

of large quantities of Honey at a High Price. But one day Apollo, who was experienced in the matter of Honey and its medical properties, came that way seeking some good sample for the use of his friend Diana who was a little ill. He looked at the new preparation, which was put up in chocolate tablets and called Honeyidea: He also listened to the new Buzz. "I think," he said, finally, "that the Buzz is much more wonderful and effective than the Honey; I will take it to Diana, who is found of buzzing."

Some days later, Æsop, on hearing this story, remarked that the Moral which he would add was that the Art of Advertising a new medicinal preparation is of more importance than the Art of making It.—*Boston Med. and Surg. Jour.*

—W. R. Warner & Co. have received the first premium at the World's Exposition, New Orleans, for great uniformity and solubility for their sugar-coated pills. This is the ninth World's Fair prize which attests to their excellence.

—Some time ago, at the suggestion of Dr. James H. Burns of Toronto, *Morse's Glycerole of Celery Compound* was placed before the profession to be used instead of the more powerful drugs in the treatment of teething infants and adults suffering from nervousness, etc., etc. The after effects of opium are well known and deplored. Upon young children, in any case, the continued use of opium is very objectionable. A remedy having the necessary soothing and quieting effects of opium, followed by a tonic and nutritive action to the patient, should be invaluable to the practitioner. Such a remedy we have in *Celery Compound*, which needs only a thorough trial to demonstrate its value. The proprietor guarantees the formula to contain *no opium in any form*, and only the ingredients therein mentioned, flavored with anise. It can be given in large doses, as a tonic, to the most delicate infant, with perfect safety.
