STRANGEST

In the History of Railroading.

One Train Thrown From the Track by the Explosion of the Locomotive of Another Train.

UTICA, N. Y., Feb. 4. - One of the strangest wrecks in the history of railroading in this section occurred at Whitesboxo, three miles west of this city at an early hour this morning. Train 23, the western express, was drawn by air engine known as "of the As this engine was passing 21, the Buffalo express west-bound, the engine exploded. The full force of the explosion was felt in the cond car of the eastbound train, as the westbound engine was directly opposite that car when the explosion oc curred. Both trains were running at what may be called full speed, and from the effects of the explosion and the upheaval of the wrecked engine and the car which was opposite at that moment, the coaches were thrown from the tracks in both directions. Both trains were well filled with passengers and the westbound train is known as one of the best trains on the road for sleeping car passengers.

It was supposed that a score or more of lives had been lost and that twice that number of people had been severecue had gone forward through the early hours of the morning and the wreck was examined as carefully as possible in the daylight of a morning on which the mercury registered 15 degrees be-low zero, it was found that not a sinpassenger had been killed, that there was possibly no injured passengers who would die, and that the

aded were really very few. Two men were killed, the engineer and fireman on the westbound locomotive, the one on which the explosion occurred. As they were the only men on the locomotive there will never be explanation as to the cause of the osion, if indeed they knew. The ead are: John Allan, engineer of the dead are: John Allean, on Albany, and John Brennan, fireman of the westbound

UTICA, N. Y., Feb. 4.-The westbound train did not leave the rails. The noise of the explosion on the westund engine awakened nearby res ients, who assisted in relieving the imprisoned passengers. Sleighs were cured and several of the injured were taken to the Whitesboro sanitar ium. One of the last to be taken from a Puliman car was Justice Warrer Heoker, who was severely bruised and who was found wedged in between

Judge Hooker said to a representaof the Associated Press that he had been thrown with great force from his berth and found himself lying across the woodwork of the opposite compartment. Not until assist ance came was the judge able to leave the car, which was resting on its right side, with its rear end splintered.

The arrival of a relief train from Utica hastened the work of complete examination of the overturned cars. Some of the injured were taken back to Utica at once. Soon afterwards a special train was

made up, and the west-bound passengers were carried on to Buffalo.

AN INTERESTING COW CENSUS

Figures From Canadian Herds-Some Striking Contrasts.

At the Eastern Ontario Dairymen's Convention C. F. Whitley of the dairy missioner's branch, Ottawa, gave a very interesting account of a cow cenwhich he conducted in the vicinity of Cowansville, Que., during the sum mer of 1904. Under his supervision seventy-two farmers kept daily milk records of their cows and three times month took samples for testing from the milk of each individual cow in their dairies. In this way reasonably accurate figures were obtained. For the month of June the general

average of all the herds tested was 652 pounds of milk, yielding 25 pounds of fat. In one case twenty-two cows had a yield for the month of 17,845 pounds of milk and 722,25 pounds of fat, an average per cow of 811 pounds of milk and 32.4 pounds of fat. In anther herd of eleven cows, every animal was below the general average, the range being as low as 280 pounds to 805 pounds of milk per cow, and this herd consisted of Jersey, Guernsey, Ayrshire and Holstein grades and natives. In contrast to this, another herd of twelve cows of similar breeding yielded from 830 to 1,115 pounds per now, so that the flow of milk depends upon the individuality of the cows even ore than upon their breeding.

In the month of July a herd of wenty-seven cows, Jersey, Ayrshire, Moistein and Shorthorn grades, gave 3,760 pounds of milk and 473.7 pounds an average of 509 pounds of milk and 17.5 pounds of fat per cow. This was typical of several herds consisting of mixed grades. The average record per cow is poor, noticeably below the average of the whole 1,120 cows The best showing was made by a Holstein grade, whose record is more than double that of the poorest This dairy had five more cows than that first mentioned, and yet prouced 4,000 pounds less in the month. nother July record showed that one pera of six cows gave 2,515 pounds of ilk, while another dairy of twelve cows gave 8,020 pounds; twice as many milk. In September one lot of twentythree cows gave 8,120 pounds of milk, another lot of twenty-three yielded 11,200 pounds. These records emphathe need of knowing definitely the and a most enjoyable time was report-roduction of each individual cow. ed by all who attended. roduction of each individual cow.

farming. With forethought and figures, the production of butter in the average farm herd can be increased at least 40 lbs. per year in five years. It has been done scores of times. It is safe to say almost every farmer milking twenty cows has three on which he loses money. Until he keeps re-cords he cannot tell which they are. It will pay him to find out,

The wide variation in the total yields of butter by individual animals in the same herd is even more apparent in the records for longer periods. For fourteen varied from 40 to 114 lbs., the best cow vielding nearly three times as much as the pocrest. The average for the herd was \$1 lbs. per cow, while the general average of all the cow tested for four months was 98 lbs Would not this man be better off if he disposed of at least four cows? Another herd varied from 51 to 127 lbs. per cow, with an awerage below the census average. It is probable that both men think they have pretty good cows.

For a period of five months one dairy made the creditable showing of 190 lbs. of butter per cow, more than double the average of some other herds, and well above the census av erage of 115 lbs. per cow for five months. Indeed, every one of the twelve cows in this herd exceeded general average, ranging from 147 to 151 lbs. These figures are encouraging. This man's record can be, and should be, equalled on a thousand farms in the next five years. Such results are obtained by using the scales and Babcock tester to detect the robber cow and get rid of her Then, by the use of a good dairy-bre 6,000 lbs. of milk and 250 lbs. of butter per cow annually, a good herd can speedily be graded up. There are hundreds of dairy farmers who have thus raised the butter production of their herds in a few years from 150 to 175 lbs. to 300 lbs. per annum.

MAN MISSING.

Left Marysville for Fredericton --- Police Searching.

News of Rey. Mr. de Soyres Death Heard With Regret at the Capital-U. N. B. Conversaz-

lone Feb. 15th.

FREDERICTON, N. B., Feb. 4.-Young Stevens of Marysville, has been alssing since last Monday and anxiety is felt as to his whereabouts. On that day he started for this city to visit a dentist and has not been heard of since. He is a young man 24 years old and came to this city some time ago among the English immigrants, but lately has been employed at Marys-The police are trying to locate him, but so far without success

Word has been received of the death at Los Angeles of Sterling A. Dunphy, only son of Frederick Dunphy, of Keswick. The deceased, who was twentyseven years old, had been in California some seven years. He leaves besides a father six married sisters.

The curlers have arranged to play the St. Stephen club here on Wednesday next and on the following day Chatham is expected to meet the local men. The news of the death of the Rev. John de Soyres was heard here this morning with profound regret. The quent visitor to the capital and his ac-

uaintances were many. The appeal case of the Cushing Sul-phite Fibre Co. v. George A. Cushing occupied the supreme court the entire day and the argument will probably extend over two or three days more. The plaintiffs, who are represented by Messrs. Powell and Teed, are appealing from the decision of Judge Barker, judge in equity, and the appeal is opposed on behalf of the defendants by the firm of John T. Ives of Pictou, and the attorney general, L. A. Curry and

> The university conversazione booked to take place on Feb. 15th. About one thousand invitations have been issued. G. B. Whitehead is chairman and D. K. Hazen secretary of the committee in charge. The following ladies will act as chaperones Mrs. Harrison, Mrs. Bailey, Mrs. Scott and Mrs. Jack

> The case of Baird and Peters of St. John, against the York Agricultural Society, is to be tried here on Thursday next in the equity court before Justice Barker. The action is the outcome of a dispute over a medal which Baird and Peters claim was awarded them at the last Fredericton exhibition.

The marriage of Herbert McDonald Chatham, and Miss Maud Lounsbury of this city, is announced for Thursday next at the residence of the bride's mother

Guy C. Dunn of the G. T. P. survey, has leased the house on George street owned by Henry B. Clarke, and at present occupied by Alfred Seely.

PLAY ON SUNDAY.

Preacher Would Have Working Boys Take Healthy Exercise on Lord's

SCRANTON, Penn., Feb. 5.-In a sermon on "Child Labor" at St. Peter's Cathedral today, the Right Rev. M. J. Hoban, Bishop of Scranton, came out unequivocally for permitting working boys to play athletic games on Sunday.

After picturing the hardships many of the boys or this community are put to in the mines and mills, day and night, six days a week, he criticized those who protest against them enjoying the Sabbath in harmless recreations, and added:

"I say let them play base ball, or football, or any other kind of ball to their hearts' content. The good Lord will be pleased to see them do it, I aver, providing they are good boys."

HECTOR McMILLAN DEAD.

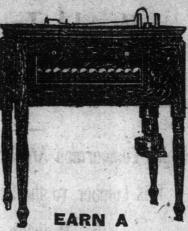

Government Engineer at Charlottetown Was Well Known

CHARLOTTETOWN, P. E. I., Feb. 5. -The sudden death took place tonight of Hector McMillan, government en-gineer. The deceased had been in good health up to the time of his death. He lay down after tea and in a few minutes passed away. The deceased was father of Professor Cyrus J. McMillan, late of Prince of Waler College, and now studying in Harvard, and James McMillan, secretary to the water commissioners of Charlottetown. Both are prominent athletes and well known throughout the provinces.

ST. CROIX MAN.

George Eales Found Dead Near Railroad Track.

VANCEBORO, Me., Feb. 5.-Portion of the body of George Eales of St. men early today scattered along the tor, Kaisen, for Jamaica and Cuban tracks of the Canadian Pacific railway ports. between Vanceboro and MeAdam Junction near the state line. It was supposed Bales was riding on a freight train to his home and either went to sleep or became benumbed from the intense cold and slipped beneath the fax, from Boston via Bermuda, (on a trucks. He was 22 years of age and West Indian cruise.) the son of Frank Eales of St. Croix,

Comfortable Living **Chatham Incubator**

Poultry raising with a Chatham Incubator is a very profitable and easily managed occupation. Unless you want to go into it extensively it need take but very little of your time. Government reports show that the demand for chickens in Canada is greatly in excess of the supply and Great Britain is always clamoring for more. That means a steady warket and good prices for chickens
You cannot raise chickens success fully with a setting hen. She is wasting time setting when she should be laying. While she is hatching and brooding a few chickens she could be laying five or six dozen eggs. The percentage of chickens she hatches is much less than that produced by the Chatham Incubator. It will pay you to own a Chathan

Incubator.
Chatham Incubators contain every improvement of importance in Incubator construction that has been produced. duced. They are made of thoroughly seasoned wood, with two walls, case within case. Between these walls mineral wool is packed forming the very best insulation. Each piece of the case is mortised and grooved and screwed, making the whole as solid as a rock. Chatham Incubators are equipped with scientifically perfect regulators which are an infallible means of regulating the temperature.

No cash to pay until October, 1905.

We will start you raising poultry for profit with a Chatham Incubator without one cent of money from you until next Fall. That means that you can take off seven or eight hatches and make considerable money out of the Incubator before the first payment we couldn't make this offer if we

were not certain that if you accept it you will get complete satisfaction, if we were not positive that the Chatham Incubator will pay you a handsome This is a straightforward offer. We

make it to show our supreme confidence in the Chatham Incubator. We want you to accept this offer as we are sure of the satisfaction our Incuare sure of the satisfaction our Incubator will give. Every machine we have put out so far has made other sales in the same neighborhood.

Dur offer is to send you a Chatham Inoubator at once, freight prepaid by us without one eent of cash from you. You make your first payment in October, 1906. The balance to be paid in October, 1906, or if a Cash Buyer you get it sheeper. Could any offer

you get it cheaper. Could any offer be fairer or more generous? SMITH FALLS, ONT., November 19th,
The incubator and Brooder that I bought from agent, on time, I wish now to pay the whole am
this fall, if you will give me a discount. I am
much pleased with both Incubator and Brooder,
would not be without them, because I cleared
season, more than the incubator and Brooder cost
Your respectfully.

MRS. W. HYSLOP. Write us to-day for full particulars of our offer and mention this paper this special proposition may be with-
