"By a thorough knowledge of the natura' awa which govern the operations of digestion and autrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Eppe has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. WM. ELLIOT, ESQ. Referring to the advertisement of this association in The World of Tu sday last, it may be explained that the much larger sum called for by the valuation made by Professor Cherriman, under the government standard for Canada, than is required by the valuation made by Mr. Homans on the standard for the State of New York, arises solely from the greater severity of the Mortality Table of the Institute of Actuaries of Great Britain as compared with the "American-Experience" Table of Mortality, as the same rate of interest was used in each case.

The reason why the valuation made by this Association's own actuary calls for a still larger reserve than even the required by Professor Cherriman's valuation arises from the fact that the directors consider that SECURITY TO THE FOLIC-HOLDERS is the FIRST thing, and, therefore, not content to provide simply as in other companies, they add an additional TEX per cent. to the liability under all sonus about the state of the provide simply as in other companies, they add an additional TEX per cent. to the liability under all sonus about the provide simply as in other companies as well as those being paid up, such as TEX and FIFTERN payments.
