

2.3 Impact of Canada's Support for Sudan's Oil Development on the Peace Process

Symposium participants drafted recommendations related to Sudan's oil development projects, and specifically, the impact of Canada's support for those projects on the peace process.

There was consensus among participants to support the continued implementation of complementary strategies aimed at forcing Talisman's disinvestment from Sudan until there is peace, including cross-sectoral awareness-raising and mobilization, a media campaign and a call to investors to divest to demonstrate their support for the people of Sudan.
