

We must also ensure that Canada's policies and actions are consistent with the international goals of global bargains. Therefore:

- (22) We recommend that a review be undertaken of trade development programs and subsidies, and of foreign aid policies, programs and projects to ensure they are consistent with the preventive aims of this report.

Figure 1: Ozone in the Atmosphere

In the upper atmosphere, a small amount of ozone is found at altitudes between 20 and 30 km. This is formed when the sun's rays hit the air particles. Most of the ozone in the atmosphere is found between 10 and 20 km, with the highest concentration between 20 and 25 km.
