so many conspira-

Until the 13th of this month no material change of weather will be perceptible,—continuing uniformly warm and fine until the above mentioned period; after which cloudy and sultry weather will set in, with little variation until the 17th, when it will break up with a heavy thunder storm, and again warm steady weather will set in, although with a considerable increase of heat, and occasional heavy showers of rain. On the 21st the weather will become more temperate, but, as was the case in June, the heat will gradually increase as the month closes.

In what do the Loughborough girls ex-sell? In the market.
