(d) Educational Documentation

There is no national centre for educational documentation in Canada. The Canadian Education Association offered to act in this capacity within the limits of its constitution and jurisdiction.

2. Extension of Education

(a) Fundamental Education Associated Projects

(i) Survey of Methods of Teaching Reading and Writing - Some uncertainty concerning the precise pattern of this survey and misdirection of pertinent documents delayed the Canadian contribution. The Canadian Education Association is now obtaining opinions from competent authorities in the field of primary and secondary education concerning the preliminary survey.

(ii) Survey of Administrative Aspects of Free and Compulsory Primary Education - A Canadian bibliography and a collection of Canadian texts on this subject were forwarded to UNESCO as a history of Canadian experience in this question.
