Haig Brass-trimmed  
Harness

In our statements concerning the superior quality of this harness we have indicated the usual "Gall" found in most mail order catalogues. By faithful picture and description we endeavor to show the true worth of this excellent harness. In the manufacture of harness three main things are found which determine real value—quality of leather, the amount of skilled labor employed, and the kind and quality of trimmings. In making this harness only the Best Quality Oak-Tanned Leather is used, a sufficient amount of skilled labor is employed to make a first-class job, and the trimmings are carefully chosen. This, combined with design and up-to-date construction, makes a harness that will satisfy the most exacting. OUR PRICE IS POSSIBLE ONLY BECAUSE WE HAVE OBTAINED DELIVERY OF A QUANTITY OF LEATHER CONTRACTED FOR AT 1915 PRICES. We have only about 50 sets, and urge you to order early if you want one or more. There's money and pleasure  
in raising chicks

The Canada Food Board is asking everybody who can, to raise more chickens. Why not help to fill this demand, and incidentally make money for yourself? Whether you make only a few or many extra dollars out of chickens, depends entirely upon yourself.

It's easy to raise a hundred chicks or so in a good incubator. Anyone can do it. Think of how much more you can get for your chickens, than the eggs cost you. And it's such fun, too, to watch them from the eggs to living, furry bundles. No wonder many people raise chickens as a hobby, because with a good equipment this is a hobby that becomes a money-maker.
