

WONDER IN WELLAND!

A Representative Farmer Speaks.

MR. C. C. HAUN.

The following remarkable facts are fully certified to as being entirely correct in every particular, having resided here over a number of years, and is highly respected as a man of the strictest honor, whose word is good as his bond.

As will be seen from his letter, four years ago he had given up hope of cure after he had tried Burdock Blood Bitters, and had been cured of a similar ailment by his use. Mr. Haun writes as follows:

DEAR SIRS,—I think I have been one of the most unfortunate you have yet heard of, having been six years in the hands of some of our best doctors without obtaining any relief, but continually growing worse, until almost beyond hope of recovery. I tried your Bitters and got relief in a few days. Every organ of my body was deranged, the liver enlarged, hardened and torpid, the heart and digestive organs seriously deranged, a large abscess in my back, followed by paralysis of the right leg, in fact the lower half of my body was almost useless. After using Burdock Blood Bitters for a few days the abscess burst, discharging fully five quarts of pus in two hours. I felt as if I had received a shock from a powerful battery. My recovery after this was steady and the cure permanent, seeing that for the four years since I have had as good health as ever. I had taken an occasional bottle, not that I loved it but because I wish to keep my system in perfect working order. I can think of no more remarkable case than what I have myself passed through, and no words can express my thankfulness for such perfect recovery.

C. C. HAUN.

Welland P.O.

In this connection the following letter from T. Cummins, Esq., a leading druggist of Welland, Ont., speaks for itself:

DEAR SIR,—I have been personally acquainted with Mr. C. C. Haun for the last 20 years, and have always found him a very reliable man. You may place the most confident reliance in anything he says with regard to your medicine. He has on many occasions within the last four years told me that it was marvelous the way the Burdock Blood Bitters had cured him, and that he now felt as able to do a day's work as he ever felt in his life. Although quite well he still takes some B. B. B. occasionally, as he says, to keep him in perfect health.

Yours truly, THOMAS CUMMINS, Welland, Ont.

The steadily increasing sale of B. B. B., the length of time it has been before the people, and the fact that it cures to stay cured, attest the sterling merit of this most famous medicine, the people's favorite blood purifier, tonic and regulator.

DIFFERENCE OF OPINION REGARDING LIGHT.

The Light of Truth Being Diffused in Canada.

Philosophers are not agreed as to the nature of light. Some maintain the opinion that it is a body consisting of detached particles, which are emitted by luminous bodies, in which case the particles of light must be inconceivably minute; since, even when they cross each other in every direction, they do not interfere with each other. Others suppose it to be a fluid, like sound, by the undulations of a subtle fluid diffused throughout all known space. In our beloved Canada a "new light" has shed its cheering rays on the people. There is no difference of opinion regarding its nature and component parts. The grand invigorating and life-giving qualities of this "light" are felt by the young and old, the rich and poor.

This "new light" leads on to health, strength and bodily robustness. The dyspeptic, the sleepless, the nervous, the rheumatic and the broken-down have to thank it for emancipation from suffering and misery.

This wondrous "light" cures disease; it always conquers and leaves blessings in its path. This "light" of Canada is Paine's Celery Compound, as precious to our suffering people as is the light of the great orb of day. This grand medicine is the people's favorite, and justly so, owing to the many marvelous cures it has effected. The people it cures are with us—in our midst—and are well known. These rescued men and women testify gladly in its favor, and recommend it. No other remedy can claim the place that Paine's Celery Compound now occupies in our land. Its work brings satisfaction, joy and increased happiness.

Most people suppose that the manufacture of tobacco consists merely of taking the leaf and pressing it into plugs. The fact is, however, that the process is a very delicate one, and the least false step will injure the flavor. The leaf must be carefully attended to for months after it leaves the planter's hand. It must neither dry too quickly or too slowly. Even after it has reached the factory the utmost delicacy of manipulation is required. The weather must be carefully studied, for if there is too much moisture in the air when it is pressed it will mould, and the same will happen if too much moisture is sprinkled upon it for the purpose of opening the leaf. Again, if it is overdried in the oven it will turn crisp, and will rip the tongue in smoking. It is by careful attention to all these points that the "Myrtle Navy" has been brought to such perfection. The firm who manufacture it have their own storehouses in Virginia, and from the time the leaf leaves the planter's hands until it is turned out of the factory, months afterwards, in plugs, it is under the care of their skilled and trusted employees.

Edward Lloyd, May 13.

The subscription list for the "Lloyd" concert is meeting with great success. On Wednesday, the first day it opened, nearly 200 seats were spoken for; and judging from the general feeling in the city the event is certain to be a very brilliant affair indeed.

At a private musicale last Thursday evening given in Washington by Senator Calvin S. Brice, Mr. Lloyd, who was paid \$1,500 for his services, achieved an unparalleled success; in fact even Patti and Alcega have failed to arouse the wonderful enthusiasm that Mr. Lloyd is everywhere creating. Subscribers will please take notice that they will not be permitted (upon the opening of the plug) to reserve a greater number of seats than their subscription calls for. This restriction, which will be rigidly enforced, is rendered necessary owing to many of the late comers intending to get their friends who are near the top of the list to reserve their seats for them, which would be manifestly unfair to the other subscribers; so that it will not be permitted in any instance. Those subscribers who for good reasons require extra seats must set at once that the number is distinctly indicated opposite their name on the list; otherwise they cannot increase their number until the plan opens for the general public.

Dominion Parliament.

The Government Intent on Grasping More Power—The Emigration Business.

(Special to the ADVERTISER.)

OTTAWA, April 22.—The House of Commons began business to-day by a discussion in committee on the bill empowering the Governor in Council to renew the modus vivendi with respect to the Atlantic fisheries from year to year.

Col. O'Brien objected to giving such extraordinary power to the Government and removing from Parliament a matter which should be left to the House. Mr. Davies joined him in this view.

Mr. Laurier protested against making this a permanent policy instead of re-enacting the measure annually.

Sir John Thompson said it would be more convenient to regulate this matter by order in Council than by annual statute.

Mr. Mills (Bothwell) warned the House of the danger of allowing the United States to acquire a part of our rights by our acquiescence.

Mr. Trupper moved an amendment to the effect that if licenses issued by the Newfoundland Government under the modus vivendi should not be on a par with our own licenses they will not be recognized by Canada.

At Mr. Laurier's request the amendment—a very important one, which might destroy the basis of the whole fabric—was allowed to stand over, and the committee rose and reported progress. The House then went into Supply, and took up the vote of \$200,000 for immigration.

Sir Richard Cartwright asked what the Government's policy with regard to this subject was.

Mr. Cartwright replied that there would be no change, and added that the prospects for the season were bright.

Sir Richard pointed out that according to the Department of Agriculture the prospects had been bright every year for ten years, and when the census was got it had been proved that the policy of the Government was a "total, utter, complete and radical failure." The discussion lasted until a late hour, and when the House rose very little progress had been made, and Mr. Carling was left in wonderment as to what more the Government could do than bring 800,000 immigrants at a cost of a couple of million dollars and allow them to float quietly into the United States.

Beauty is a paying investment, but an insecure one.
