

angle be trustworthy, as a measure of the degree of intelligence, we have shown here a development far in excess of the negro, which is placed at  $70^{\circ}$ , or of the Mongolian at  $75^{\circ}$ , and exceeding that observed by me in many German skulls, which do not, as a rule, come up to the  $90^{\circ}$  of Jupiter Tonans or of Cuvier, in spite of the boasted intelligence of that nationality.

In none of the skulls of the collection is there observable the heavy superciliary ridges alleged to be common in lower races, but which exist in many of the best-formed
