Should be Bright, Cheerful, Activ & and Strong.

A Great Responsibility Rests Upon Mothers at This Period as . It Involves Their Daughter's Future Happiness or Misery-Sor an Usoful

Rosy cheeks, bright eye a an elastic step and a good appe afte are the birthright of every girl. These are the conditions that bespeak perfect health. But unfortunately the seen girls with pale or sallow co mplexion, languid, stoop shouldered ar all listless. Doctors will tell them that, they are anaemic, or in other words that their blood is poor, thin and veater. If further questioned they will tell them that this condition leads to decline, consumption and the grave. What is needed is a medicine that will make new, rich, red, blood, strengthen the nerves and thous restore the vigor, brightness a ad hopefulness of youth. For this purpose no other discovery in the ann als of medicine can equal Dr. William is Pink Pills for Pale People, and thousands of once hopeless girls have, been made bright, active and stroing their use. Among those who have been brought back almost from the grave by the use of this medicine is Miss M. C. Marceaux, of St. Lambert de Levis, Que. Miss Marceaux says—"He gives me the grave of St. Lambert de Levis, Que. Miss
Marceaux says—"It gives me the greatest pleasure to speak of the benefit I
have experienced from the use of Dr.
Williams' Fink Pills. For some years
I resided in Wisconia with I resided in Wisconsin with a relative, where I devoted my time studying English and music, intending to make the teaching of the latter my profession. I was never very strong, and my studies fatigued me much. When about fourteen I became are reserved. sion. I was never very strong, and my studies fatigued me much. When about fourteen I became very pale, suffered from severe headaches, and weakness. I consulted a doctor, and acting on his advice, returned to Canada. The fatigue of the journey, however, made me worse, and finally I got so weak that I could not walk without help. I was extremely pale, my eye-lids were swellen, I had continuous headaches, and was so nervous that the least noise would set my heart beating violently. I almost loathed food, and my weight was reduced to ninety-five pounds. Neither doctor's medicine nor anything else that I had taken up to that time seemed of the slightest benefit. I was confined to bed for nearly a year and I thought that nothing but death could end my sufferings. Happily an acquaintance of my father's one day brought me a box of Dr. Williams' Pink Pills, and urged me to try them. I did so, and I thought they Pink Pills, and urged me to trythem. I dld so, and I thought they helped me some, and my father got more. Afterf, had used a few boxes all my friends could see they were helping me, and by the time I had taken nine hoves. taken nine boxes I was enjoying bet-ter health than I had ever had in my life before, and had gained fifteen pounds in weight. I tell you this out of gratitude so that other young girls who may be weak and sickly may know the way to regain their health."

health."

Girls who are just entering womanhood are at the most critical period of their lives. Upon the care they receive depends their future happiness. Neglect may mean either an early grave or a life of misery. If mothers would insist that their growing daughters use Dr. Williams' Pink Pills occasionally, rich blood, strong nerves, and good health would follow. If your dealer does not keep these pills in stock they will be sent post paid at 50 cents a box or six boxes for \$2.50 by addressing the Dr. Williams' Medicine Co., Brockville, Ont. Co., Brockville, Ont.

WEDDING RELATIVES

Are Consanguineous Marriages Injuri-ous to the Race.

Lawrence Irwell concludes that conmajority of cases, undesirable, not because they originate diseases de novo, but because they intensify existing disorders or diatheses from which very few families are exempt. They should not even be thought of in any family in which idioey, insunity, onliceny connot even be thought of in any family in which idiocy, insanity, epilepsy, con-genital 'deaf-mutism, harr-lip, cleft palate, the phthisical or lithaemic dia-theses have occurred, for all of these diseases or tendency toward disease may be hunded down from one genera-tion to another. As it is not improbable that cancer is a micro-organic malady which attacks only those per-sons who have a proclivity toward it, families in which cancer has appeared, no matter how far back, should avoid sanguineous unions. Frequent mar ringes of persons whose environ have been very similar is injurious to the race, and extreme exclusiveness in marriage is not commendable.—Philadelphia Medical Journal, July 28, 1900.

Maligning a Rooster.

"That rooster of yours," complained the irascible neighbor, "woke me a dozen times last night. I don't think people living in a crowded community ought to keep chickens." "We don't keep chickens," retorted the man on the other side of the back yard fence, equally angry, "it was the baby."—Chicago Tribune.

MARRIAGE AND SUICIDE.

Statistics showing the relation of marriage to suicides:

ITALY. Married. ... 100 235 111.4 256 213 BAKONY.
Married, Widowed, Divorce
... 106 258 644
... 100 200 260

Prof. Goldwin Smith's "Theories on Suicide," which were recently published in the Herald, have aroused the interesting question as to the effect of higher civilization on suicide, which, Prof. Smith asserts, is to increase it. Another of Prof.

to increase it. Another of Prof. Smith's theories is that marriage is a safeguard against suicide, and on both of these points there is a decided difference of opinion among prominent specialists.

Prof. Charles L. Dana, of No. 50 West Forty-sixth street; indorses Dr. Smith's theories and says that there will continue to be an increase of suicides and insanity until civilized peoples learn to adjust themselves a little better to the conditions of life. He attributes the increase to the growing sensibilities of mankind, and somewhat to the increasing lack of religious feeling, increasing lack of religious feeling, together with the complexities of modern life, which wear on the

Prof. Dana also looked on marri-Prof. Dana also looked on marriage as a safeguard against suicide, and said that statistics prove the proportion of suicides to be less among married than among single persons. This he attributed to the natural responsibility feit by a married person toward husband or wife, and also to the more natural wife, and also to the more natural and regular mode of living of the married couple.

Dr. E. C. Spitzka, of No. 66 East Seventy-third street, asked why, if

marriage was a safeguard against suicide, no book on suicide is considered complete without a chapter on "connubial causes." Both Dr. Dana and Dr. Smith separated the married from the divorced in their estimates, but Dr. Spitzka included the divor ed as being a result of marriage.

Dr. Spitzka has compiled an interesting table showing that the husbands of literary women, especially have a higher rate, not only of sui-cide, but of general mortality, than other men. Dr. Spitzka's table was taken from three nations, and in-cluded 280 "literary females," as the physician termed them. One hundre! and eighty one of these women survived their husbands, and forty-one were survived, which gives a mortality ratio of 4 to 1, while in the tality ratio of 4 to 1, while in the general population the mortality of husbands to wives is but 2 to 1.

Dr. Spitzka found, however, that where the literary women were married to literary men, the proportion of mortality among the men was even less than in the general population, it being only 1.6 to 1, while in the general population are population in the general population in the general population is 2 to 1.

ral population it is 2 to 1.

Five of the husbands of these 280 literary women were suicides. This is a very large proportion, but again Dr. Spitzka's theory of needful literary mating steps in, in extenuation of the literary women.

literary woman.

Four of the husbands committed suicide because of unhappy married lives, but the fifth, on the contrary, com-mitted suicide because his wife had just died. He was a literary man, however, while the other four were literary men.
Suicide Increasing Among Hebrews.

This table of Dr. Spitzka, while en-This table of Dr. Spitzka, while en-forcing his theory that marriage is no preventive of suicide, might also be used by the former two doctors to enforce their theory that to divorce is due an extremely large proportion of suicides, for of the 280 literary women seventy-four had been divorced once, fifteen had been divorced twice, and three three times. three times

As to the increase in suicides, Dr. Spitzka said he has particularly noticed it among the Hebrews. Suicide was almost unheard of in this race twenty-five years ago, while now it is a common occurrence. This Dr. Spitzka attributes to the decrease in ortho-

doxy.

Dr. Spitzka said he found it quite unsafe to take official records of the ncrease in suicides, because they are nevadays kept with so much more accuracy than formerly, which would account for some increase, and also because in the classification they never go below the surface,

"Suicide comes in waves," he said,

and one wave reached its height dur "and one wave reached its height dur-ing the French revolution. In any accurate biography you will find that suicides were as frequent as to-day. Take such a work as Pepys' Diary,'

or example.
"No less than sixty suicides mentioned in Tacitus, and in 'Plu-tarch's Lives' you will find sixty more. Such actual increase as there would attribute to the growng non-accountability among men toward a divine Power." Relation of Marriage to Suicide.

Dr. John T. Nagle, head of the Pereau of Municipal Stavistics, could not endorse either of Professor Smith's theories. As to the increase, he shows a table in which the suihe shows a table in which the suicides of New York city are estimated from 1804 to 1880. In this period the suicides went from one in every 7,436 of the population in 1804 to one in every 7,938 of the population in 1880—not a very great difference—but in this time they had fluctuated in various years. The lowest rate was in 1846, I to every 21,720, and the highest in 1805, when the rate was 1 to every 3,017 of population. Statistics as to the relation of marriage to suicide had to be chiefly drawn from foreign countries, as records in the United States do not include this item as a whole. In Italy the statistics prove that the proportion of married, single and wid-

portion of married, single and wid-owed suicides is, according to Mar-selli's tables, as follows:

Nomen 100 In France the statistics are—

both sexes the proportion of wid-owed & large.

The German records are the only ones including divorced persons, as

Saxony.

Married Widowed Divorced

Men 100 258 644

Women... 100 200 260

This shows that divorce has a much more suicidal effect on men than on

From 1869 to 1876 suicide increased in all countries for which records were kept, and the figures for subse-quent years show little improvement. France, with a population of 38,-000,000, in 1868 had 5,547 suicides; England, a population of 21,000,000, had 1,508, and Austria, with a population of 20,000,000, had 1,986 suicides

cides.
France, with a population of 36,600,000 in 1876, had 5,804 suicides;
England and Wales, with a population
of 24,000,000, had 1,770, and Austria,
with a population of 21,000,000, had
2,438,
France, with a population of 37,600,000, in 1882 had 7,213 suicides;
England and Wales, with a population
of 26,000,000, had 1,965, and Austria,
with a population of 22,000,000, had
3,530,
The number of suicides in the United 3,530,
The number of suicides in the United States in 1880 was, according to the census, 331 to each 100,000 deaths. In 1890 it was 449 to each 100,000 deaths.

The number of suicides in twenty American cities in 1897 was 2,014. The same cities in 1896 had 1,999 sui-cides, an increase of 15, or .75 of one per cent.—New York Herald.

Deafness Cannot be Cured

Deafness Cannot be Cured
by local applications, as they cannot reach the
diseased portion of 'he eav. There is only one
way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed co-dition of the mucous lining of the
Eustachian Tube. When this tube gets inflamed
you have a rumbling sound or imperfect hear'ag, and when it is entirely closed deafness is
the result, and unders the inflammation can be
taken out and this tube restored to its normal
condition, hearing will be destroyed forever;
nine cases out of ten are caused by catarrh,
which is nothing but an inflamed condition of

my remedy for NEURALGIA,
It relieves at once.
A. S. M'DONALD.

With Gold Arabesques.

An afternoon caller wears a toque with a soft brim dipping downward over the ears and turned up in front. The toque is of cream colored ottoman silk, and is the subject of laborate appliques of narrow gold braid, applied in a conventional pattern. The pattern resembles arabesques. Two fine and long, and it may be added expensive ostrick may be added expensive ostrich plumes come forward, from the back to the front, one on each side. They turn upward in front and swirl out in wide fluffy tips.

Minard's Liniment Cures Colds, etc.

The year 1899 saw a very great ex-tension in the use of bicycles in France, the number of machines on which the tax was paid being nearly double that of 1898. Following is which the tax was paid being nearly double that of 1898. Following is given for the sake of comparison the number of bicycles for which tax has been paid since 1894—1894 203,026, 1895 256,084, 1896 329,816,1897 408,869, 1898 483,414, 1899 838,856. It is ous, 1535 453,414, 1899 838,856. It is difficult to account for the impression which is so common that the bicycle is losing ground. The bicycle tax in France produced, during 1899, the sum of \$1,084,805.

Miller's Grip Powders cure.

Encouraging. Encouraging.

Whyte—They tell me your daughter is learning to sing.

Brown—I am glad to hear you say so. She is trying hard enough, I know, but I must say that so far I haven't seen any evidence of success myself.

A dose of Miller's Worm Powders occasionally will keep the children healthy.

Rewards for British Generals. The present British commander-in-chief, Lord Wolseley, received a grant of \$125,000 only for his successful conduct of the Ashantee campaign of 1873-74, while for the Egyptian campaign of 1882 and the Nile expedition of 1894 be received a present and a much-debated grant of \$125,

Sapphires of Many Hues.

Sapphires of Many Hues.

It used to be supposed that a perfect*sapphire must be of a dark, rich blue tint. Now the discovery of a new sapphire mine in the Rocky mountains, where stones were found varying in their shades of color from a light steel blue to the deep blue tint and again from a lovely amethyst to a ruby red has changed all that. These new sapphires have become the rage. They touched the whole color scale of blue, red and purple.

There is Little Danger and Much Pleasure in a Parachute Drop.

"Coming down from the clouds in a parachute is like a dream," said a circus balloon artist. "Ever dream of falling from a high place? You come down, alight quietly, and awake, and you're not hurt. Well, that's the parachute drop over again. No, there is no danger. A parachute can be guided readily on the down trip, but you can't steer a balloon. To guide a parachute out of harm's way a practiced hand can tilt it one way or the other, spill out air, and thus work it to where you want to land, or to avoid water, trees, chimneys, or church spires. Circus ascensions are generally made in the evening. When the sun goes down the wind goes down. The balloon then shoots into the air and the parachute drops back on the circus lot, or not far away.

A balloon is made of 4c muslin and weighs about 500 rounds. A parachute is made of 8c muslin. The rope that secures the parachute is cut with a knife. The aeronaut drops fully 100 feet before the parachute begins to Pleasure in a Parachute Drop.

secures the parachute is cut with a kulfe. The aeronaut drops fully 100 feet before the parachute begins to fill. It must fill, if you're up high enough. There are several hundred parachute men in the business and the accidents are less in ratio than railroad casualties. Our business is new at that After a while the ratio will be less. A man can't shake out a at that. After a while the ratio will be less. A man can't shake out a parachute if it doesn't open. A man in the alr is simply powerless. Invariably the fall is head first. When the parachute begins to fill the descent is less rapid, and finally when the parachute las finally filled, it bulges out with a pop. Then the aeronaut climbs on to his trapeze and guides the parachute to a safe landing. In seven cases out of ten you can land back on the land where you started from."—New York News.
