America,
Why will you allow a cough to lacerate your threat or lungs and run the risk of illing a censumptive's grave, when by the timely use of Bickle's Anti-Consumptive syrup the pain can be alloyed and the danger avoided? This Syrup is pleasant to the taste, and unsurpassed for relieving, bealing nd curing all afections of the threat and ungs, coughs, colds, brenchitis' to.

BOILER EXPLOSIONS.

BOILER EXPLOSIONS.

How to Prevent Them and the Causes of Such Accidents.

Of Fuch Accidents.

The following figures show the rapidity with which pressure is doubled by only a slight increase of heat:

At 212 degrees of heat water begins to boil; at 868 degrees iron becomes of a red heat.

212 degrees of heat—15 pounds to square inch.

inch.
251 degrees of heat—30 pounds to square

inch. 294 degrees of heat—60 pounds to square inch.
342 degrees of heat—120 pounds to equare

393 degrees of heat—240 pounds to Equare RHEUMATISM

OTTAWA, Doc. 28.—The annual report of the Minister of Finance, showing the financial transactions of the last fiscal it was a cocount of consolidated fund, compared with the previous year, reached a total of \$36,921.871, or \$1,657.439 less that the previous year. The total expenditure of new 1110 and careased expenditure of new 1110 and a half. The main items of receipts was \$36,705.894, as against \$36,343,567 in 1891, an increased expenditure of new 1110 and a half. The main items of receipts were: Customs, \$20,501. \$609. a decrease of \$2,848,000; excise, \$7,945. \$609. odecrease of \$2,848,000; excise, \$7,945. \$652,000, an increase of \$137,000; rail-weys, \$3,136,000, a decrease of \$45,000. The containveight of the

engineer thinks everything is safe the explosion comes.

That this is the true cause of nearly all the explosions that occur will be plain to everyone who will look at the relations between latent and sensible heat. What, then, is the security against explosions? None are known but these: A sufficiency of water in the boilers, and the escape valves open at light pressure when the engine is at rest. If engineers will be governed by this, instead of by a desire to hold on tosteam and save the expense of fuel, not one explosion will take place where now there are many.

London, Dec. 27.

Kind Words from Rev. Dr. Enris, of Westeyan Ladies' College.

To the Editor of the Advertisers:

Kindly insert in "our ad" the words, "will reopen on Jan. 6, 1893." The same space will do I think. I wish you could give it a good place till the opening. By the way, London is doing grandly in trying to close the salcons at 7 o'clock. I hope you may succeed.

The man who wrote the merits of London on your last page to-day is an adept. He knows how to do it. I have just read it through, and you may well be proud at your position and prospects. The best of it all is that it looks to be true. It is all in the present tense. Wishing the "Tiere, as the news boys say, a happy New Year and unlimited success, I am, very truly yours,
