DECK OF THE OUTWARD BOUND.

From Eliza Cook's Journal. Haw seldom we dream of the mariner's grave Far down by the coral strand. How little we think of the wind and the wave.

The hurricame comes and the hurricane goes.

And little beed do we take, And lattle need do we take,
Though the trees may snap as the tempest blows
And the walls of our homestend shake,
But the north-east wind tells a different take
With a voice of fearful sound.
When a loved one is under a close reef 'd sail. On the deck of an 'outward bound.

When all we love are on land.

How wistful then we look on the night, As the threatening clouds go by:
And the winds get up, and the last faint light
Is dying away in the sky:
How we listen and gaze with a silent lip,
And judge of the hended tree. How the same wild wind might toss the ship, And arrose the mighty ecs! And pray for the loved ones far away.
On the deck of the 'outward bound.'

There is one that I cherished, when band

Was as earnest as love could be But now that he hath gone out on the tide,
I find that I worship him more.
And I think of the waters deep and wide, As I bask on the flowers on shore.

I have watched the wind, I have watched

And shrunk from the tempest sound;
For my heart strings are wreathed with the slender spars.
That carried the 'outward bound.'

THE ROTHSCHILD FAMILY.

DEATH OF THE BARON SALOMON.

There is a golden romance clustering around this family which makes the death of one of its prominent members a matter of historic notoriety.

The Baron Saloman, whose funeral took place recently at Paris with somewhat of public solemnity, was the second son of the founder of this house, and was at his death aged 82. Anselin, the first son, who was at the head of the Frankfort House, has some time since passed away. Nathan, the third, who reigned over the great London house, is also gone; and of the second generation of these moneyed Mochicans there are now left but James, also of Paris, and Charles. of Naples. Not so much in the loss of their persons, however as of their powers, have the Rothchild family received a severe blow in the death of two of its members---the only able one surviving being James, who, both in monetary genius, elevation of character and range of mind, is the star of the house of Rothschild. Anselm was great by his sagacity; Nathan by his industry; James is by his genius. Anselm singularly combined the instincts of a low cloth Jew, with the penetrating vision of the statesman. Nathan united all the steadiness of a merchant with the crait or a anuggier. Freit Was, who, while established at Manchester, amassed an enormous fortune by smuggled trade during Napoleon's Blockade of the Continent He knew the result of the battle of Water-Government, and we should fear to surmise what each minute in each of those hours was in his hands worth. But James has, in addition to the sagacity of the one and industry and craft of the other, that which they did not possess—great genius, a most courtly bearing and polished cultivation of mind, which make his relations with the Royal Houses of Europe wear more the character of a diplomatist, while those of his brothers Anselm and Nathan never rose above the

But a few years ago and the windows of this house on the Ghetto were always seen once within the annual circle, on one particular night, to wear a glitter of light, which, as it was cast from the old Jewish lamps, threw a strange, ghastly glimmer on the dignity, decay and dust-eaten dwellings around. This night was the eve of the Jewish New-Year's Day, when were gathered, no matter with what travel, the five sons of Frankfort, Vienna, London, Paris, and Na-ples around a withered, but shrewd-looking. Hebrew woman. This was the mother of the moneyed Grachi, who still clung to the conciliate all conflicting interests and clashold Ghetto house from which the family had ing individualities, which must be mastered started. The house yet stands, but its stair and subdued to ensure a great success. But on the New-Year's Night in silent. The windows throw their glitler no more. In his rosier days of youth he affected a tender passion for the Sontag, and the loiterers made much merriment in watching him following her with amorous eagerness as she passed through the streets of Frankfort, passed through the streets of Frankfort, bowing, and smiling, and chatting, while his red, rabicand face beamed with fat and fatuity. The other surviving brothers of Vienna and Naples, as we have shown, were in every respect inferior men. and the younger branches of the family are either degenerated by intermarriage with tion which new blood pours into the veins or are like Lionel of London, who is a mere cloth Jew, with two ideas-"to make monisch" and to be a lord. A baronetcy was offered him by Lord John Russell-possibly to compensate him for bearing the expenses of their joint election---but his vaulting ambition would brook no lower title than a lord. But that financial genius which Anselm, Nathan and James inherited from their sire will be looked for in rain among the younger re-presentatives of the house in London. This was clearly evidenced during the Irish famine and the commercial crisis and French revolution which succeeded. Although the great bulk of corn bills passed through their hands. and they know well the heary liabilities contracted by many of the importers, they were so wholly unprepared when the crash came and house after house stopped payment, that to breast the storm they were compelled to dispose of their English securities, thus producing the immense fall in Consols in 1847, and shaking confidence, which by greater sagacity might have been preserved. This was well known in London, and in fact the little credit which Barons Lionel and Meyer and Sir Anthony possessed for comprehensive foresight, was entirely forfeited. Barons James of Paris, and Anselm, were in fact the directing and protecting powers of the various operations of the houses, and now that one is gone and the other must soon follow, it is a serious question whether if in the train of the present war the thrones of Europe should be shaken, and securities fall, the Rothschilds, a large portion of whose influence is dependent upon the firmness of their throne, would be able to retain their own golden crown, when that genius has departed which controlled the fortunes of the

house. Baron James, who had long seen the dangers of the position of their house with reference to Austrian, Italian, and other Continental securities, used his influence and power with the other members to lead them away from financial, and induce them to devote themselves exclusively to mercantile, ed agencies at all the leading points on the globe to invite consignments and solicit orw the result of the battle of Waterthours before it reached the British

It was the jealousy created by this premacy over the Rothschilds in finance, as they had interfered with them in commerce. The Rothschilds have, however, always exhibited an aversion to touching anything Russian. The old Frankfort Rothschild on his death-bed called his children round him and with parting voice warned them equally against Russia and Republicanism. He distrusted both. However, their relations with courts, especially on the Continent, were too intimate to be loosened so soon, and merchant-like ambition cannot be satisfied without qualities which Jews rarely possess. To control great shipping operations and great merchant undertakings, great qualities of heart must be blended with great qualities of head, in order to compromise and lute in its leanings ever to succeed where compromising interests and concilliating individuals is to be achieved, and it is too pursuits which require a diffusion of qualitie and a many-sided watchfulness.
