Brydges, Blakemore & Cameron, Ltd.

KOOTENAY FRUIT LANDS

I am developing an excellent tract of Fruit Land. I need some help and make this offer:

I will sell 10 acres at \$100 per acre. I will accept \$250 cash and allow purchaser to pay for balance by working on my land, for which I will allow him \$3.00 for every ten hour day he works, said payments to apply on reduction of payments on land.

Purchaser must give me at least half of his time. He may devote other half improving his own land, or may give whole time on my land and thus get his own more quickly paid for.

This is an excellent chance for the man of little means, who cannot see how he is going to meet his future payments on land purchased on terms.

This offer is limited to a small number—prompt action is necessary to secure this chance.

Correspondence invited.

This cut shows an up-to-date Barn Construction, 40 feet x 70 feet, and the method of covering with Corrugated Sheets. The framework is light, as the corrugated sheets, when nailed in place, make the building very rigid. This drawing is made from actual plans and the barn has been built many times with splendid results.

The saving of wood sheathing, as compared with the ordinary barn construction, will cover the difference in cost between wooden shingles and our "Acorn Quality" Corrugated Galvanized Sheets.

This galvanized covering protects your building from lightning, prevents fires from the outside, is easily and cheaply applied, and OUTLASTS A GENERATION.

Do not make a mistake and put up an old style barn, when you can secure a better and more durable construction for less money.

See the page of barn illustrations in our new catalogue, and write for our book of testimonials with list of users.
