GOLDEN sulphide, a product of antimony, which is being largely made use of the manufacture of rubber goods, is in so much demand that it is the intention, so the Fredericton Gleaner tells us, of some of the antimony companies in New Brunswick to perform the process of separating the rock from the ore on the ground, and thus save the cost of transportation of waste material. The Lake George antimony company has an agent in Great Britain for the purpose of interesting capitalists in the development of the extensive veins of antimony which are to be found on its property.
