMPANY.

"You call my attention to Byron E. Walker's suggestion that the case should not be submitted to arbitration. That suggestion, coming from that quarter, is somewhat surprising. Certainly, the Steel company will under no circumstances submit to arbitration the matter as to the quality of coal to be supplied by the Coal company in fulfillment of their contracts. That is a closed question.

"However, outside of that point there are many questions which the Steel company might not be unwilling to discuss before an impartial umpire."

Discussing another matter, Mr. Plummer said that inasmuch as the costs of steel manufacture were now appearing to be normal, he believed that Canadian steel interests would be in a position to get along successfully without the bounties when they expire. Mr. Plummer said that he believed in the principle of imperial preference, having regard for the fact that Canada must always be a larger importer.

C. P. R. WILL OPEN NEW SHORT LINE

Toronto, March 27.—The Canadian Pacific Railroad will open the Sudbury cut-off June 15, when a through service from Winnipeg to Toronto will be inaugurated and the old North Bay route will be abandoned. An effort will be made to clip eight hours off the present schedule.

SLICK THIEF STEALS AN EXPRESS MONEY PARCEL

Toronto, March 27.—A parcel containing one dollar bills was stolen from the Canadian Express Company at Collingwood while Agent Wright was engaged on other duties. Mr. Wright received the parcel from a train, and having signed for it, placed it on a truck while he attended to other matters. When he turned around he missed it.

GOVERNOR GUILD'S CONDITION

Boston, March 27.—Dr. Winslow at 10.30 p. m. sent out the following bulletin: "Governor Guild has had a good day. His improvement continues."

HEADACHE

When your head feels like to split, and a film comes over your eyes that blots out the things you look at, take Mother Seigel's Syrup. Your headache is due to biliousness with very likely constipation, and this great medicine cures both, because it restores stomach, liver and bowels to proper activity.

MOTHER Seigel's SYRUP

"I had pains that nearly took my breath away after every meal, and frequent headaches. I was nervous, weak and sorrowful, and became so disheartened that I often wished I was dead. But thanks to Mother Seigel's Syrup and Pills all that is gone, and I am gaining weight and strength daily." From Mr. James Bathelet, Grants Farm, Dundee, Que., July 11, 1907.

Biliousness

Price 60 cents per bottle. Sold every where. A. J. WHITE & CO., Montreal.

THE DEATH OF DISEASE

Wisdom is Killing Slowly, But Surely — A Glance Back Over Very Recent Years Shows Our Advance Against Him—What Has Been Accomplished Against Phthisis—The New Science of Prevention—The New Function of the Physician and the Whole Change in the Art of Medicine.

(C. W. Saleeby, M. D., in the London Chronicle).

The Extinction of Malta Fever was the title of a remarkable address delivered by Colonel Bruce, F. R. S., at the Royal Institution a few weeks ago. Some twenty years have passed since Colonel Bruce discovered the microbe of this scourge of the Mediterranean, but the discovery did not avail for its prevention or cure. Far too tardily, the government took up the matter, and an opportunity was afforded by Colonel Bruce and his helpers to go into the matter further. In the interval Colonel Bruce discovered the fly which conveys the germ of sleeping sickness. Was a fly to blame in this case also? Rigid experiment disproved this supposition. Infection by the air was disproved, and by contact.

Failing everything else, the Maltese goat was examined and found to harbor the germ. Goat's milk, a staple food of the island, was officially interdicted, and last year there were seven cases of the disease among our soldiers and none among our sailors in Malta. The disease, which has probably crept into the Mediterranean for untold ages, is potentially extinguished.

The recent history of malaria and of yellow fever must be known to the reader. Here a particular insect is involved, as in the case of sleeping sickness, conveying the germs of the disease from sick to sound. Wherever corresponding measures have been put in force, malaria and yellow fever have proportionately disappeared. None of the maladies mentioned intimately concern the fly which swarms in the northern island at the present day. Yet leprosy and plague and cholera and small-pox and typhus fever seem to be epidemic here; now all but the last are extinct, and they are on their very last legs.

Turn now to our chief disease, tuberculosis, especially in its form of consumption, the "great white plague," as Oliver Wendell Holmes has called it. The present writer and many others have endeavored to direct public attention repeatedly to the terrible scourge; and many people, discovering its existence, have thought it new—according to a familiar psychological law. It is doubtless as old as history, however. Some of us have ventured to predict that by the end of the present century tuberculosis will be stamped out of the earth. Public opinion has already been in this direction. The most deadly of all diseases known to mankind is slowly—but steadily—tending towards extinction in this country, as also, for instance, in Germany—though much faster there, since the German government does not need the aid of a public opinion to tell it that science is worth while.

The absolute extermination of the tubercle bacillus is not a chemical idea. As a matter of fact, it is not a chemical idea, as it is not a matter of fact. It is a matter of fact, as it is in the power of man to make all parasitic diseases disappear from the earth. Public opinion has only to give the word, and it will come day, and the foremost of all diseases, tuberculosis and malaria, will cease to be the limbo of history. We are only at the beginning, but that is the beginning of the end, and that end will be the extinction of all infectious diseases whatsoever. Already, we are in possession of knowledge, which, if applied, would transform the face of the earth, ameliorate beyond conception the conditions of human life, and well-nigh decimate the death-rate.

At present only one man in a hundred, it is said, reaches the age of sixty-five. The man or woman who dies at sixty-five, in general, "man is mortal," in a word, is observed. The lower animals die of murder or starvation, or old age; die of disease. But disease is capable of yield-

ALMOST GIVEN UP

"FRUIT-A-TIVES" SAVED HIS LIFE

Mr. Dingwall was Superintendent of St. Andrew's Sunday School in Williams town for nine years and License Commissioner for Glenegary—and Tax Collector for Charlottetown—for fourteen years continuously. Read out strongly Mr. Dingwall comes out in favor of "Fruit-a-tives."

Williamstown, Ont., April 25th, 1907.

I have much pleasure in testifying to the almost marvellous benefit I have derived from taking "Fruit-a-tives." I was a life long sufferer from Chronic Constipation and the only medicine I ever secured to do me any real good was "Fruit-a-tives." This medicine cured me when everything else failed. Also, last spring, I had a severe attack of bladder trouble with kidney trouble, and kidney trouble. This medicine is mild like fruit, is easy to take, but most effective in action.

Sgd JAMES DINGWALL.

"Fruit-a-tives" — or "Fruit Liver Tablets" are sold by dealers at 50c a box — 6 for \$2.50 — or will be sent on receipt of price. Fruit-a-tives Limited, Ottawa.

ing to the human intelligence; it is so yielding; and will so yield more rapidly and signally as the years proceed to offer us the fruit of the tree of life which Pasteur planted. The value of a fine piece of work like that of Colonel Bruce and his helpers is only partly to be estimated by saying that, for instance, it saved an aggregate of some 75,000 days of sickness among our forces in Malta alone last year. The real value—potential only, it is true, and dependent upon us for realization—of such work is or should be its educative value.

We want imagination. We will pay for hospitals; yet for one-tenth of the sum we so pay we could learn how to make most hospitals superfluous. It is natural to wish for concrete results; and since this is so, and since cure is always dramatic whilst prevention is rarely if ever so, we have philanthropists who will pay their ten or twelve thousand pounds a year for cure, whereas for a tithe of the sum they could prevent far more cases of disease not for one year but for all time coming. The man of science knows this, but he is not until the public hears and hears again and again of such cases as this latest will be obtained that he demands and is entitled to. The real business of the doctor everywhere and at all times is to keep people well, if they will let him, as at present they most assuredly will not.

"But what is to become of the general practitioner?" said a well-known medical peer from the last year, when I was holding forth on this favorite subject, and the answer was that one did not care a tubercle of disease of the general practitioner. The answer was approved for my interlocutor has given his life to the prevention of disease. No present general practice of all infectious diseases whatsoever, but he does not represent or remotely suggest the last state of the medical profession—and a very good job, too.

There is no nobler profession in the world, as one who does not belong to it is free to say, but its present conditions are not compatible with its greatest nobility, nor with its greatest utility, and they are happily impermanent. Whoso has the luck to have a son, need not hesitate about making a doctor of him; but let him be taught that his business

is not to make money, but to make and preserve life. Never before were there such opportunities in the profession apart from practice—such opportunities for work that does not destroy the soul, but keeps it alive. The medicine of the future will be what the medicine of the present, thanks to the chemist who sleeps in Paris, is fast becoming—preventive.

"A world without disease" will be the world into which our great grandchildren, say, are born. We can definitely hasten that day, when and as we please. "The republic has no need of chemists," they said, when they struck off the splendid head of Lavoisier. We have need of many chemists—there is even room for another such as Pasteur. But, most urgently, perhaps, we need someone, or many people, to teach us what the existing chemists and men of science in the medical profession are capable of accomplishing for us—we gave them half a chance—as may be inferred from what they are actually doing with the hundredth parts of chances now afforded them.

It is proposed, then, substantially to eliminate disease as a factor in human life. He would be foolish, indeed, who fancied that there will then be nothing of moment left to strive for. But as a proximate end it is valuable, it is possible, it is being attained. The chief record of this young century in this respect abundantly suffices to show that the nineteenth will not be called "the wonderful century" when its successor has run its course. Since we have not yet imagination enough to persuade us properly to support these great enterprises, we certainly have not enough to enable us to picture—say—England without consumption, pneumonia, typhoid, alcoholism, infant mortality. But that will be the England of some day, whose dawn the dimmest eye may already discern.

NOVA SCOTIA STEEL AND COAL COMPANY

Annual Meeting of Shareholders Held at New Glasgow on Wednesday

NEW GLASGOW, March 25.—The annual meeting of the shareholders of the Nova Scotia Steel and Coal company was held today, that of the Munro wire works having been held yesterday. Among those present were R. E. Harris, K. C., president of the Nova Scotia Steel and Coal company; J. Walter Allison, J. C. O'Mullin, M. C. Grant, R. V. Harris, John MacNab and George Stairs.

The address of President Harris

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.

We the undersigned have known F. J. Cheney for the last 15 years, and believe him to be perfectly reliable in all business transactions and financially able to carry out any obligations made by him.

WALDING, KINMAN & MARVIN, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists.

ANNIE OAKLEY

The World's Greatest Lady Rifle Shot USES AND RECOMMENDS NEWBRO'S HERPICIDE

THE ORIGINAL REMEDY THAT KILLS THE DANDRUFF GERM

"Travelling as I do continuously, I have been troubled a great deal with dandruff and falling hair, and until I tried Herpicide I never found a remedy that was satisfactory.

Herpicide is a delightful preparation that fulfills the claims made for it, and no lady's toilet is complete without it. I highly recommend it to my friends."

(Signed) ANNIE OAKLEY.

It is certainly significant that Miss Oakley, the celebrated rifle shot and theatrical star, who has travelled so extensively abroad, should choose Newbro's Herpicide as the MOST EFFICACIOUS toilet remedy for the scalp. No one will doubt her opportunity to choose the best, and those who have seen the natty and winsome Miss Oakley, will not doubt her power of discrimination in matters of this sort.

Newbro's Herpicide is a scientific germicide and prophylactic for the hair and scalp, it destroys the germ or microbe that causes dandruff, itching scalp and falling hair, after which the hair will grow as nature intended, except in cases of incurable baldness. Extraordinary results sometimes follow the continued use of Newbro's Herpicide.

If your hair is dull, brittle or lustreless, don't wait until it begins to fall, but save and beautify it with Newbro's Herpicide. In addition to its wonderful medicinal qualities, Newbro's Herpicide is the cleanest and most delightfully refreshing hair dressing available. The first application proves its goodness. TRY IT.

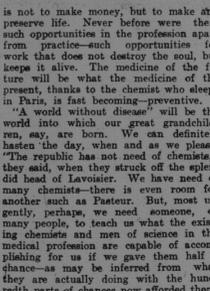

Herpicide Contains No Grease, it Will Not Stain or Dye Stops Itching of the Scalp Instantly.

Two Sizes, 50c. and \$1.00. At Drug Stores—Send 10 cents in stamps to The Herpicide Co., Dept. N., Detroit, Mich., for a Sample. Guaranteed Under the Food and Drugs Act, June 30, 1906. Serial No. 915.

Mr. Dingwall was Superintendent of St. Andrew's Sunday School in Williams town for nine years and License Commissioner for Glenegary—and Tax Collector for Charlottetown—for fourteen years continuously. Read out strongly Mr. Dingwall comes out in favor of "Fruit-a-tives."

London, March 28.—Lady Susan Yorke, only daughter of the Earl of Hardwicke, made her debut as a comedienne at the amateur theatricals arranged for charity by Mrs. William James. The theatricals which Mrs. James provides every year at Chichester are always a red-letter date in the social annals of Sussex, and this year the triple bill the West Dean party gave, was received with the greatest enthusiasm. The pieces chosen included "Hop-me-Thumb," Richard Pryor's clever little sketch, and "A Privy Council," a new comedy representing a lively scene in Peppys's life, by the same author in collaboration with Major Drury. Both as the laundry-maid "Amanda," and as "Mercer" in the latter play, Lady Susan Yorke displayed exceptional talent, by her high spirits, lively manners and unflinching resourcefulness delighting a large audience. Both Mrs. William and Mrs. Arthur James in "A Privy Council" were excellent in their respective parts of Mrs. Knipp and Mrs. Peppys. Other members of the cast were Mr. and Mrs. Harold Whitaker, Miss Gladys Hadow, Miss Millicent James, Mrs. "Willie" James's debutante daughter, Don Pedro de Zuleta and Mr. Hugh Brodie. Colonel Blythe distinguished himself as stage manager.

LORD HARDWICKE'S ONLY DAUGHTER A COMEDIENNE

London, March 28.—The Prince and Princess of Wales have gone to Cologne, where the Prince, during the course of his visit, will inspect the Prussian Hussar regiment, of which he is honorary colonel. After leaving Cologne the prince and princess will pay a visit to Darmstadt and Paris.

Eating Carelessly

frequently causes stomach troubles, but careful eating will never right them. When your stomach is out of condition, it needs help that no food can supply. It must be thoroughly cleaned, settled and strengthened. Food never does this.

BEECHAM'S PILLS

are the greatest stomach medicine human skill ever compounded. Don't attempt to cure your stomach by dieting. You will half starve and get little benefit. Give Beecham's Pills a chance and you will again know the pleasures of a sound digestion. Appetite will return and the stomach again work without any discomfort. The skin will clear, the face plump out, while people will remark "How well you're looking." These are facts, not fancies. Prove it yourself.

Prepared only by Thomas Beecham, St. Helena, Lancashire, England. Sold by all Druggists in Canada and U. S. America. In boxes 25 cents.
