THE SUCCESSFUL REMEDY

—For—

Nasal Catarrh

♣

Must be non-irritating, easy of application, and one that will, by its own action, reach all the remote sores and ulcerated surfaces. The efforts to treat catarrh during the past few years demonstrate that only one remedy has met these conditions, and that is Ely's Cream Balm. This safe and pleasant remedy has mastered catarrh as nothing else has ever done, and both physicians and patients freely concede this fact. The more distressing symptoms quickly yield to it, and a multitude of persons who have for years borne all the worry and pain that catarrh can inflict, testify to radical and permanent cures wrought by it.

Ely's Cream Balm is soothing, excites no dread, dissolves the hardened accumulations, lessens the extreme sensibility of the membrane to cold and all external irritants, and is followed by no reaction whatever.

A cold in the head is an inflammation of the lining membrane of the nasal passages, which, when unchecked, is certain to produce a catarrhal condition—for catarrh is essentially a "cold" which nature is no longer able to resolve or throw off.

ELY'S CREAM BALM is not a liquid, snuff or powder. Applied into the nostrils it is quickly absorbed. It cleanses the head, allays inflammation, heals the sores, restores the senses of taste and smell. Sold by druggists or sent on receipt of **Price, 50c.**

hibited stuff. It is to be—in fact some of it has already been—put upon the market in competition with the ordinary standardized grade, and to that fact is attributed the weakening of the market referred to in our review of the opium trade last week. The stock already sold is said to contain about five or six per cent. of morphia, and that, it is intimated, will be the basis of morphia strength of the stuff to be turned out in the future.

At present the business is said to be controlled by a firm of no prominence in the drug trade, but an effort is being made to interest more influential people. We know that the head of one prominent house has been approached with inducements to engage in the scheme, but, it is hardly necessary to say, without success. Among the arguments brought to bear upon this gentleman was that the importation of opium containing less than nine per cent. of morphia being prohibited by law, the domestic manufacturers of the so-called standardized opium, being thus protected could monopolize the trade, while the low percentage of morphia in their stuff would allow them to make a big profit.

There can be no doubt of the unlawfulness of this sophistication of opium and that its sale is prohibited by the laws at present on our statute books. The standard of purity which is acknowledged under the law is that made official by the United States Pharmacopeia, which, as our readers are aware, pro-

vides for a morphia strength of nine per cent. It will avail nothing to call this manipulated opium by another name, as standardized, as this, to most minds, and reasonably, conveys the idea that it is of the U. S. P. morphia strength. Assuming that the stuff would be sold on the basis of actual morphia strength, it would still be clearly an adulterated article, susceptible of easy proof in the fact that the customs laws prohibit the importation of low test opium. The sale of low test opium would therefore be *prima facie* evidence that it had undergone some manipulation at the hands of the vendor. Of the morale of such proposed manipulation it is not necessary to speak further.—[Oil, Paint, and Drug Reporter.]
