Practical Temperance,

To the Editor of the Farmer SIB,—I have been under the impression that the Gleaner has of late been enacting the role of temperance and prohibition. If this is the case, why did that paper publish an editorial attack upon Prof. Foster, because Prohibition question? While we may not the sincerity of his temperance course is not open to criticism. And by the way, why did the Gleaner find it necessary to say in regard to the performance recently given by the Young Men's Club of the I. S. C., an organization zation formed in the interests of temperar that "the p-ople didn't expect anything much, nor did they get it."
