

# Gourlay Tone—A Revelation

The marvellous rich tone that pours forth from the Gourlay with bell-like sweetness has proved it a musical revelation in modern piano construction.

The production of Gourlay tone is the result of scientific knowledge on the part of expert artists in every department. The co-operative attention to every smallest detail by students of tone-production who work with only the finest materials procurable, has developed a high-grade piano with long life, great power of resistance, and a clear, mellow singing tone.

The Gourlay is universally endorsed by authoritative musical critics who know a piano. To know a Gourlay is to appreciate the wonderful accuracy of workmanship possible for human skill to produce.

The degree of perfection to which science has brought the

# Gourlay Piano

the success in producing that ideal tone—places it in the front rank of the world's famous pianos.

The performer on the Gourlay feels the inspiring influence of a masterpiece. It lends itself to varying temperaments of different players with a remarkable responsiveness and sympathetic softness that charms.

This wonderful tone-control is of prime importance in the purchase of a piano. It is the basis of Gourlay popularity among enthusiastic friends.

We cordially invite you to our Art Rooms to investigate for yourself the wonderful possibilities of the instrument that has established a modern revelation in tonal beauty—the Gourlay.

## MAWSON DISCUSSES ON CALGARY PAST AND PRESENT

Thinks the Location of City is Such in Its Amphitheatre of Hills That Its Natural Beauty may be Developed With Greatest Advantage.

## CANADIAN CLUB HEARS FAMOUS CITY PLANNER

Suggests Novel Scheme for Widening Streets, More Public Parks, Bridges and a Boating Lake; Terminals to Reunite in Union Depot.

More than one hundred and twenty-five men—bankers, brokers, merchants, physicians, clergymen, educationalists, and city officials—heard Thomas Mawson, the famous city planner, at the Canadian club yesterday noon, deliver the best address he has yet given in Calgary.

It was plain talk—very. Some of his auditors winced visibly at his criticisms. Lack of foresight, which was responsible for our narrow, congested downtown streets—no falling under the town planner's critical eye, were vigorously seconded. Also falling under the town planner's critical eye, were some of the really neat who gather to gather in the shacks, had quite forgotten the needs of the children in their play-grounds, and open spaces. Investors notice such things, he naively added.

But while Mr. Mawson was not sparing with his criticisms of the things he has found in Calgary that, in his eyes, are wrong, he was equally frank in commendation of the good things and wise he had found in "the city of the plains." He sees beauty in our business blocks which loom to skyward, in our "amphitheatre of hills" within the boundaries of the city, and the great mountain range to the west, which is not in the highest elevations. He did not even forget out prairie flowers, which he said, reminded him of those which bloom on the Saskatchewan Plain. Calgary he declared with emphasis, could be made a beautiful city, and, therefore, a great residential centre.

But, perhaps, the core of his fine speech was that part in which he showed the economy of city planning. "The adoption of a comprehensive plan for your city," said he, "even at this late stage would mean an enormous saving of money. It does not mean that complete conception shall be put under contract at once, or that any department of the work shall be done before the community can afford to do it, but it does mean that everything done will be in the right place and at the right time, so that it need not be undone in the future."

**Calgary, Past and Present.**  
Mr. Mawson said in part:  
"My subject this afternoon is Calgary retrospective and prospective. In simpler words, Calgary, past, present and future. But the real intent of my address is to propose to you that the adoption of a comprehensive plan for your city, even at this late stage would mean an immense saving of money. This does not mean that the complete conception shall be put under contract at once, or that any department of the work shall be done before the community can afford to do it, but it does mean that everything done will be in the right place and at the right time, so that it need not be undone in the future. This is the method which will produce the maximum of convenience, the greatest saving of time and effort and call for the least financial outlay. It will also conserve and promote the health of the citizens and will large and elevate the spirit of a common life."

"Here you have a city built on the prairie with illimitable stretches of open country on all sides of you. Land which 20 years ago was worth probably, no more than \$1 an acre—and yet, with land dirt cheap, you have arrived at a more parsimonious layout than can be found in any old city of Europe. The form of subdivision you have adopted is the one which allows the owner to subtract the last dollar per acre, whilst imposing the greatest burdens and obligations upon the general public."

"To begin with, you have already provided in your plan for 950 miles of streets (a sub-division covering 40 1-2 square miles). Of this number, 100 miles of streets only 45 miles are completed at a cost of \$4,879,114.43. There is therefore 900 miles of streets to complete, which will cost you on the basis of existing work, \$103,600,526. This is an colossal outlay account and takes no cognizance whatsoever of the annual upkeep."

**Eighth Avenue Suggestion.**  
"Now let us consider the widths of these roads, for that has an important bearing on the question of cost. Along Eighth avenue, which is 66 feet in width, you have double tracks with the following enormous number of cars, vehicles, and pedestrians, passing a given point per hour: Autos 75, bicycles 65, drags 12, rigs 6, cars 55. "It is 66 feet wide. Just the same width in fact as Fifteenth avenue west along which is not 1-40th of the traffic. And therefore, Eighth avenue is absurdly narrow or Fifteenth avenue is absurdly wide."

"If you must widen the street the windows must be placed back some 12 or 15 feet to allow the shoppers and other pedestrians to walk under cover of the awnings. I am afraid that in the busiest part of the shopping centre any other plan of widening the streets would be costly. The traffic along 8th, 7th, 8th and 9th avenues will have to be relieved, by the creation of radial arteries, which I am pleased to think can still be made at a cost which will more than repay the outlay. Time does not permit me to say more about the width of the streets in the business centres, which are undoubtedly too narrow, but of the other streets, I may say that, in my opinion, and according to European standards, the amount of macadam which you provide for your residential streets and avenues is extravagant and unnecessary. The width between the houses cannot be reduced, nor is this desirable, but if you study the question closely, you will agree with me that a macadam road of 24 ft. in width is ample to take all the vehicular traffic which is ever

likely to pass along these roads. This will permit you to have a much greater width of grass between the macadam roadway and the sidewalk, which owing to its greater width will be kept in a much more perfect condition than at present. If, in addition to this you could only make up your minds to do away with the fences to your gardens and to have a double line of trees on both sides of the road, you would create a street which would be most artistic and parklike. If you want a variation from this, it would be possible to have a centre strip of green and trees up the centre of the road to divide the up and down traffic."

## Calgary's Natural Plan.

"In this connection I would like to remind you that a city's individuality is its greatest asset—that indefinable something which a city says to you, and which is unlike the thing which any other city has to say. I emphasize this point because so many people have said to me: 'When can you build a city built on a flat plain?' Some have even gone so far as to say the thing which is the real reason for my dissent. Calgary can be, and some day must be a beautiful city, and not that of Winnipeg or Regina or any other city. It is surrounded by an amphitheatre of hills; all of which are included within the city's boundaries. In this respect it is more like the city of Salisbury than any place I know and, curiously enough, the cathedral spires gather up the arches of the sky, north, west, and south, that people travelling in various directions towards the Rockies should break their journey in this city. If that is really so, and we all think it is, why do you not endeavor to create one great union station, or if this was not possible, why did you not endeavor at least to bring the Canadian Northern along Centre street south of the C.P.R. station, and thus create a magnificent radial artery, in scale and treatment might have compared with any in Chicago or New York."

**The Terminal Problem.**  
I wish time permitted me to deal with the problem of our railway terminals here. You people of Calgary think as I think that your city should be the gateway east, west, north and south, that people travelling in various directions towards the Rockies should break their journey in this city. If that is really so, and we all think it is, why do you not endeavor to create one great union station, or if this was not possible, why did you not endeavor at least to bring the Canadian Northern along Centre street south of the C.P.R. station, and thus create a magnificent radial artery, in scale and treatment might have compared with any in Chicago or New York."

**Suggestions Made.**  
"I am recommending positions for two really fine, and therefore, inexpensive bridges across the Bow, both of which will work in with my radial plan, so that you will see what fine dominating features these bridges are likely to become. I am also suggesting the expropriation and reclamation of the land between the Bow and the city of Calgary may have, as she ought to have, in the future, the most magnificent drives and boulevards in Western Canada, in connection with this I am suggesting a large sheet of water for boating purposes, which will be revenue producing, and an acquisition to Calgary such as few of the inhabitants ever dreamed of, and yet I tell you the opportunity is so obvious that I am amazed you have not all thought of it already."

**Picture House to be Built in Balmoral.**  
The moving picture house is now to be built in Balmoral, the permit being taken out on Monday by Messrs. Harrison, Pouton, and Parker for a house to cost \$7,000, which they proposed to build immediately. Others will no doubt follow in their wake, and the picture shows will no longer be confined to the centre of the city.

The other permits taken out on Monday were few and of little consequence, and are as follows:  
Frank Holloway, Beaumont, dwelling, \$1,600.  
Harrison, Pouton, and Parker, Balmoral picture house \$7,000.  
L. Blott, Parkdale, dwelling, \$1500.  
Alberta Bldg. Co., block, Section 14, Plan A-3, addition, \$2,500.  
M. Bell, Tuxedo Park, dwelling, \$2,000.  
A. R. Buchanan Tuxedo Park, dwelling, \$3,500.

## FARMERS ASK FOR A RECLASSIFICATION OF LANDS HERE

Attention of Government Called to the State of Affairs in the Irrigation District Near Calgary—New Survey Will be Made Soon

## GOVERNMENT TAKING UP WHOLE QUESTION

Matter Will be Taken Up With the Petition to Use Waters of the Bow River for Irrigation Purposes; Experts Will be Asked to Report

Ottawa, May 28.—Pressure is being brought to bear upon the government through representatives of farmers in the Canadian Pacific western irrigation block near Calgary, to undertake a reclassification and survey of the lands in the district in order that disputes connected therewith may be settled. G. Zimmerman, of Calgary, counsel for the farmers, was in the capital recently and while here conferred with various members of the government and officials of the department of the interior. It is understood that Mr. Zimmerman urged upon the government the necessity of appointing a commission of experts to investigate the whole question of classification and values of lands, and that the government on the strength of the report should take action under the irrigation act to have disputes and differences settled.

## Maps and Plans.

At the present time the government is negotiating with the Canadian Pacific railway with a view to having the matter settled. In answer to a question asked in the house recently the acting minister of interior stated that the government was working on the matter. Through J. S. Dennis, assistant to the vice president of the Canadian Pacific, contour maps of the irrigation district are being prepared by the engineers of the company for submission to the government engineers. The supplementary estimates when brought down, will, it is expected, contain an item for the equipment of an efficient field force who will look after the situation.

The land in question comprises some 2,000,000 acres, and is sold by the Canadian Pacific in the form of ready-made farms for \$35 per acre, there being an additional tax of 50c per acre per year for irrigation. Numerous complaints have been registered by the farmers to the effect that the land in some cases has been held under a wrong classification.

## New Process Coffee

Easy To Make

Don't bother again with any coffee that must be "settled." The new process by which RED ROSE COFFEE is prepared, crushes the fragrant, fresh-roasted bean into even little grains, removes all dust and the yellow chaff that makes other coffees bitter so that in a few minutes the boiling water extracts this coffee's full, rich flavor, and it pours out bright, clear, and out being "settled"—nice to see and fine to drink. Get a tin of Red Rose and a tin of the simple directions say.

You will be captivated by

ing the evidence the judge proceeded to weigh up the claims and found the counterclaim offset the claim, with a balancing up he found for the plaintiff for \$40 without costs. This was the difference between the claims. A. S. Craig appeared for the plaintiff and E. V. Robertson for the defendant.

**COUNTERCLAIMS ARE BALANCED IN COURT**  
The case of William Foster against Major A. M. Jarvis was heard in the district court yesterday before Judge Carpenter. The plaintiff sued for the sum of \$325 for the use of three horses and \$106 for labor. The defendant made a counter claim for \$486 for damage claimed to have been done and the work of a team of horses. After hearing the evidence the judge proceeded to weigh up the claims and found the counterclaim offset the claim, with a balancing up he found for the plaintiff for \$40 without costs. This was the difference between the claims. A. S. Craig appeared for the plaintiff and E. V. Robertson for the defendant.

IS IN THOUSANDS OF HOMES WHERE HEALTH IS VALUED

Former tea and coffee users who have felt the pinch of indigestion, headache, heart disturbance, nervous irritation, etc., have written by the score, telling of remarkable benefits following the change from tea and coffee to Instant Postum.

A level teaspoonful in an ordinary cup of hot water dissolves instantly and makes it right for most persons.

A big cup requires more and some people who like strong things put in a heaping spoonful and temper it with a large supply of cream.

Experiment until you know the amount that pleases your palate and have it served that way in the future.

"Thanks for the sample of Instant Postum sent me. I had been drinking coffee for a long time and thought it would be difficult to give it up, but I was mistaken."

"While I was drinking coffee I always felt exhausted and I weighed but 112 lbs. After using Instant Postum I soon recovered and now am as healthy as any person can be. I now weigh 120 lbs. and am steadily gaining in weight." Name given by Postum Co., Battle Creek, Mich.

Postum comes in two forms.  
Regular (must be boiled).  
Instant Postum doesn't require boiling, but is prepared instantly by stirring a level teaspoonful in a cup of hot water
