

CHAPTER XXV.

THE NERVOUS SYSTEM.

General Nature and Structure of the Nervous System in Different Groups of Animals—Fundamental Elements of the Reflex Arc—Integration of the Nervous System .....	239
--	-----

CHAPTER XXVI.

THE NERVOUS SYSTEM.

Reflex Action—The Nerve Structures Involved in the Reflexes of the Higher Animals—The Receptors of Pain, Touch, Temperature—Local Anesthesia and Analgesia—The Afferent Fiber—Choice of Paths on Entering Spinal Cord—The Nerve Center—The Efferent Neurone—Types of Reflexes—Spinal Shock—The Essential Characteristics of Reflex Action—Muscular Tone and Reciprocal Action of Muscles—Symptoms Due to Lesions Affecting the Reflexes .....	244
---	-----

CHAPTER XXVII.

THE NERVOUS SYSTEM.

The Brain Stem—The General Course and Functions of the Cranial Nerves, Particularly of the Fifth and Seventh—Relationship of the Fifth Nerve to the Teeth and to Neuralgia—Referred Pain Through this Nerve—Sensitiveness of the Tooth—Trifacial Neuralgia—Relationship of the Seventh Nerve to Bell's Paralysis .....	256
--	-----

CHAPTER XXVIII.

THE NERVOUS SYSTEM: THE BRAIN.

Influence of the Brain on the Reflex Functions of the Spinal Cord—Functions of the Cerebrum—Cerebral Localization—Experimental and Clinical Observations—The Sensory Centers—The Mental Process—Aphasia—The Cerebellum—Relationship to Body Equilibrium—The Semicircular Canals—The Sympathetic Nervous System—General Characteristics—The Course of Some of the Most Important Pathways .....	267
--	-----
