

Now for I had a Cousin who myeloided the symptoms un-
-till the cancer broke out and there was no cure for it in
my mind cancer is hereditary I have a case which I shall
try it on in a short time a Neighbor who has cancer went
to physicians for an operation they found him up the same
but they could do nothing for him they gave him six
months to live I shall try this remedy internally on him
Now Mr Currie if you think there is any in this I will

gladly tell you or if you will send it to Lord Atholton

I keep a small quantity of the salve always on hand
but the syrup must be made as you use it they are
made from Red Clover blossoms gathered fresh and pulled
of green leaves and steeped down to a syrup for inward
use the syrup steeped down to a salve like you would
maple sugar but not quite so hard the salve to be applied
before breaking out

This is not written for the remuneration but
would like to have some one of Means take hold of it
if it is as I hold it of great value that the poor may
enjoy it.

My address Mr J Sager, Bridgeport
Sagamore to Michigan
