

TO-DAY'S MESSAGES.

S. ROUND THE WORLD FLIER.

DETAINED AT REYKJAVIK.

REYKJAVIK, Aug. 18.

Lieut. Lowell, H. Smith and Lieut.

Nelson suffered another setback in

their world flight to-day when they

attempted to start on their long de-

ferred hop from Reykjavik to Green-

land. Both their planes were so

badly damaged as to necessitate at

least three more days delay. The

planes are carrying heavy loads

of fuel as it was the intention to fly

more than 500 miles across the ice in-

fested North Atlantic to Fredericksdal;

the machines refused to leave the

water as repeated efforts were made

to rise and the strain caused the

breaking of the spreader bar of Lieut.

Nelson's plane, while the propeller of

Lieut. Nelson's plane was shattered.

MOROCCAN TRIBESMEN AGAIN

ACTIVE.

MADRID, Aug. 18.

Guerrilla warfare is being carried

out by the rebellious Moroccan

tribesmen on both the Eastern and

Western front of the Spanish zone;

according to an official statement

given out to-day, Sangreary bands

are fighting hand to hand battles with

heavy losses on both sides reported.

The Spanish losses are given as four

officers and fifteen soldiers killed and

two officers and fifty men wounded;

the Rebel casualties are said to be

considerably greater. A Spanish col-

umn operating on the left, says the

statement, has reached Afen and

beaten the surrounding villages of

Sobis meeting only with slight fire.

The enemy is believed to have suffered

FRENCH AND GERMAN GOVERN-

MENTS REPORTED FAVOR-

ABLE TO DAVES REPAR-

ATION PLAN.

LONDON, Aug. 18.

The programme for launching the

Davies reparation plan, initiated by

delegates to International Conference

which closed here Saturday, now goes

before the French Parliament and the

German Reichstag for ratification.

The prospects are favorable for its

adoption by both bodies according to

despatch from the two capitals. The

Nationalists in Germany as was ex-

pected are the leading opposition to

the programme; but it is declared

they will scarcely go so far as to

adopt parliamentary attitude which

would result in defeat of the govern-

ment and a dissolution of the Reich-

stag and new elections in which they

could not hope to better their position.

THE SUDAN WILL BE MAINTAINED

AS A JOINT DOMINION.

LONDON, Aug. 18.

Maintenance of order in the Sudan

is the responsibility of the British gov-

ernment and Great Britain intends to

support the government of the Sudan

in taking any steps which may be

necessary to preserve "public securi-

ty," this statement was made by the

British Acting High Commissioner for

Egypt to a representative of the Egyp-

tian government who called at the

Foreign Office during the week end. It

was learned to-day, the British gov-

ernment believes that the recent

trouble in the Sudan was directly due

to exaggerated Egyptian claims with

regard to the Sudan, which have been

repeatedly made in the Egyptian pa-

per.

CANADIAN INDUSTRIAL ALCOHOL

COMPANY ESTABLISHES PLANT

AT ST. BONIFACE, MAN.

From Financial Times, Aug. 8th, 1924.

The establishment of the plant of the

Canadian Industrial Alcohol

Company of Manitoba, Limited, at St.

Boniface, just outside of Winnipeg,

undoubtedly ranks as one of the im-

portant industrial events of recent

years.

It serves not only as an index of

the growing importance of the West

as a manufacturing centre, but indi-

cates as well the great expansion of

the Canadian Industrial Alcohol

Company, Limited, of Montreal, of

which the Western organization is a

subsidiary—an expansion made nec-

essary by a constantly increased de-

mand for the company's products.

The building and site of the West-

ern plant were purchased some

months ago and in its completed

state to-day the plant is a model in

construction, embodying the most ad-

vanced equipment and principles of

manufacture.

With its large capacity, the plant

will devote its entire production to

serving the West, in an endeavor to

provide for that territory the man-

ifest advantages that undoubtedly

accrue when the trade is in close

proximity to the source of produc-

tion.

The Canadian Industrial Alcohol

Company, Limited, is the largest of

its kind in the British Empire and

has practically pioneered in the es-

tablishment of an industry that now

ranks as one of Canada's most im-

portant, contributing substantially to

the industrial prowess of the country.

It is notable that, although the

Western organization is capitalized

at Two Million Dollars, no bonds nor

stock issues of any character were

offered for public subscription, the

complete financial arrangements be-

ing taken care of by the parent com-

pany.

Smallest New York Store

ONLY TWO FEET WIDE.

What is said to be the smallest

store in New York City, if not in the

world, recently was opened for busi-

ness by a locksmith, machinist, and

electrician.

The width of the shop is 24 in-

ches. It is so small that customers

cannot enter, and business is trans-

acted through a window in the

front door.

The owner leaves by a door at the

side that forms one wall of his unique

establishment.

The Mirage

A NEW DANGER TO AVIATORS.

A new peril of long-distance flight

was revealed in a recent statement by

Maj. Frederick L. Martin, who was

commander of the round-the-world

flight of United States Army planes,

and whose machine crashed against a

mountain peak in the Aleutian Is-

lands. He ascribed the mishap to a

mirage that changed the apparent

face of his surroundings.

A mirage is a picture in the air

caused when light rays, carrying an

image are bent by variations in the

atmosphere's density. Such distor-

tion may entirely upset a flier's judg-

ment of distance.
