The New Field Engineer

The appointment of Mr. Rudolph Cochius as Field Engineer by the Highroads Commission is one which will undoubtedly meet with general approval. In the work to be undertaken, while the chief object is to make roads which will withstand the climatic changes to which this country is subject, it is equally necessary to preserve the natural beauty. In both respects Mr. Cochius has already proved himself a master workman, as is shown by the manner in which his work at Bowring Park was performed. The roads are as serviceable to-day as when they were first thrown open to the public, and every care has been taken to make the surroundings striking and artistic. In no better way can economy be effected than by the construction of highways that will stand up under the strain to which they are subjected, and in securing Mr. Cochius as Field Engineer we feel certain that the moneys will be spent to the very best account.

Manna Wins

The greatest event of the racing season in England, the Derby, took place to-day, and through the courtesy of Mr. H. Saunders, the Superintendent of the Anglo-American Telegraph Co., we are able to announce the following result:

Manna, 1st; Zionist, 2nd; Sirdar, 3rd.

Manna is owned by H. E. Morris, and on April 29th was the winner of the season's first classic, the Two Thousand Guineas at Newmarket. Zionist, owned by H.H. Aga Khan, was generally considered a favourite for the Derby on the withdrawal of Picaroon.

The names of the respective riders are not available, but it is understood that Steve Donoghue was riding Ptolemy II. The Derby dates back to 1780, but only on two occasions, namely, in 1787 and last year, has the race been won by a horse carrying the colours of its founder.

Another Step in Labrador Boundary Dispute

The Minister of Justice, Hon. W. J. Higgins, K.C., has been informed by Messrs. Burn and Berridge, the Newfoundland solicitors in London, that the Labrador Boundary cases had been exchanged during the day and that a copy of the Canadian case was being forwarded immediately. The solicitor representing the Canadian interests in London is Mr. Paxton.

With the exchange of the cases this lengthy dispute is at last reaching its final stages, and it is not unlikely that a decision will be given by the Privy Council before the end of the year.

PEPPYS BEHIND THE SCENES

May 26th.—Up betimes, yet do feel loth to set about my work, being that the 2 days' holidays did make me lazy. Anon abroad and the first thing I do hear is how the horses are drawn in the Cable Derby Sweep. So to set about looking my tickets over with great eagerness, but alas, am dogged by the usual ill-luck of the Peppys and do not come within 1,000 numbers of drawing a horse. So do all my plans of a new motor coach and my accoutrements paid fall to the ground.

By despatches out of England this day, news of the death of Colonel Repington, who did write a Journal of London in war time, mighty piquant, and did draw forth much criticism. Indeed, divers tales that he did tell such as I have never yet seen in a book.

News all this day of the Labrador Boundary, being that Canada do now exchange her case with us and the matter like to come for trial before the Privy Council this year. Yet having gone on so long, I do greatly doubt if we will hear the end of it this year.

Seaman Jumps Overboard From Sachem

From passengers who arrived by the Furness Withy Liner Sachem, we learn that one of the crew jumped overboard at noon on Monday last, when the ship was two days out from Liverpool, but despite a thorough search made, lasting over two hours, no trace of the man could be found. The name of the unfortunate man cannot be ascertained, but he is said to have been single, elderly, and making the trip for the second time. Several passengers witnessed the accident, and as he disappeared from sight soon after he struck the water, it is believed that the shock caused instant death.

U.S. AIRSHIPS WILL NOT GO IN SEARCH.

Secretary Winter declared to-day he regarded as "remote" any chance of sending the dirigible Los Angeles or the Shenandoah into the Arctic in search of the Amundsen Polar expedition.
