**HIGHEST QUALITY**  
**FISH HOOKS**  
 Key Brand

**Labradorite**  
 Always we have prided ourselves on the quality of our Labradorite and refused to place on sale stones that did not do credit to the peculiar beauty that is its chief charm. We have now received the first samples of our new stock and they fulfil in every way our ideas of what Labradorite should really be like when made into jewellery.  
 Specially selected and extra well polished stone made into an assortment of Pendants—Bean, Oval and Square shapes are the chief items in our new selection.

To-Night's Games.  
 7.30—Hubbly's vs. Customs.  
 9.00—Browning Bros. vs. Ayre's.

He Wished He Would.  
 Pat borrowed some money from a friend and was unable to pay it back when he came for it; so the friend became very angry and said:  
 "Now Pat, if you don't pay me back by next Monday I shall give you a thrashing."  
 The next day, as Pat was strolling along the street, he jostled a man, who cried out:  
 "Look out what you are doing or I shall knock you into the middle of next week."  
 "Be jabbers, an' I wish you whd. sort, for then I wud be over Monday."

THE CHANGE ACCOUNTED FOR.  
 A tradesman who did some work for a customer a few days ago rendered the following account:—

2 iron pegs ... 1 s. d.  
 1 wooden do ... 0 8

The customer sent 2s. 3d. to square the bill, pointing out that a mistake had been made in the account.

One-and-six was returned by the tradesman's boy, with word that if he read the bill he would find it all right. The customer read the bill two or three times, and then called on

Mr. E. Churchill was referee.

The next game will be played to-morrow afternoon, the Collegians and St. Bon's being the contesting teams.

OLD COLONY WILL BE REPRESENTED IN HERALD AND MARATHON.

Newfoundland Banking On Their Star.

HALIFAX, Oct. 10.—The Secretary of the Newfoundland Athletic Association yesterday cabled the entry of R. O'Toole, long distance champion of Newfoundland, for The Herald and the Evening Mail modified marathon.

O'Toole is a noted runner in the Old Colony and has defeated some good men. Newfoundland athletes are always popular in Halifax and O'Toole will get a warm welcome when he comes to Halifax in an attempt to take the big prize back to St. John's.

President Corey has sanctioned the event as the Ten Mile Championship of the Maritime Provinces. Leading M. P. B. A. U. C. officials will act as officials as in previous years.

Articles That Have Been Wrongly Named

The number of things which are wrongly named is extraordinary. Kid gloves, for instance, are made of sheep or lamb skin; while the paper contains no fibre. The Turks have never been known to have Turkish baths, and Irish stew is not a national Irish dish, but one made in all parts of Britain.

Another peculiar misnomer is that of "Brussels" for carpets which are made in Kidderminster, while many "Kidderminster" carpets come from Brussels. Many thousands of gallons of wine are distilled every year and sold as "Cognac" brandy, but very little comes from the West of France, where genuine cognac is made. A great number of Kashmir shawls are woven in Scotland, while thousands of "Swiss" watches come to us from America.

Egyptian Cigarettes From Turkey.

Most "Egyptian" cigarettes are really Turkish, as very little tobacco is grown in Egypt; while it would be impossible for the little island of Cuba to have produced all the Havana cigars on the market.

Camel-hair brushes are really made from the hair of the squirrel. Porpoise laces are made from the hide of a horse.

Millions of oranges, labelled Seville and Jaffa, come into this country, but most of them have never been anywhere near the orchards of Palestine or Spain. Catgut should be more properly called sheep gut, while sealing wax has no wax in it.

London Shops Endeavor to Popularize Derby Hats

LONDON.—There is a quiet revolution going on in England in the world of men's fashions, its outward and visible sign just now being the reversion of the bowler hat, as Pica-dilly calls the Derby, to the place of honor in held in pre-war days.

Up until recently there was a gradual falling off of formality in men's dress, due to the influence of the war. Now the reaction has set in favor of formal dress. The first indication was the gradual replacement of the soft collar by the old-fashioned stiff linen collar. Next the self-shirt for evening

wear, which few Britons ever approved, disappeared, its place being taken exclusively by the more dignified stiff front.

New comes the complete change in hat fashions. Last year a Derby hat was the exception, but this year it has become the rule. One hatter attributed the change of the predilection of the Prince of Wales to the Derby. At any rate, in Bond Street and Piccadilly, more than twice the number of Derbys are being sold in comparison with Trilbys and Homburgs.

Light From Trees

A French scientist has discovered a means of extracting and harnessing the electricity in trees. He connected a copper plate attached to a tree, and another plate buried in the earth, with a galvanometer, a delicate instrument which measures the strength of weak currents of electricity, and obtained a record of the current passing through the tree.

With three trees connected in the same way the power was increased, the experiment, with a like result, being continued until twenty trees were linked up in this fashion.

The scientist then placed two copper plates in the earth, about six feet apart, and with the current thus obtained lighted a small electric lamp.

Whether the idea can be extended to be commercially worth while has yet to be determined.

Here and There.

Van Houten's Cocoa best and goes farthest.—Oct 13, 1924

PROMENADE BAND CONCERT.—The G.L.R. Band held a Promenade Band Concert in the Prince's Park last night. There was a large attendance, and the rendition of music was greatly appreciated by the gathering.

All goods must be sold by Saturday. A. HUDSON, 365 Duckworth St.—Oct 14, 1924

THE TRAINS.—Sunday's east bound express left Port aux Haques 7.50 p.m. yesterday. The local Carbonear train arrived at 12.25 p.m. The express for foreign connections went out at 1 p.m.

## Earl of Devon Disabled

### PASSENGERS LANDED AT BATTLE HARBOUR.

The S.S. Earl of Devon, Capt. Carter, which left here about ten days ago for Labrador to bring up the remainder of the fishing crews, is now at Assizes Harbour Run, disabled, having lost some of her propeller blades. A message was received by the Railway Management this morning, stating that one hundred fishermen had transferred from the ship yesterday to the Sagona, and were landed at Battle Hr. In the meantime arrangements are being made to forward the passengers to Humbermouth, and thence by rail to their homes. It is not known yet whether the Earl of Devon can proceed to port without assistance.

Returning Home

His many friends will be pleased to learn that Mr. P. K. Devine who recently underwent an operation at the Montreal General Hospital, is making rapid strides to recovery and is now on his way home. A message to this effect was received from Halifax this morning by a friend.

Died at Deer Lake Hospital

The following message has been received by the Justice Department from the Magistrate at Curling:—

Thomas Templeman of Bonavista who was injured on Friday last died yesterday at Deer Lake Hospital. The body is being sent home by Humber Special.

MAGISTRATE SCOTT.

Bank Bills Paper Reclaimed

What becomes of all the defaced and damaged paper money is a question that has often been asked of bankers. Heretofore the answer has invariably been, that it is burned. Many interesting stories associated with the burning ceremony have gone the rounds of the press, among them being one in which an excessive draft in the furnace littered St. James Street in Montreal with partially burned bills. Ottawa's fire department was once called out to answer an alarm of fire when damaged paper money was being destroyed in the furnaces of the Finance Department in the East Block. Later the melting furnaces at the Mint were used for this purpose.

The destruction by burning of condemned paper money seems likely to become an obsolete practice. The Forest Products Laboratories, of the Department of the Interior, have been carrying on a series of experiments to develop the best method of recovering good paper stock from the condemned paper currency withdrawn from circulation by the Department of Finance and the various banks, and to ascertain if such a method is commercially feasible. Refining of the stock produced under normal cooking conditions was carried out and, by the use of a special washing equipment, it was possible to recover an absolutely clean pulp.

The paper used for the printing of bank notes is made from pure linen cuttings, and is one of the most expensive papers manufactured. It will readily be seen that if the Forest Products Laboratories are able successfully to reclaim the paper from condemned currency it will be of considerable commercial importance.

When London Chooses Her Lord Mayor

The city of London chooses her new Lord Mayor every year on Michaelmas Day, although he is not sworn in until Nov. 8, the day before the famous Lord Mayor's Show. The coming Lord Mayor, Sir Alfred Bower, is a member of one of the 12 "great" City companies or Guilds, the Vintners or wine sellers, founded in 1263. This is the Company, which, as commemorated by one of the frescoes in the Royal Exchange, once entertained at the same table the Kings of England, France, Scotland, Denmark, and Cyprus. It has a fine Hall, built by Wren in 1671, not open to the general public, but often shown to visitors from overseas and elsewhere who obtain an introduction.

When the Master, Wardens and members walk to service at the Church of St. Michael, Paternoster Royal, near their Hall, on the July day when they elect new officials for the year, each carries a bunch of sweet-smelling flowers, and before them goes a party of men in silk hats and white smocks, sweeping the roadway with birch brooms. The custom has come down from a time when the city streets were a good deal dirtier and less fragrant than now.

Among the attractions of the evening at St. Patrick's Concert to-morrow night will be a Spanish number in costume by Mrs. Gomez, who will wear a typical shawl and comb.—Oct 14, 1924

## Those \$100,000 a year smiles in the movies

How motion pictures' famous stars gain the gleaming, pearly teeth that make smiles worth fortunes—how you can clear your own teeth in the same way. A simple test that reveals the most amazing of tooth methods—a new method urged by leading dental authorities of the world.

MAE MURRAY, Metro Star, says in the silent drama, where the whole appeal is to the eye, pretty teeth are tremendously important, and formerly a great problem. Today Pepsodent is regarded at least as important as any other part of "make-up." How amazingly it acts one never knows till using it after ordinary, old-fashioned methods.

Now a test of this method is offered you—simply use the coupon.

SMILES in the cinema world sell for thousands—that is, some smiles. Gleaming teeth are essential. Otherwise a smile can have no value. So these people follow the method here explained not only for the satisfaction and beauty they gain, but as a matter of cold business.

Now a test of this method is offered you—simply use the coupon.

The amazing effect of combating the film which forms on teeth. Dull teeth, dingy, discolored. Now they are made whiter, more appealing.

Run your tongue across your teeth and you will feel a film. A film no ordinary dentifrice will successfully remove, yet which absorbs discolorations and clouds and dulls your teeth.

Remove it and your teeth take on a new beauty—a gleaming clearness that seems almost incredible. You may have gloriously clear teeth without realizing it. Thousands of people do.

Modern dental science recently discovered ways to remove and combat that film. For besides impairing beauty, it invites most tooth troubles and decay.

It clings to teeth, gets into crevices and stays. It holds food substance which ferments and causes acid. And in contact with teeth, this acid causes decay. Germs by the millions breed in

Results are quick Send the coupon for a 10-day tube free. Find out what is beneath the dingy film that clouds your teeth. Note their whiteness, their gleaming charm. You will note a great difference. Your friends will mark it.

NEW METHOD remove it

Modern dental science recently discovered ways to remove and combat that film. For besides impairing beauty, it invites most tooth troubles and decay.

It clings to teeth, gets into crevices and stays. It holds food substance which ferments and causes acid. And in contact with teeth, this acid causes decay. Germs by the millions breed in
