Vancouver, May 15. This morning's session of the British Committed Methodist conference was largely devoted to the recep-

of his Tenomination. He paid a high tribute to Wesley. The moderator of the Presbyterian Synod and Rev. Mr. Wilson were introduced. In their speeches they expressed the hope that union would soon come. They were largely one in doctrine and practice, and the re-

sponsibilities in the great country demand Rev. Merton Smith, Congregational, spoke similarly.

A resolution reciprocating the expression the Presbyterians and Congregationals

was moved by Rev. Mr. Pescott and second-ed by Jos. Hall, and a resolution to the Bap-tists was moved by Rev. Mr. Adams and T. Rev. Dr. Rowe was introduced and made

a good speech.

Other routine work was done and some time was spent in committee. Special attention is to be given to Indian work on and estimates are already prepared. the Naas and Cowichan. At the latter place it is proposed to establish a boarding school.

The service at Wesley church last night was a fine affair, with a powerful sermon by Dr. Sutherland.

PROPERTY AND AND STORY We Offer \$1,000

For a Disease Germ That Liquozone Can't Kill.

On every bottle of Liquozone we ofter \$1,000 for a disease germ that it cannot kill. We do this to assure you that Liquozone does kill germs.

And it is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact which gives Liquozone its worth to humanity; a worth so great that, after testing the product for two years, through physicians and hospitals, we paid \$100,000 for the American rights. And we have spent over one million dolars, in one year, to buy the first bottle and give it free to each sick one who would try it.

and Liquozone—like an excess of oxygen—is deadly to vegetal matter.

Liquozone goes into the stomach, into the blood, to go wherever the blood goes. No germ can escape it and none can resist it. The results are inevitable, for a germ disease must end when the germs are killed. Then Liquozone, and incorporate health. Diseases which have resisted medicine for years yield at once to Liquozone, and hospitals, we paid \$100,000 for the American rights. And we have spent over one million dolars, in one year, to buy the first bottle and give it free to each sick one who would try it. who would try it.

Acts Like Oxygen.

Liquozone is not made by compounding drugs, nor is there any aloothol in it. Its virtues are derived solety from gas—largely or gen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical Ashma Abscess—Anamia Kidney Diseases

It is the intention of the company to erect pulp and paper mills just above the falls on the river. There is at least 20,000 h. p. available, and the location is but 600 yards from high water mark. The harbor is also excellent. There will be an ultimate expenditure of \$750,000, and the plant is expected to start with a and the plant is expected to start with a capacity of about 100 tons daily. What makes the prospects of the company all the more promising is that the product of the mills has practically been sold

for the next ten years.

Considerable preliminary work has been done. All surveys of the limits have been made, a topographical survey of the mill site has been completed, and a contour survey carried out. Drawings of the proposed buildings, specifications It is reported that as soon as opera

tions commence in construction, between 500 and 1,000 men will be employed. The establishment of pulp industries means a more complete utilization of the timber resources of the province. Here-tofore it has been the custom, in fact the necessity, to leave small timber on the limits to the operations in getting out logs for sawmills. All this waste may be used in pulp mills, and while the sawmills take the fir and cedar, the small growths of spruce and baisan may go to make paper. Experts who have compared British Columbia pulp timber with that grown in Norway and Sweden, which has been the great source ot supply in the past, state that it is

fully equal to the best.
In purchasing at £165,000 the new company pays £15,000 in cash and £150. 000 in fully paid up ordinary shares. Spicer Bros., Ltd., of London, have agreed to act as agents of the company for the sale of paper and pulp for a period of ten years. The company have reserved, however, to themselves the selling of their products in the markets of the North American Pacific coast down to and including California. The company has also entered into a con-tract with Edward Lloyd, Ltd., of London, for the sale for five years of 10,400 tons per annum of "news" paper at satisfactory prices. Messrs.
