

## "New Cleveland"

### The Drill that gives Super-Service

Owners of the "New Cleveland"—and there are hundreds of them in the different mining centres of Canada—do not know what drill trouble means. From the beginning to the end of the season they stay on the job **continually**, as their solid construction requires no repairs.

They use less air and operate more smoothly than other drills, and the speed and power of the blow enables the runner to break previous records.

This means increased output at a lower cost of production, and with less labor required—a vital consideration these war times.

Use a "New Cleveland" on your job this season and put the "pleasure punch" in your work.

Write for Bulletin No. 35-A, which fully describes the "New Cleveland" Type S Stoper.
