

publisher, offers to the purchaser many advantages which will be appreciated by those who do not care to subscribe for the entire work at one time. This American edition of Nothnagel's Encyclopedia will, without question, form the greatest system of medicine ever produced, and the publishers feel confident that it will meet with general favor in the medical profession.

*Anatomy: Descriptive and Surgical.* By HENRY GRAY, F.R.S., Fellow of the Royal College of Surgeons, Lecturer on Anatomy at St. George's Hospital Medical School. Edited by T. Pickering Pick, F.R.C.S., Consulting Surgeon at St. George's Hospital and to the Victoria Hospital for Children, H. M. Inspector of Anatomy in England and Wales; and Robert Howden, M.A., M.B., C.M., Professor of Anatomy in the University of Durham, Examiner in Anatomy in the Universities of Durham and Edinburgh, and to the Board of Education, South Kensington. A revised American, from the fifteenth English edition, with 780 illustrations, many of which are new. Philadelphia and New York: Lea Brothers & Co.

It is almost needless to review a work that is so widely known as Gray's Anatomy, yet it is important to review the work because it has served as a basis for the study of anatomy so many years. No graduate in medicine in the past forty years is unacquainted with Gray. It is really remarkable that any volume should have stood the test of time as this one has done. It is to-day recognized as one of the best authorities on anatomy extant, and a recognized text-book in all of the principal medical colleges of the world. There is no doubt that even the study of anatomy is advancing, and in this revision of the fifteenth English edition there have been additions of importance, especially in the chapter of embryology. We can recommend this work to every student, and many old practitioners would benefit by purchasing the new edition, if only for the exceedingly good illustrations that have been added to the volume. We hope some day to see added to Gray a chapter on frozen sections, which is a particularly fine method of studying anatomy, and we feel satisfied that in some future edition of Gray this method will be adapted and chapters devoted to the anatomical study as seen in frozen sections. The press work, typography and binding are all of the excellent quality that Lea Brothers & Co. always put forth.

*The Physician's Visiting List for 1902.* Fifty-first year of its publication. Philadelphia: P. Blakiston's Son & Co., 1012 Walnut Street.

For many years it has been our pleasure to speak in the highest terms of Blakiston's visiting list. We have before us the list for 1902. It is quite equal to any that have preceded it, and second to none among the many excellent visiting lists published in recent years. In fact the writer prefers this above all others.
