TWELFTH YEAR. SATURDAY MORNING, SEPTEMBER 12, 1891---EIGHT PAGES ONE CENT

SIR RICHARD'S SIDE PARTNER.

THIS IS NOT POLITICS, BUT BIG, BIG BUSINESS.

The History of the Chicago Smokeless Fuel and Gas Company—A Great Corporation in Which an Exiled Canadian is a Leading Figure—Millions of Dollars in Mysterious Gas.

The London Advertiser of a recent date published the following paragraph:

"The Canada Gas and Fuel Company of Chicago has been incorporated with a capital of $5,000,000. The business of the company, which is backed by Canadian money, will be the erection of plants throughout the United States and Canada for the manufacture of gas by the T. G. Hall electric process. The incorporators are Thurston G. Hall and Loftus E. Dancey, president and secretary of the Chicago Smokeless Fuel and Gas Company of Chicago, T. N. Dancey, Patrick Dowling, Philip Holt, the Hon. M. C. Cameron and Sir Richard Cartwright of Canada. At the next meeting of the Chicago City Council the company will, it is said, ask for a franchise to lay mains and manufacture gas in Chicago. The company now owns or controls gas plants in Dayton, Columbus and Springfield, Ohio."

So much interest is taken these days in the foreign investments of public men that The World felt it to be its duty to procure for its readers a more detailed account of this gas scheme in which Sir Richard and his faithful lieutenant, Mr. M. C. Cameron of Huron, seem to be interested. Eminent Liberals appear to run to gas. In an extremely native-minded public recollection that while in pursuit of information about gas Sweet Singer James David Edgar seriously compromised the Liberal party. He went out to inspect gas on the Champ de Mars, Montreal, and found a collection of passionate Frenchmen prepared for almost any coleric enprise. The gas that was most conspicuous at that meeting caught Mr. Edgar's fancy straightway and he has not as yet used it for illuminating purposes.

Having failed to find the gas they wanted in Montreal, the party appears to have turned to that golden land of promise in the west towards which their hearts yearn. The gas company of which Sir Richard and Mr. Cameron are leading lights is graced by the presence of another Canadian whose name will be familiar to many of his former friends and neighbors—Mr. Loftus E. Dancey.

Who Mr. Dancey Is.

Loftus was formerly a resident of Seaforth where he pursued a giddy career which might have continued even unto this day had not the sheriff intervened. In the baleful Seaforth days, or rather nights, Loftus would give wine suppers that were the talk of the town. The sparkling but insidious mocker was swallowed by the quart until the morning gazed in in astonishment. The gentlemen who partook in these symposia have sadly reflected that in the end they paid the piper, for it was impossible to refuse the genial host any financial favor he might ask next day, several dishonored notes are mementoes of these wild days. Of course this could not last, and as the brilliant Loftus saw the clouds gather he resolved to make a sneak. It is recited to the credit of the suburbs of gentlemen with keen wits, slender pocket-books and elastic consciences—Chicago. About all he had left was his furniture, and that he made masterly efforts to take along with him. He deserved better but a cruel fate delayed his household goods at Stratford, and there they were seized by his remorseless creditors. However, he managed to leave the country with a pretty good bundle, having made collections for other parties which he failed to account for.

He Has Done Well.

His creditors and other admirers will, however, be glad to hear that Mr. Dancey is now a capitalist. Let the story of the Chicago Smokeless Fuel and Gas Company now be told. This colossal concern was incorporated, in the City of Chicago under the laws of the State of Illinois, Oct. 28, 1890. The corporators are Thurston G. Hall, manufacturer; Edwin Louis McAuliffe, physician, and Loftus Edwin Dancey, attorney.

The object of the corporation was thus stated: "The manufacture and sale of gas for fuel, illuminating and all other purposes. The manufacture and sale of steam for heat and power. The manufacture and sale of ice. The production and sale of compressed air for cold storage and ventilation and all other purposes. The manufacture and sale of electricity for light, power and all other purposes."

The amount of capital stock (on paper) is $10,000,000 divided into 100,000 shares of $100 each. Location of principal office, Chicago; duration of corporation 50 years.

The capital stock was thus subscribed: "We the undersigned hereby severally subscribe for the number of shares set opposite our respective names to the capital stock of the Chicago Smokeless Fuel and Gas Company, and we severally agree to pay the said company for each share the sum of one hundred dollars.

Names.	*Shares.*	*Amount.*
Thurston G. Hall	50,000	$5,000,000
E. L. McAuliffe	25,000	2,500,000
Loftus E. Dancey	25,000	2,500,000

At a meeting of the subscribers to the capital stock held Oct. 27, 1890 Thurston G. Hall, Edwin Louis McAuliffe, Loftus Edwin Dancey and Thomas Byrne were elected directors for one year.

Enlarging Its Scope.

The scope of the corporation as set forth above appears not to have been sufficiently comprehensive to meet the views of the stockholders, and at a special meeting held March 27, 1891, they

Resolved, "That the object for which this corporation was formed be so enlarged as to include the following additional powers, to wit:

"To buy, refine and manufacture oils; to manufacture smokeless fuel, paints and varnishes and to sell any and all of the same;

"To purchase and mine any and all crude ores, and the same to reduce, smelt or otherwise treat and the product thereof to sell;

"To acquire and dispose of by purchase, sale, lease, license or otherwise any and every right pertaining to any invention under the patent laws of the United States affecting any and every object of said corporation;

"To manufacture, construct, set up and operate any and every appliance, apparatus device, composition or process covered by any right owned or controlled by the said corporation through purchase or otherwise, under the patent laws of the United States, and to sell, lease or otherwise dispose of the same.

"To accept franchises from towns, townships, cities and counties in aid of its object, to lay and construct any and all pipes, conduits, wires and other connections necessary or proper to the full enjoyment and exercise of such franchises, or to the performance of any and all undertakings with private parties not beyond the scope and object of said corporation; and further

"To do any and all things lawfully to be done in aid and pursuance of any and every of the powers of said corporation hereby or hereafter made and granted."

Manufacturer Hall, Doctor McAuliffe and Attorney Dancey on the same day that they floated the $5,000,000 corporate ark also called into being the Illinois Gas and Ice Company, with the professed object of "the manufacture and sale of gas for fuel, illuminating and all other purposes. The manufacture and sale of steam for heat and power. The manufacture and sale of ice. The production and sale of compressed air for cold storage and ventilation and all other purposes. The manufacture and sale of electricity for light, power and all other purposes." The capital stock of this concern is a mere trifle of $500,000 in 5,000 $100 shares, of which Hall subscribed for 2500, McAuliffe for 1,250 and Dancey for 1,250. The location of its principal office is stated to be Chicago and its duration 50 years. It has the same directors as the other company. It is not known whether Sir Richard and Mr. Cameron are also members of the ice company or not. Probably the cold shades of opposition are about as frigid an article as they want to handle just now.

The Illinois Gas and Ice Company seeks that quiet and repose which come from solitude, and the directory does not reveal its local habitation or its name. The Chicago Smokeless Fuel Gas Co. has offices on the tenth floor of the Auditorium, and the inscription on the door reveals that the officers are:

President and Treasurer—Dr. Edwin Louis McAuliffe.

Secretary—Loftus Edwin Dancey.

Manager—Thurston G. Hall.

I called at the office this afternoon, says our Chicago correspondent, and stated to Secretary Dancey that I wanted to get a prospectus.

Such Pleasant-Looking Men.

Mr. Dancey, who is a very affable, good-looking young man, replied that they had no printed prospectus as yet, that when parties wanted information the company wrote them giving full particulars. He invited me to wait and see Mr. Hall, who, he said, was "the inventor of our machine" and could tell me all about it. I waited but did not see Mr. Hall. I was introduced, however, to Dr. McAuliffe, the president of the company, who is also an exceedingly pleasant and good-looking gentleman and somewhat resembles Secretary Dancey; the secretary's mustache, however, is black while the medical man's is a fine blonde, and part of the latter's beauty is hidden behind a pair of smoked glasses.

The doctor understood that the natural gas about Buffalo was giving out and it was probably on that account that my friends were inquiring. They manufactured a fuel for itself, and I was cordially invited to inspect it in operation to-night at their works at Deering. The machine is patented, and its sale appears to be theussiness of the company. Before he became a subscriber to capital stock, manager, etc., was a gasfitter. He is not commonly supposed to be a millionaire. There was a T. G. Hall formerly lived in Sarnia, who had a brilliant scheme for turning coal oil and crude into five barrels of refined oil. That Mr. Hall had to leave Sarnia, as his plan for some unaccountable reason miscarried, and some of those who had believed in Hall were unkind enough to cry fraud. But these incidents occur in the life of every aspiring spirit.

Dr. McAuliffe is a physician in moderate practice at 2202 Michigan-avenue, and is dependent upon his professional earnings for support.

Mr. Dancey, though he describes himself as an attorney, is not registered in Sullivan's Law Directory, which is the test of the right to vote at bar primary elections under the Bar Association's rules.

It Cost Them Fully $7.50.

To form a corporation under the laws of this state all that is necessary is to make an application on a printed form and send it to the Secretary of State with $2. He examines it to see (1) that the name is not the same as, or so similar to as to be easily mistaken for, any other corporation previously organized, and (2) that the objects stated are not unlawful. If the application meets these requirements the Secretary of State issues a license to the incorporators (not less than three nor more than seven) to open books of subscription for the capital stock. Upon the stock being subscribed a meeting of the subscribers is called by the incorporators, which meeting must be held upon 10 days' notice in writing to each of the subscribers. Directors are then elected and the incorporators send to the Secretary of State a copy of the notice, of the subscription book and the names of the directors and the term for which elected. The Secretary of State then issues, if $3.50 has accompanied the papers, a "certificate of complete organization." Upon filing this for record (fee $2) in the recorder's office of the county where the corporation has its principal office the corporation may lawfully do business, and the subscription to the capital stock may be paid at such time and in such manner as the directors order. Thus with $7.50 any three men who can sign their names can form a corporation for any lawful purpose with any amount of capital stock.

Sir Richard and his colleague may be congratulated on their business associates and on the fact that they have to go in on the ground floor of such a colossal and remunerative concern. The World has but one suggestion to make. Could not the gas at present being blown off by the Opposition at Ottawa be barrelled up and shipped to the new concern at Chicago. The success of the company would then be beyond peradventure.

An Interesting Display of Valuable Sealskin Garments—This Season's Nove ltie.

Furs will be a very attractive feature and of great interest to those coming to the city next week. The stores are making great displays in their respective lines, knowing that many of the visitors come to purchase as well as to see the sights at the Exhibition. The most noteworthy establishment in the fur line is the well-known house of W. & D. Dineen on the corner of King and Yonge-streets. This firm have been making great preparations for some time getting their new garments ready. The whole stock is now opened up and on view in their large fur show rooms, which cover four stores over the corner of King and Yonge-streets. Ladies will here see the fall and winter fashions in seal, Persian lamb jackets, reefers and long mantles. Capes in the latest shapes with high shoulders and pointed fronts in all the most fashionable furs. Storm collars that turn up and cover the ears small collars worn tight round the neck and large broad collars that extend to the points of the shoulders and fall down to the waist. Boas in bear, sable and other costly furs; long circulars lined with Russian squirrel, in a variety of patterns suitable for driving or evening wear. Large military capes; the latest London fashion is shown in monkey, grey lambskin, sable, mink and other furs. Dineens' display of furs is well worth a visit from those interested in stylish furs.

Catarrh—Hay Fever—Catarrhal Deafness

A New Home Treatment has been discovered whereby the worst cases are permanently cured by a few simple applications made forcnightly by the patient at home. Send stamp for circular. J. G. Dixon & Co., 343 West King-street, Toronto.

"Old Chum" Plug Cut Smoking.

Needs no recommendation. It speaks for itself. A high grade tobacco at a reasonable price. D. RITCHIE & Co., Montreal.

The oldest Cut Tobacco and largest Cigaret manufacturers in Canada.

Assistant P. O. Inspector at Hamilton.

OTTAWA, Sept. 11.—The postal department has decided to locate an assistant postal inspector at Hamilton.

The Ireland National Food Company's exhibit in the Main Building is unusually attractive. The desiccated cereals, neatly put up in packages and also shown in glass jars, as well as various medals awarded at exhibitions in different parts of the world, afford considerable interest to visitors. The demand for Ireland's foods is rapidly increasing, and they only require to be known to come into universal use.

Killed on the Highway.

ALMONTE, Ont., Sept. 11.—John Macdonald was thrown from his buggy at Robertsville and died in a few minutes.

Billiards.

Visitors to the exhibition are reminded that Samuel May & Co. are now located in their new premises, 83 King-street west. Not having an exhibit at the fair this year they will keep their office and show-room open every evening during the exhibition for the purpose of displaying their fine stock of billiard and pool tables, fancy cues, ivory goods, fine cloths, etc., and will be pleased to have a call from all interested.

Hot air furnaces, finest quality and low prices. Satisfaction guaranteed. Wheeler & Bain, 179 King east.

SANK OFF CAPE COLLONA.

CAPTAIN, CREW AND 100 PASSENGERS DROWNED.

Greek and Italian Steamboats Meet With Terrible Results—Bismarck Stricken With Apoplexy—Cardinal Manning Must Cease Work, Say His Physicians—Baron Hirsch's Great Scheme.

ATHENS, Sept. 11.—A collision has taken place off Cape Callona, between an Italian steamship the Taormina, of the Italian Messageries Company, and a Greek steamship, the Thessalia. The Taormina sank soon after the accident, drowning her captain, several of the crew and forty of her cabin passengers. The second officer of the Taormina and a number of the passengers who were standing on the bridge at the time of the collision, were saved by boats of the Thessalia.

The damage done to the Taormina by the collision with the Thessalia was so great that she sank a few minutes after being struck by the Greek steamer. Most of the Taormina's passengers were in their berths when the vessels collided, and the latest estimate is that 100 persons were drowned. The Thessalia was badly damaged forward, but by keeping the pumps going the steamer just succeeded in reaching Phaleron.

The captain of the Taormina remained on the bridge with the greatest coolness and sank with the vessel. All the mails and a quantity of bullion were lost. Several Englishmen were drowned. A Greek sailing vessel passing at the time saved 16 persons and landed them on the coast.

FIFTEEN WENT DOWN TO DEATH.

A Steam Launch Sunk by a Collision in Lough Foyle.

DUBLIN, Sept. 11.—A steam launch carrying non-union laborers from Dublin to Londonderry, sank in Lough Foyle to-day after colliding with the steamer Albatross. Fifteen persons were drowned, among them a child of Graeme Hunter, agent of the London Grain Federation, who was aboard the launch with his family.

The launch came bow on toward the Albatross and struck her sponson. She commenced to sink immediately. The accident occurred in a narrow channel of the river, but the night though cloudless was dark. An alarm was sounded just before the collision, but it was too late to avoid the collision.

THE DARDANELLES.

Lord Salisbury Actively Taking Diplomatic Steps in the Matter.

LONDON, Sept. 11.—The rumor that the Dardanelles question has subsided is untrue. Lord Salisbury is actively taking diplomatic steps. The Porte's ambassador here was summoned to Constantinople yesterday to give an account of his position. The ex-Grand Vizier Kiamil Pasha continues a prisoner in his own house. The British minister in Constantinople, Sir William White, and the German ambassador, Herr Von Radowitz, have made representations to the Sultan with a view to the protection of Kiamil Pasha. The Sultan, who gave audience today to Herr Von Radowitz, denied that the designs were inimical to any European power and stated that there was no serious charge against Kiamil.

A despatch from Constantinople says Kiamil will probably be appointed governor of Smyrana.

The Treaty Dead.

LONDON, Sept. 11.—A dispatch from Batoum says: "Eleven shipments of war stores have traversed the Dardanells this year. All volunteer cruisers have taken heavy guns for fortification use. Foreign vessels have been chartered to carry stores and munitions. Turkey yielding to Russia shows that the Treaty of Paris is a dead letter so far as Russia is concerned, as a strong Black Sea fleet is being rapidly collected."

"The Cossack Stroke On the Bosphorous."

BERLIN, Sept. 11.—The Hamburger Correspondent contains a sensational article to-ay entitled, "The Cossack stroke on the Bosphorous." According to this article Russia meditates a surprise to Constantinople by a conjoint landing of 30,000 troops in European and Asiatic Turkey. The Bosphorous forts it is said are to be attacked from the rear, and the approach of hostile fleets is to be prevented by torpedoes while it is caculated that a Russian torpedo boat could enter Golden Horn at night, and completely destroy the Turkish fleet, and that whole could be accomplished in 24 hours. The article details experiments made in embarking and landing troops on the Black Sea, conducted under Gen. Roop since 1886, and the studying of the ground by Russian officers on the spot in the guise of searchers for Nihilists, traders, antiquarians, etc. Complete plans for everything are said to be ready and only the command from St. Petersburg is now needed.

IS PLEVNA'S HERO DEAD?

An Unconfirmed Rumor That Osman Has Been Assassinated.

CONSTANTINOPLE, Sept. 11.—An unconfirmed rumor is current here that Osman Pasha, ex-Minister of War, has met with a violent death.

Marshal Osman Nubar Pasha is well known in connection with his defense of Plevna against the Russians in 1877. He was born in 1832 in Asia Minor. He took part in suppressing the rebellions of Syria (1860), of Crete (1867) and the Yemen (1874). After his gallant resistance and the fall of Plevna, he returned to Constantinople and became commander-in-chief of the Imperial Guard (1878), Governor-General of Crete and Minister of War (1878-1882).

RIOTING IN CHINA.

British Blue Jackets and a Gatling Gun in Han Kow.

LONDON, Sept. 11.—A Shanghai correspondent says: The foreigners of Ichang, with the exception of the members of the consulate, have taken refuge at Han Kow, the foreign gunboats being unable to reach Ichang on account of low water. An attempt was made to cause a riot at Han Kow Tuesday, but a British man-of-war landed a company of blue jackets with a Gatling gun and the disorder was quelled without fighting.

Baron Hirsch's Project.

LONDON, Sept. 11.—The Jewish Colonization Association has been registered in London. The capital is £2,000,000 in £100 shares. There are 80 signatures. Baron Hirsch has 19,990 shares. The objects of the association, which are set out at great length, briefly stated are to promote a vast emigration of Jews from Europe and Asia to any other part of the world, and to establish colonies in North and South America and elsewhere for farming, commercial and other purposes. The maintenance of public works of all kinds, roads, roadways, bridges, harbors, watercourses, telegraphs, factories, and even forts is provided for, as well as synagogues, clubs and everything conducive to the religious and social welfare of the colonists. The association also reserves the right of a great trading corporation.

Chancellor Von Caprivi has instructed the agent of the Argentine Republic to ask his government to support the Jewish Colonizing Committee.

Cardinal Manning Feeble.

LONDON, Sept. 11.—The physicians in attendance upon Cardinal Manning have ordered him to cease work, and it is announced that the Pope will shortly appoint a coadjutor. Cardinal Manning is now about 83 years of age. His episcopal jubilee was celebrated June 8th, 1890.

What the Queen Eats.

LONDON, Sept. 11.—The Queen's health is poor, and her physicians regulate her diet more strictly than ever before. Her fare is limited to meats chopped fine, fish and game. She is allowed a little wine at dinner and at luncheon a single glass of bitter ale. Visitors find a notable increase in the Queen's aspect of age.

Prince George Gets a Medal.

COPENHAGEN, Sept 11.—The Czar has presented Prince George of Greece with a gold medal in recognition of the Prince's bravery in protecting the Czarewitch from the attack by the Japanese policeman.

The Dudley Wedding.

LONDON, Sept. 11.—The Prince and Princess of Wales will attend the wedding of the Earl of Dudley to Miss Gurney which will be a most notable society event. The famous Dudley diamonds reset, consisting of six tiaras and parures, will be displayed. Gorgeous gifts have been showered on the bride.

Unfortunate Landed Nobility.

ODESSA, Sept. 11.—Three hundred and seventy four estates belonging to members of nobility will be sold by auction in October under foreclosure by the State bank. The estates are located all over European Russia and the sale indicates the desperate straits to which landed nobility are reduced.

The Man of Blood and Iron Stricken.

BERLIN, Sept. 11.—It is reported that Prince Bismarck has had a slight apoplectic attack.

Chat from Over the Sea.

The Earl of Northesk is dead.

The Trades' Union Congress will hold its next session in Glasgow in 1892.

Lord E. E. Stewart Gordon, brother of the Marquis of Huntley, and heir to the Marquisate, was yesterday declared a bankrupt. He has unsecured debts of $81,900 and assets of $7630.

All Due to a Cat.

BOWMANVILLE, Sept. 11.—Mrs. William Northcott has lost her arm and will probably lose her life through the scratch of a cat. It appears Mrs. Northcott was sitting in a chair with the cat on her knee and in pushing it off received a scratch on the hand which almost immediately began to swell. In a few days mortification set in and the attending physician found it necessary to amputate the arm below the elbow. Mrs. Northcott is now lying in a very low state, it being hardly expected that she will survive the shock of the operation.

Two Accidents, One Fatal.

BRAMPTON, Sept. 11. — John Stoneham, while engaged in laying flooring on the second story of Mrs. Lyons' new house in Thomas-street, missed his footing and fell to the floor below, a distance of 12 feet. In the fall one of his ribs was broken, a part of which pierced a lung and produced injuries which may yet prove fatal. His sons reside in Toronto. William Lowe of lot 20, Centre-road, was thrown from a wagon, sustaining serious injuries. Some years ago he met with an accident which resulted in the loss of one of his eyes. His son David when a lad, had both his arms cut off by a reaper and was afterwards killed by lightning.

Suicide of an English Immigrant.

CALGARY, Sept. 11.—A young English man, aged 20, named James L. Wellsby, was found dead in the immigrant sheds yesterday, where he had committed suicide. The deed is supposed to have been committed on Monday, when he was last seen alive. A knot was tied to the end of a rope thrown over the top of the door, which he then closed and locked. On the other end of the rope was a noose which the victim placed round his neck, and taking a kneeling position strangled himself to death. He was a weaver by trade.

Fashionable Mantles.

N. Rooney, 62 Yonge-street, now has his mantle-room open and is showing a wonderful variety of mantles, cloaks and jackets at manufacturers' prices. Silk seal ette in many qualities, Swiss and Belgian lace curtains, siderdown quills, also a special line of hand-loom double damask tablecloths, all sizes, which will be sold at 25 per cent. less than usual prices, and a well-assorted stock of linen goods of all kinds, including towels, napkins, handkerchiefs, table linen, etc. Black silks in mervellieux, surah, faille, francaise, Bonnet's perfection and gros grain 136

Found Dead in Bed.

LANARK, Ont., Sept. 11.—Mr. Alexander Drysdale went to bed apparently quite well, but on going to call him to breakfast one of the family found that he was dead. The doctor pronounced the cause of death to be fatty degeneration of the heart.

The Demarara Orange Crop.

ST. JOHN, N. B., Sept. 11.—The Faymouth Castle, Capt. Clark, arrived to-day with mails and passengers. She left Demarara August 23. She brought considerable fruit, mostly oranges from Demarara. Oranges are very plentiful in Demarara and for want of market they are left to spoil on trees. Advices state that fully 200,000 bushels are being left to rot.

"Derby" Cigarets.

For five cents you can buy the "Derby" which (with the exception of the Athlete) is the equal of any other brand in the market sold for double the price. D. RITCHIE & Co., Montreal.

Oldest Cut Tobacco and largest Cigaret manufacturers in Canada.

Upon the maturity of 7 per cent. guaranteed income bond of the North American Life Assurance Company the full face thereof becomes payable and an amount ranging from 10 to 50 per cent. is guaranteed in addition thereto; also a full share of the profit accumulations, or, if the holder desires, he may withdraw the profit accumulations and receive a guaranteed income of 7 per cent. annually during life, the face of the bond being payable at death. Upon the decease of the holder at any time the amount of the face value of the bond becomes payable. 246

Shirts to order in all the latest styles. Send the size of neck, length of arm and the chest. We will do the rest. A. White, 65 King-street west.

"Hyde Park" Cigarets.

A marvel of manipulation in the cigaret manufacture.

The superior of any other brand in the market. Try them and judge of their merits. D. RITCHIE & Co., Montreal.

Workers Wanted.

The Ontario Mutual Life Assurance Company desires to secure the services of six good canvassers for work in the city and suburbs. Very liberal terms will be given to capable men on application at office, 32 Church-street.

Death from a Blast.

SUDBURY, Sept. 11.—On Aug. 31st, William Bolton, Wilbur, while blasting at the Evans mine, Sudbury, was struck in the back of the head with a small stone from a blast. His injuries were not considered serious at the time, but complications afterwards set in and he died on Thursday.

To fit a truss, especially scrotal, is done to perfection only at Charles Cluthe, 134 King west. There is no more experienced man on this continent in adjusting trusses than Charles Cluthe, 134 King west, Toronto. The greatest relief as much as human skill, as produced for ruptured and deformed people, may be had at Charles Cluthe's, 134 King-street west, Toronto. 6

Treble's perfect-fitting French yoke shirts are the best, made from imported materials on the premises. Try a sample. 53 King-street west. Illustrated price list and measurement card free.

Cooking Ranges—John Bull and Kitchen Witches, Toronto make. Support your own. Wheeler & Bain, 179 King-street east.

Best dinner in the city at The Hub

FAST ATLANTIC MAIL.

Canada Will Ask Britain to Help Subsidize a Fast Service.

OTTAWA, Sept. 11.—Minister of Customs Bowell stated to-day in connection with the rapid transit mail service between China and London via the Canadian Pacific, that it was expected that arrangements would soon be perfected by which a fast Canadian Atlantic mail service would be established in connection with the Canadian Pacific system, placing the through route continuously under British control. The Dominion Government's offer, he said, of an annual subsidy of a half a million dollars was still open to any company willing to undertake the service. The British Government will be urged to co-operate with Canada in completing this fast mail service by contributing towards the subsidy to be paid for a fast Atlantic mail service.

THE STAFF OF LIFE

Hum at the Factory of the Toronto Biscuit and Confectionery Co.

Front-street is lined for blocks with the chief commercial houses of the city. From the warerooms of Front-street goods of all kinds are poured out destined for the shelves of the thousands of traders throughout the Dominion. Though nearly all the houses are busy at this time of year, none on the street present a more animated scene than the Toronto Biscuit and Confectionery Co's factory. Large staffs of workmen in the different departments are busy, the office and counting-room are filled with clerks keeping account of shipments and receiving orders, and the output of the factory is being carted to the railway stations every hour of the day.

Though the company has been organized for only a short time—since April—its success has been phenomenal. The rapid progress made during these few months gives bright promise of a most successful future. In April last the company was formed, Messrs. H. C. Fortier, George Booth and Charles Peters, all well-known gentlemen, being the principals. Mr. W. J. Solomon was engaged as manager and the different departments were placed in the hands of the best men that money could procure. The employment of the most skilled men with the use of none but first-class materials produced an effect at once. Orders began to come in and increased in size and number as the months went by. At present every department is heavily taxed, so much so that work is carried on both night and day to supply orders.

The departments are: biscuit, confectionery, jams and jellies. Biscuits are made in great variety. In all there are over one hundred and fifty kinds made, including the fine sodas and the registered "Daisy Wafer." Though fancy biscuits receive a large share of attention, the strong point made by the company is in their ordinary soda. Nothing is left undone to make them sell themselves. The finest creamery butter and the best quality of flour are used to produce a superior article. Sometimes a surprise awaits the would-be seller of raw material. Not long ago a dealer in butter went to the office and said: "I have a lot of butter here which I can sell you cheap."

"How much a pound?" said the buyer.

"Oh, I'll give it to you for 15 cents."

"It's too cheap," said the buyer.

The dealer simply opened his eyes and inwardly wished he'd asked 20.

"You see," said the buyer, "we can't use cheap butter. We couldn't use yours at any price. We use nothing but the choice creamery article."

The extent of the output of biscuits can be seen in the fact that the consumption of flour amounts now to a hundred barrels per day.

Fifty barrels of sugar a day from the refiners go into the thousand and one kinds of confectionery the premises. The process is quite marvelous. Each different class of goods has a different process. What with strong men swinging great rolls of ductile confectionery, pretty girls carefully dipping chocolates, goods to be finished in cold rooms and others destined for the other extreme of heat, men pouring out the "molten gold" from seething cauldrons and others in white caps and aprons packing the manufactured article, the whole is a scene which quite turns the head of the visitor—particularly the pretty girls dipping the chocolates.

The jam and jelly department is doing a good business. Jams and jellies are here manufactured from the pure fruit. The goods are done up in neat one-pound glass jars, and large orders are put in larger packages.

The company's business is steadily on the increase in all departments, whether it be from the good selling qualities of their eight travelers, or the excellence of the goods they have to sell. Perhaps both have something to do with it.

Injured by a Cannon.

By the explosion of a cannon on the exhibition grounds at 9.30 last evening, Arthur Tullin, 233 Bathurst-street, was burned about the arms and hands by the powder, and James Blair, 110 Clarence-street, had a thumb severely roasted. They were removed to the hospital where they were cared for and their wounds dressed. James Blair has so far recovered as to be able to be removed home. Both were members of the Toronto Field Battery.

Profitable Work for Capable Men.

Fourth day	3985	4084	4938

Afternoon—The Hunt Club steeplechase, donkey race, judging of tandems and competition for boy pony riders—special features.

Evening — Equestrian exhibition and the specialty company performances.

Yesterday was School Children's Day at the exhibition. In every corner of the grounds were shining little faces. In the Main Building wherever cards or other mementoes were being given away, eager hands stretched forward to grasp them. One enterprising exhibitor distributed fancy biscuits and received of course a lion's share of patronage. In the Machinery Hall many wondering eyes watched the rapid revolutions of the mechanic's achievements. The Natural History building was thronged all day with little ones eager to share their sweetmeats with birds and reptiles. The grand stand was merry with the ringing laughter of thousands of youngsters, being carted to the railway stations every hour of the day.

Though the company has been organized for only a short time—since April—its success has been phenomenal. The rapid progress made during these few months gives bright promise of a most successful future. In April last the company was formed, Messrs. H. C. Fortier, George Booth and Charles Peters, all well-known gentlemen, being the principals. Mr. W. J. Solomon was engaged as manager and the different departments were placed in the hands of the best men that money could procure. The employment of the most skilled men with the use of none but first-class materials produced an effect at once. Orders began to come in and increased in size and number as the months went by. At present every department is heavily taxed, so much so that work is carried on both night and day to supply orders.

The departments are: biscuit, confectionery, jams and jellies. Biscuits are made in great variety. In all there are over one hundred and fifty kinds made, including the fine sodas and the registered "Daisy Wafer." Though fancy biscuits receive a large share of attention, the strong point made by the company is in their ordinary soda. Nothing is left undone to make them sell themselves. The finest creamery butter and the best quality of flour are used to produce a superior article. Sometimes a surprise awaits the would-be seller of raw material. Not long ago a dealer in butter went to the office and said: "I have a lot of butter here which I can sell you cheap."

"How much a pound?" said the buyer.

"Oh, I'll give it to you for 15 cents."

"It's too cheap," said the buyer.

The dealer simply opened his eyes and inwardly wished he'd asked 20.

"You see," said the buyer, "we can't use cheap butter. We couldn't use yours at any price. We use nothing but the choice creamery article."

The extent of the output of biscuits can be seen in the fact that the consumption of flour amounts now to a hundred barrels per day.

Fifty barrels of sugar a day from the refiners go into the thousand and one kinds of confectionery the premises. The process is quite marvelous. Each different class of goods has a different process. What with strong men swinging great rolls of ductile confectionery, pretty girls carefully dipping chocolates, goods to be finished in cold rooms and others destined for the other extreme of heat, men pouring out the "molten gold" from seething cauldrons and others in white caps and aprons packing the manufactured article, the whole is a scene which quite turns the head of the visitor—particularly the pretty girls dipping the chocolates.

The jam and jelly department is doing a good business. Jams and jellies are here manufactured from the pure fruit. The goods are done up in neat one-pound glass jars, and large orders are put in larger packages.

The company's business is steadily on the increase in all departments, whether it be from the good selling qualities of their eight travelers, or the excellence of the goods they have to sell. Perhaps both have something to do with it.

Yesterday the directors extended their hospitality to the members of the Public School Board. Trustee Baird was the spokesman on behalf of the board. Speeches were also delivered by W. Gray, of Chatham, and Messrs. I. Beck, J. D. Williams, John Campbell of London, John Burns, Spieght, Markham; George and Lailaw of Hamilton. All expressed themselves as more than satisfied with the fair.

The children from the Boys' and Girls' Homes and Industrial schools were admitted free of charge at the time when the Women's Christian Temperance Union took them in charge and treated them to a tempting and substantial meal. Above the table stretched a banner with the beautiful lines:

"And on each helpful spirit be
For this the children's charity,
The children's benediction."

They Were Thick in the Evening.

A great number of those who came up during the day stayed over for the night performance, and thousands more journeyed after tea and had a look at the buildings and grounds lit up by electricity and at the scenic reproduction of the Siege of Paris.

Everything went off charmingly. The street cars and boats were jammed returning and all about could be seen little ones whom sleep had overtaken at the end of their day of ceaseless activity.

Dog Cart Horses and Cobs.

The judging in the horse ring was continued yesterday afternoon. The classes for dog cart and cob horses, which was commenced on Thursday, was resumed yesterday, and proved a keen competition. The judges awarded first prize for dog cart horse not under 15¾ hands to W. D. Grand's black gelding, by an imported coach horse out of a Reveller mare. He was certainly the pick of the lot, being an exceptionally good looker, with great action, and was well deserving of first honors. The second prize was given to S. Frenkel's bay mare by Cyclone, dam by Ryshawk, Charles Brown's bay mare Polly securing third.

In the class for dog-cart horses under 15¼ hands and over 15 hands, W. D. Grand was again successful, this time with a very stylish chestnut mare by Moonstone, out of a Terror mare, while H. R. Grossley's chestnut mare Lady Carling, driven by F. A. Campbell, V.S., secured second and C. R. MacLean's, M.D. (Meaford) bay gelding Shylock third. The first for cobs not under 14 hands or over 15, went to J. Russell's mare Jessie, W. D. Grand being awarded the second with bay gelding by Sunshine, John Carson (Kingston) getting third with a chestnut mare, Maud. On the whole, the above classes were much superior to last year, and the judges regretted not being able to award some of the other cont
