

WORKING OVERTIME.

A Chicago teacher gave a boy pupil a question in compound proportion for home work one evening, which problem happened to include the circumstances of "men working ten hours a day to complete a certain job."

The next morning the unsuspecting teacher, in

looking over his pack of exercises, found one pupil's problem unattempted, and the following note attached to the page:

"Dear Sir, I refuse to let my son James do his sum you give him last night as it looks to me like a slur on the 8-hour system, enny sum not more than 8 hours he is weleum to do but not more. Yrs. trooly, Samuel Blocksky."—"Success Magazine."

Do You Know the Merits of

CEMENT SIDING ON "HERRINGBONE" LATH?

It allows a greater variety of finish at a lower cost than any other construction. It gets stronger with age. It is vermin proof, weather proof and fire proof.

It solves the housing problem in over-crowded towns and cities, because it is quickly erected, and is cheaper than wood.
