

The present war has made unusual demands from the farmer. In some respects he is in the happy position of being able to produce that for which all nations are clamoring, namely food products, but at the same time a responsibility has been thrust upon him that he cannot, and must not shirk. It is up to every farmer to produce every bushel of grain that it is possible for him to raise, firstly because his country needs it, and secondly because it is profitable to him to do so.

No farmer ever expected to see \$3.00 wheat, and while \$3.00 or even \$2.50 a bushel is not a peacetime price, as determined by law of supply and demand, it is fair to assume that it will be a long while before wheat again goes below \$1.00 per bushel, and other grain crops in proportion.

In the old days, the saving of grain was a laborious task. The farmer's little hoard was gathered together kernel by kernel, and the chief implement that was used, if such it might be called, was the human hand. To-day, however, we farm by machinery, the tractor plow, the drill, the harrow, the self binder, the sheaf loader, the modern grain thrasher, and last, but by no means least there comes to us a grain saving device that puts a finishing touch upon the final task of handling the farmer's grain crop.

The farmer has been all too prone to save at the bung and to waste at the spigot as it were. He gathered his grain carefully, carried it to the threshing machine, threshed it and then burned the straw pile without ever stopping to realize how much grain there was in that straw that should have been in the bin.

The Modern Grain Saving Windstacker was designed to overcome this difficulty, and it is doing it. When the Kansas State Board of Agriculture, the Agricultural College at Perdue, Ind., the Agricultural College of Minnesota and other institutions will take hold of and endorse an implement you can rest assured there is something doing.

When wheat is selling at one dollar per bushel there is perhaps not so much of an object in saving every kernel, but when wheat is selling well over \$2.00 per bushel, there is every reason why every kernel that is grown should be threshed. It is quite reasonable to assume that if grain saving windstackers were placed upon every threshing outfit in Western Canada that at least 3,000,000 bushels of wheat could be saved, which at \$2.00 per bushel is \$6,000,000. Supposing the farmers of Western Canada were to save this grain and donate it to our returned soldiers, wouldn't it be a glorious contribution?

Help to Solve Percy's Perplexing Problem

MARY'S letter is surely a puzzler. She has so mixed up the letters in the names of things she would like Percy to give her for her birthday gift that they spell something different entirely. Sometimes she has even made two or three words out of one name, as in number nine, which undoubtedly is "Diamond Ring."

Each of the names in Mary's letter represents a present that any girl would like to receive for her birthday. You know one of them; now try to solve the remaining names, and when you do, re-write Mary's letter, substituting what you consider the correct names and send your solution to us. In this interesting contest we offer

A 1917 Ford Touring Car (value \$495.00) as Added Grand Prize and \$510.00 in Cash Prizes

PERCY'S PLAN WILL HELP YOU

THE first thing Percy did was to walk through the stores and make a list of all the things that would make nice presents for a girl, so that he could compare his lists with Mary's and see how many names would fit the puzzling words. He was surprised to find the number of nice things one could get for a girl for very soon his list contained the following: Sewing set, umbrella, wrist watch, silk waist, manicure set, jewel case, kid gloves, lace handkerchiefs, napkin ring, earrings, silver thimble, diamond ring, candy, photo frame, necktie, books, bracelet, slippers, card case, travelling bag, pin, brooch, shawl, toilet set, perfume, flowers, set of furs, lace collar, etc., etc. These suggested presents may help you. Get a pencil and paper and try!

How to Send Your Answers

USE one side of the paper only in writing out Mary's letter and keep it the same in form as given above, merely substituting your solution of the proper names in place of the jumbled ones. In the lower left hand corner instead of the postscript put your full name, address, Mr., Mrs., and your full address. Anything else must be written on a separate sheet of paper. Do not send fancy, drawn or typewritten answers. A contestant may send as many as three sets of answers to the puzzle but only one set may win a prize, and not more than one prize will be awarded in any family. Entry to the contest is barred to all employees of this Company and its subsidiaries.

No Expense is Attached to This Great Contest—Any One Can Win a Fine Prize

1917 Five Passenger Ford Touring Car, Value \$495.00

The Contest Editor, EVERYWOMAN'S WORLD, CONTINENTAL PUBLISHING CO., LTD., 226 Continental Bldg., Toronto, Ont.

\$6,000,000 would go a long way towards placing these men in comfortable positions where they would cease to be a burden to themselves and a charge upon the community. Wouldn't it be a good thing, a glorious thing, not to say a patriotic thing if every farmer who owned a threshing outfit were to equip it with a grain saving windstacker, and donate this extra amount saved to the above cause. He could

then turn what would otherwise be wasted into a benefit fund of great value.

Think it over and investigate.

The "New Favorite" Thresher

On another page will be found particulars of still another development in the Thresher world. This is a new grain separator which was formerly manufactured by the "Filshie" Company and

with several important improvements is now being manufactured and marketed by the "Favorite Thresher and Supply Co., Ltd." of Winnipeg.

This is a strong company of practical men, who have an accumulated record of many years in making or in operating threshing machinery and we cordially recommend their announcement to the serious perusal of our readers.
