to the satisfaction of the members of the syndicate interested in his patent that he can do what he claims. He said: "I have already treated large quantities of ore successfully, and am now in-stalling in the old C. P. R. Cement Works one of the finest and most com-plete little assay and treatment p.an.s on the Coast. The plant wild cost \$10, 000 and will treat 25 tons a day. The idea is to treat small quantities of ore for prospectors who cannot afford to send their low-grade ores to the smelter. In thirty days we will be able to go to Van Anda with our own scows and bring <text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text>
